Full Color | Hard Back | 3/e, 2022 | 660 Pages | 8.5" x 11"

9789354650574 | Rs. 6495 | Discount Cat: D

ABOUT THE BOOK

In the third edition of the book, The digital pathology, whole slide scanning, and artificial neural network are described in details in Chapter 19. Furthermore, there are several significant changes in different techniques, such as the polymerase chain reaction and next-generation sequencing, immunocytochemistry, and flow cytometry. In addition, the molecular pathology and immunocytochemistry of various tumors are highlighted in each chapter. Updated classification of the World Health Organization and International Academy of Cytologists in the urinary cytology, lung, breast, salivary gland, and lymph node have also been discussed.

KEY FEATURES

- The book describes the general cytology, exfoliative cytology, laboratory techniques, and fine-needle aspiration cytology.
- The main asset of the book is the demonstration of different cytological techniques in a video format.
- A simple, concise, illustrative book with a large number of tables, boxes, line arts, and microphotographs.
- The molecular pathology and immunocytochemistry of various tumors are described.
- All the updated classification of the WHO and International Academy of Cytologists are included.
- The digital pathology, whole-slide scanning and artificial neural network, polymerise chain reaction, and next-generation sequencing are described in detail.
- The significant addition of the book is the **introduction of different cytological techniques in a video format.**

READERSHIP

- This book is both a theoretical and practical resource for the trainees and the practicing cytopathologists.
