ABOUT THE BOOK

The second edition of Dispensing Optics is a pragmatic resource, incorporating real life applications and situations, along with solutions to approaching them in practice.

KEY FEATURES

The revised features of the book include:

- Two newly added chapters: Non-adaptation to Spectacles and Pediatric Optical Dispensing
- Problem-solving multiple-choice questions for students, at the end of every chapter.
- Updation and elaboration of existing content.

This has been compiled with one universal objective in mind — busting the myth that Dispensing Optics, the subject, is a perplexing and dreaded one.
