CONTENTS

1 Introduction 1

2 Phylogeny of the Facial Nerve 5

- ❑ Cranial Development in the First Land Animals 5
- ❑ Development of the Brain Case 6
- ❑ Jaw Suspension 10
- ❑ The Dermatocranium 10
- ❑ Anatomic Changes in the Early Tetrapods 12
- ❑ Ventilation and Locomotion 15
- ❑ Profound Changes in Morphology and Physiology 16
- ❑ The Modern Jaw 19
- ❑ Facial Expression 22

3 Embryology of the Facial Nerve 29

- ❑ Adult Anatomy 49
- ❑ Embryology of the Intracranial Portion of the Facial Nerve 56
- ❑ Fertilization through the Fourth Week 62
- ❑ Fifth through Sixth Week 66
- ❑ Seventh through Ninth Week 75
- ❑ Tenth through Fifteenth Week 83
- ❑ Sixteenth Week through Birth 93

4 Clinical Application 123

- ❑ Case 1 124
- ❑ Case 2 125
- ❑ Case 3 128
- ❑ Case 4 132

- Case 5 134
- Case 6 136
- Case 7 138
- Case 8 142
- Case 9 145
- Case 10 149
- Case 11 152

5 Isolated Anomalies of the Facial Nerve 155

- Dehiscence of the Facial Nerve 158
- Variations in Position of the Facial Nerve 159
- Discussion 164

6 Structural, Congenital, and Hereditary Abnormalities 169

- Syndromes Associated with Facial Nerve Abnormalities 170
