DVD Contents

Chapter 1

S. No. Video Name

1. *Video 1:* Direct planimetry of the TV can be done on 3D echo
2. *Video 2:* Moderator band in RV and the anterior and posterior leaflets on enface view on 3D echo
3. *Video 3:* Annular contraction of the TV annulus in systole, due to its fibrous and muscular nature
4. *Video 4:* The TV with its 3 leaflets in case of a 18 years old in deep TQ view, showing its position to the mitral valve
5. *Video 5:* ME 4 chamber views the TV but not the PV
6. *Video 6:* IVC diameter measurement in lower esophageal TEE view
7. *Video 7:* The TG midpapillary can be used to measure the distensibility index

Chapter 2

S.No. Video Name

1. *Video 1:* ME four chamber view
2. *Video 2:* ME four chamber view
3. *Video 3:* ME bicommissural view
4. *Video 4:* ME ascending aortic SAX
5. *Video 5:* ME ASC aortic LAX
6. *Video 6:* ME right pulmonary vein view
7. *Video 7:* ME AV SAX view
8. *Video 8:* ME RV inflow-outflow view
9. *Video 9:* ME RV inflow-outflow view
10. *Video 10:* ME RV inflow-outflow view
11. *Video 11:* ME modified bicaval view
12. *Video 12:* UE right and left PV view
13. *Video 13:* TG basal SAX
14. *Video 14:* TG basal SAX
15. *Video 15:* TG basal SAX
16. *Video 16:* TG basal SAX
17. *Video 17:* TG midpapillary SAX view
18. *Video 18:* TG midpapillary SAX view
19. *Video 19:* TG midpapillary SAX view
20. *Video 20:* TG apical SAX view
21. *Video 21:* TG RV basal view
22. *Video 22:* TG RV inflow view
23. *Video 23:* Deep TG 5–chamber view
24. *Video 24:* TG RV inflow
25. *Video 25:* UE aortic arch SAX
26. *Video 26:* Pulmonic valve and RVOT 70–110
27. *Video 27:* Tricuspid inflow and pulmonic regurgitation in diastole
28. *Video 28:* Pulmonary valve in RT sided inflow-outflow view

Chapter 3

S.No. Video Name

1. *Video 1:* Bicaval view
2. *Video 2:* Midesophageal (ME) four-chamber view
3. *Video 3:* Midesophageal right ventricle (ME RV) inflow outflow view
4. *Video 4:* TV septal leaflet which straddles the VSD and this point measures the gradient across the VSD

Chapter 4

S.No. Video Name

1. *Video 1:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
2. *Video 2:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
3. *Video 3:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
4. *Video 4:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
5. *Video 5:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
6. *Video 6:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
7. *Video 7:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
8. *Video 8:* Functional tricuspid regurgitation with severe mitral restenosis following a CMV done on this patient in dysphonic with mitral area of 0.6 and moderate tricuspid regurgitation. TV annulus measures 32 mm and anterior papillary muscle is tethered
9. *Video 9:* (A) Functional tricuspid regurgitation with mitral stenosis; (B) Mild to moderate functional tricuspid regurgitation with mitral valve stenosis
10. *Video 10:* Tricuspid valve 4 chamber view
11. *Video 11:* ME RV inflow—outflow view
12. *Video 12:* Mid-esophageal bicaval modified view
13. *Video 13:* View of coronary sinus
14. *Video 14:* ME-AV SAX (Midesophageal aortic valve short axis view)
15. *Video 15:* TG-TV SAX (Transgastric tricuspid valve short axis view)
16. *Video 16:* Transgastric-RV inflow view
17. *Video 17:* The ruptured papillary muscle
18. *Video 18:* The carcinoid heart disease.
    The tricuspid valve seen "enface" with all 3 leaflet with thickened and shortened leaflets causing stenosis and/or regurgitation and ultimately right heart failure
19. *Video 19:* Laminar tricuspid regurgitation in transthoracic view
20. *Video 20:* The laminar flow in tricuspid regurgitation, wherein, the regurgitant volume is much greater for a given transvalvar pressure gradient. The velocity of the jet is around 2 m/s
21. *Video 21:* Severity of RVOT abstruction should be ruled out with Doppler. This may dilate the TV annulus and cause a TR as in this 22-year-old male
22. *Video 22:* (A) TR coexisted with PS in this 24-year-old patient who underwent a DCRV repair with a diverge repair for the TV; (B) Double chamber right ventricle with pulmonary stenosis
23. *Video 23:* Tricuspid regurgitation in a patient with chronic constrictive pericarditis
24. *Video 24:* (A) Double outlet right ventricle with ventricle septal defect; (B) Double outlet right ventricle with ventricle septal defect with mitral stenosis
25. *Video 25:* Ebstein anomaly of the tricuspid valve
26. *Video 26:* Three dimension (3D) echo cardiogram of Ebsteins' anomaly of tricuspid valve regurgitation
27. *Video 27:* (A) Tricuspid atresia with ASD and VSD; (B) 3D tricuspid atresia
28. *Video 28:* (A) Tricuspid atresia with ASD and VSD; (B) 3D tricuspid atresia
29. *Video 29:* Mild tricuspid regurgitation with mitral valve repair
30. *Video 30:* Huge tricuspid regurgitation
31. *Video 31:* Tricuspid regurgitation with mitral stenosis
32. *Video 32:* Mitral stenosis with TR
33. *Video 33:* Three dimensional echocardiography of tricuspid regurgitation

