Preface *v*
Dedications and acknowledgements *xi*

Chapter 1 General principles
1.1 Fractures and dislocations 1
1.2 Consent 6

Chapter 2 Clinical essentials
2.1 Common symptoms and how to take a history 11
2.2 Clinical signs and examination 21
2.3 Investigations 37
2.4 Management 45

Chapter 3 Spine
3.1 Clinical scenario 55
3.2 Anatomy 56
3.3 Examination 63
3.4 Cauda equina syndrome 67
3.5 Spinal fractures 70
3.6 Spinal cord injury 78
3.7 Spinal metastases 80
3.8 Other conditions 83

Chapter 4 Shoulder
4.1 Clinical scenario 85
4.2 Anatomy 87
4.3 Examination 96
4.4 Clavicular fractures 97
4.5 Acromioclavicular joint injuries 102
4.6 Scapular fractures 104
4.7 Shoulder dislocations 106
4.8 Rotator cuff injuries 111
4.9 Proximal humeral fractures 114
4.10 Humeral shaft fractures 118
4.11 Brachial plexus injuries 121
4.12 Biceps tendon injuries 123

Chapter 5 Elbow
5.1 Clinical scenario 125
5.2 Anatomy 127
5.3 Examination 128
5.4 Elbow dislocation 131
5.5 Supracondylar fractures (distal humeral fractures) 134
5.6 Olecranon fractures 137
5.7 Capitellum fractures 139
5.8 Radial head and neck fractures 141
5.9 Other conditions 144

Chapter 6 Wrist and hand
6.1 Clinical scenario 147
6.2 Anatomy 148
6.3 Examination 151
6.4 Mid-shaft fractures of the forearm 153
6.5 Distal radius fractures 156
6.6 Distal radioulnar joint injuries 160
6.7 Scaphoid fractures 162
6.8 Lunate and perilunate dislocations 166
6.9 Metacarpal fractures 170
6.10 Phalangeal fractures 173
6.11 Base-of-thumb fractures 176
6.12 Tendon (flexor and extensor) injuries of the wrist and hand 178
6.13 Flexor tendon sheath infection 182
6.14 Nail bed injuries 183
6.15 Paronychia 185
6.16 Other carpal fractures 185

Chapter 7 Hip
7.1 Clinical scenario 187
7.2 Anatomy 188
7.3 Examination 190
7.4 Hip dislocation 193
7.5 Neck of femur fractures 197
7.6 Femoral shaft fractures 209
7.7 Periprosthetic hip fractures 212
7.8 Osteoarthritis 214

7.9 Paget's disease of bone 217
7.10 Other conditions 218

Chapter 8 Pelvis
8.1 Clinical scenario 221
8.2 Anatomy 222
8.3 Examination 225
8.4 Pelvic fractures 226
8.5 Acetabular fractures 232
8.6 Sacral fractures 236
8.7 Coccygeal fractures 238

Chapter 9 Knee
9.1 Clinical scenario 239
9.2 Anatomy 240
9.3 Examination 246
9.4 Patellar fractures 248
9.5 Patellar dislocation 252
9.6 Tibial plateau fractures 253
9.7 Tibial shaft fractures 257
9.8 Distal femoral fractures 259
9.9 Quadriceps and patellar tendon injuries 261
9.10 Soft tissue injuries 263
9.11 Osteoarthritis 265
9.12 Knee dislocation 267

Chapter 10 Foot and ankle
10.1 Clinical scenario 271
10.2 Anatomy 272
10.3 Examination 274
10.4 Ankle fractures 279
10.5 Pilon fractures 285
10.6 Ankle sprains 289
10.7 Talus fractures 291
10.8 Calcaneal fractures 294
10.9 Achilles tendon ruptures 297
10.10 Lisfranc (tarsometatarsal) injuries 300
10.11 Metatarsal fractures 303
10.12 Phalangeal fractures 308
10.13 Other conditions 310

Chapter 11 Paediatric orthopaedics
11.1 Clinical scenario 313
11.2 Examination 315
11.3 Growth plate fractures 315
11.4 Supracondylar humeral fractures 319
11.5 Condylar fractures 322
11.6 Radial head and neck fractures 327
11.7 Radial head subluxation 329
11.8 Hip problems: slipped upper femoral epiphysis 330
11.9 Hip problems: Perthes' disease 333
11.10 Hip problems: transient synovitis 334
11.11 Femoral shaft fractures 335
11.12 Tibial fractures 338
11.13 Non-accidental injuries 339
11.14 Osteogenesis imperfecta 341

Chapter 12 Orthopaedic trauma
12.1 Clinical scenario 343
12.2 Advanced Trauma Life Support 345
12.3 Open fractures 346
12.4 Compartment syndrome 349
12.5 Vascular injuries 352

Chapter 13 Orthopaedic infections and other soft tissue problems
13.1 Clinical scenario 355
13.2 Septic arthritis 356
13.3 Osteomyelitis 358
13.4 Gangrene 360
13.5 Necrotising fasciitis 362
13.6 Postoperative wound infections 363
13.7 Cellulitis 364
13.8 Abscesses 365
13.9 Foot ulcers 367
13.10 Foreign bodies 369
13.11 Bite injuries 371
13.12 Neuropathic arthropathy 372
