9789389587470 | Price- Rs. 1395 | Discount Cat: B

ABOUT THE BOOK

The book has been revised keeping in view the various new requirements. The large number of illustrations have been added to give clear and precise view of the disease. It will be more useful to radiologists and residents in their day-to-day practice and helpful to the clinicians in patient management.

KEY FEATURES

- The purpose is to discuss various lesions giving similar imaging findings and appearances on CT scan.
- Differential features have been dealt with in a clear, and concise way to make a diagnosis.
- Mostly lesions are shown with illustrations to make a visual impact of the CT findings.
- Causes and relevant features are being provided with the help of tables to give better and clear understanding.

READERSHIP

- The book will serve as an essential guide to practicing radiologists, physicians and surgeons in their day-to-day practice and also to postgraduate students in their examinations.