Chapter 5

S.No. Video Name

1. *Video 1:* Tricuspid stenosis on 3D TEE with thickened TV cusps
2. *Video 2:* Right ventricular (RV) fibroelastoma seen as a vegetation on TV leaflet

Chapter 6

S.No. Video Name

1. *Video 1:* TEE of pulmonary valve stenosis
2. *Video 2:* Tetralogy of Fallot in pulmonary stenosis
3. *Video 3:* Double chamber right ventricular in pulmonary stenosis
4. *Video 4:* Pulmonary insufficiency
5. *Video 5:* Associated lesions in pulmonary stenosis
6. *Video 6:* Arterial septal defect in pulmonary stenosis
7. *Video 7:* Fetal echocrdiography in pulmonary stenosis
8. *Video 8:* Severe pulmonary stenosis with color Doppler
9. *Video 9:* Double outlet right ventricle (DORV) with pulmonary stenosis

Chapter 7

S.No. Video Name

1. *Video 1:* Pulmonic valve and RVOT at 70°–110°
2. *Video 2:* Pulmonary valve in right sided inflow-outflow view
3. *Video 3:* Tricuspid inflow and pulmonic regurgitation in diastole
4. *Video 4:* PPHN, pulmonary regurgitation

Chapter 9

S.No. Video Name

1. *Video 1:* The marked distortion of right ventricular and right atrial geometry. The approx. position of the mitral annulus is noted by the broad arrow at the lower right.
2. *Video 2:* Ebstein anomaly in adult patient with continuous wave Doppler
3. *Video 3:* Ebstein anomaly in adult patient with continuous wave Doppler
4. *Video 4:* Ebstein anomaly in adult patient with continuous wave Doppler
5. *Video 5:* A long snake-like posterior leaflet
6. *Video 6:* A long snake-like posterior leaflet

Chapter 10

S.No. Video Name

1. *Video 1:* RV fibroelastoma of the tricuspid valve
2. *Video 2:* Real time 2D and 3D transthoracic echocardiography in right ventricular thrombus

Above videos do not have voice over

Contents

SECTION I: TRANSESOPHAGEAL ECHOCARDIOGRAPHY OF TRICUSPID VALVE

Section editor: Yatin Mehta

1. **Anatomy of Tricuspid and Pulmonary Valves** 3
   Poonam Malhotra Kapoor, Ajay Jha

   Anatomy of the Tricuspid Valve 3; Chordae 6; Pulmonic Valve Anatomy 14; Anatomy of the Right Heart 16; Physiology of the Right Heart 16; Application of Tricuspid Valve and Pulmonary Anatomy 20; Right Ventricular Diastolic Function 27

2. **Transesophageal Echocardiography Views of Tricuspid and Pulmonary Valves** 29
   Murali Chakarvarthy, Poonam Malhotra Kapoor, SN Das

   Mid-esophageal Four-Chamber View 34; Mid-esophageal Mitral Commissural View 36; Mid-esophageal Ascending Aorta: Short Axis View 37; Mid-esophageal Ascending Aorta Long Axis View 39; Mid-esophageal Right Pulmonary Vein View 40; Mid-esophageal Aortic Valve Short Axis View 41; Mid-esophageal Right Ventricular Inflow-outflow View 42; Mid-esophageal Modified Bicaval View 43; Upper-esophageal Right and Left Pulmonary Veins View 44; Transgastric Basal Short Axis View 45; Transgastric Mid Papillary Short Axis View 47; Transgastric Apical Short Axis View 48; Transgastric Right Ventricular Basal View 49; Transgastric Right Inflow-outflow View 50; Deep Transgastric 5-Chamber View 51; Transgastric Right Ventricular Inflow View 52; Upper-esophageal Aortic Arch: Short Axis View 53; Transesophageal Echocardiography Views to Assess Pulmonary Valve 54; ASE/SCA 2013 Guidelines for Tricuspid Valve 3D TEE 55; Pulmonary Valve 3D TEE 57

3. **Doppler Examination Across Tricuspid and Pulmonary Valves** 61
   Poonam Malhotra Kapoor, Sameer Taneja, Mahesh Vakamudi

   Estimation of Intracardiac Pressures 64; Shunt Fractions 67

4. **Tricuspid Regurgitation** 71
   Poonam Malhotra Kapoor, Dharmesh Aggarwal

   Severity of Tricuspid Regurgitation 73; Etiology of Tricuspid Regurgitation 76; Functional Tricuspid Regurgitation 78; Pathogenesis of Tricuspid Regurgitation in Mitral Valve Disease 81; Leaflet Tethering of Functional Tricuspid Regurgitation 83; TEE Views of Tricuspid Regurgitation 86; Tricuspid Regurgitation due to Infective Endocarditis 88; Miscellaneous Etiologies 90; Intraoperative Post-cardiopulmonary Bypass Laminar Tricuspid Regurgitation 90; Atrioventricular Canal Defect Causing Tricuspid Regurgitation 93; Tricuspid Regurgitation with TOF 93; Double Chambered Right Ventricle 95; Chronic Constrictive Pericarditis 97; Tricuspid Regurgitation due to Ebstein's Anomaly 102; Absent Pulmonary Valve 105; 2D Echocardiography 108;

Color Flow Doppler 108; Continuous Wave Doppler for Tricuspid Valve 111; Pulse Wave Doppler 113; Measurement of the Vena Contracta 115; Moderate Tricuspid Regurgitation during Mitral Valve Surgery 117; Endocardial Lead Induced Tricuspid Regurgitation 119; Tricuspid Valve Anatomy on Real Time 3D Echocardiography 120; Traumatic Tricuspid Regurgitation on 3D TEE 124; Usefulness of Live 3D Echocardiography in Tricuspid Regurgitation 124; Tricuspid Regurgitation 3D Color Flow Doppler 126

5. Tricuspid Stenosis **133**
Poonam Malhotra Kapoor, Arindam Choudhury, Manju Mani

Etiology of Tricuspid Stenosis 133; Rheumatic in Tricuspid Stenosis 134; Carcinoid in Tricuspid Stenosis 135; Eosinophilic in Tricuspid Stenosis 135; Live 3D Echocardiography in Carcinoid Disease 137; Metabolic and others Abnormalities in Tricuspid Stenosis 137; Pacemaker Lead-induced Severe Tricuspid Valve Stenosis 137; Infective Endocarditis in Prosthetic Tricuspid Valve 138; Other Miscellaneous Etiology of Tricuspid Valve 138; Pathophysiology of Tricuspid Valve 139; Sequelae of Tricuspid Stenosis 141; Anatomic Presentation of Tricuspid Stenosis 142; How to Grade Tricuspid Stenosis? 142; Approaches to Three-dimensional Imaging of the Tricuspid Valve Stenosis 146; Percutaneous Transcatheter Valve-in-valve Implantation in Stenosed Tricuspid Valve Bioprosthesis 146

SECTION II: TRANSESOPHAGEAL ECHOCARDIOGRAPHY OF PULMONARY VALVE

Section editor: Muralidhar Kanchi

6. Pulmonary Stenosis **153**
Poonam Malhotra Kapoor, Sarvesh Pal Singh

Anatomy of Pulmonary Valve 153; Valve Anatomy 154; What is Pulmonary Stenosis? Pathophysiology of Pulmonary Stenosis 154; Physiology of Pulmonary Stenosis 156; Infundibular Pulmonary Stenosis 160; Pulmonary Artery and Vein Stenosis 161; Why is Pulmonary Stenosis a Concern? 161; Color Wave and Pulse Wave Doppler and Pressure Gradients Across the Pulmonary Stenosis 162; Pressure Gradient Across the Pulmonary Stenosis 166; Severity Definitions of Pulmonary Stenosis 169

7. Pulmonary Regurgitation **183**
Poonam Malhotra Kapoor, Suruchi Hasija

Etiology of Pulmonic Regurgitation 184; Etiology and Mechanisms of Pulmonary Regurgitation 185; Other Etiologies of Pulmonary Regurgitation 185; Pulmonary Regurgitation in Tetralogy of Fallot 186; Pathophysiology of Pulmonary Regurgitation 186; Clinical Presentation of Pulmonary Regurgitation 188; Investigations for Pulmonary Regurgitation 189; 2-Dimensional Echocardiography and M-Mode 191; Color Flow Doppler 191; Continuous-wave Doppler and Pulse Wave Doppler 192; Vena Contracta Width 193; Flow Convergence Method 194; Pulsed Doppler 194; Regurgitant Volume and Fraction 194; 3-Dimensional TEE of Pulmonary Regurgitation 196; Role of Exercise Echocardiography 198; Integrating Indices of Severity 198; Assessment of Pulmonary Regurgitation Severity 199; Severity of the Pulmonary Regurgitation 199

8. Pulmonary Artery Hypertension **203**
Poonam Malhotra Kapoor, Vishwas Malik, Usha Kiran

Causes of Pulmonary Hypertension 204; Clinical Features of Pulmonary Hypertension 204; Echo Assessment of Pulmonary Hypertension 205; Pulmonary Artery Systolic Pressure Measurement on TEE 205; TR V_{max} for Pulmonary Artery Hypertension Diagnosis 209; Pulmonary Artery Diastolic Pressure 211; Associated Features 212; Sample Report as a Summary of Pulmonary Arterial Hypertension Echo Measurement 212

9. Ebstein's Anomaly **215**
Navin C Nanda, Poonam Malhotra Kapoor, Arun Subramaniam

Anatomy of Ebstein's Anomaly 215; Clinical Presentation in Ebstein's Anomaly 216; Congenital Abnormalities of Tricuspid Valve: Ebstein's Anomaly 217; Jugular Venous Pressure in Ebstein Anomaly 220; Cathlab of Ebstein's Anomaly 220; Electrocardiogram in Ebstein's Anomaly 221; Echocardiography of Ebstein's Anomaly 221; Management of Ebstein's Anomaly 222; Three-dimensional Transesophageal Echocardiographic (TEE) of Ebstein's Anomaly 223

10. Cardiac Masses Across Tricuspid and Pulmonary Valves **229**
Ramchandran Gopinath, Poonam Malhotra Kapoor, Suruchi Ladha

Tumors 230; Myxoma 230; Thrombus 234; Vegetations 235; Endocarditis 235; Abscesses 237; Bioprosthetic Valve Endocarditis 239

11. Miscellaneous Lesions Affecting Tricuspid and Pulmonary Valves **243**
Poonam Malhotra Kapoor, Kalpana Irpachi

Transesophageal Echocardiography in Carcinoid Disease Affecting the Heart 243; Other Inflammatory Valvulopathies 246; Tricuspid Valve Replacement 253; Ebstein's Anomaly and the Right Heart 258

SECTION III: MULTIPLE CHOICE QUESTIONS
Section editor: Rajiv Juneja

12. Multiple Choice Questions **263**
Poonam Malhotra Kapoor, BS Sethi

True and False Questions 277

Index *283*
