Contents

Section-One
GENERAL MICROBIOLOGY

1. Introduction and History *1*
2. General Properties of Bacteria *5*
3. Disinfection and Sterilization *13*
4. Antimicrobial Therapy *18*
5. Host-parasite Relationship *21*

Section-Two
IMMUNOLOGY

6. Overview of Immunology *26*
7. Anatomy and Biology of Immune System *30*
8. Antigen and Antibody *33*
9. Complement System *36*
10. Antigen-Antibody Reactions *39*
11. Hypersensitivity *44*
12. Immunodeficiency and Autoimmunity *47*

Section-Three
SYSTEMIC BACTERIOLOGY

13. Staphylococcus *49*
14. Streptococcus *52*
15. Neisseria *57*
16. Corynebacterium *60*
17. Clostridium *63*
18. Nonsporing Anaerobes and Bacillus *67*
19. Mycobacterium *70*
20. Haemophilus, Bordetella and Brucella *74*
21. Enterobacteriaceae *79*
22. Vibrios *88*
23. Pseudomonas *90*
24. Mycoplasma, Chlamydia and Rickettsia *92*
25. Spirochaetes *98*
26. Actinomyces *104*
27. Miscellaneous Bacteria *106*

Section-Four
VIROLOGY

28. General Properties of Viruses 109
29. DNA Viruses 116
30. RNA Viruses 123
31. Viral Hepatitis 132

Section-Five
MEDICAL MYCOLOGY

32. Medical Mycology 137

Section-Six
MEDICAL PARASITOLOGY

33. Parasitology 151

Section-Seven
CLINICAL MICROBIOLOGY

34. Laboratory Diagnosis 173

Section-Eight
PRACTICALS IN MICROBIOLOGY

35. Microscope and Microscopy 191

Section-Nine
ESSENTIAL MICROBIOLOGY

36. Normal Microbial Flora of the Human Body 194
37. Hospital Associated Infections 198
38. Microbiology of Water, Milk and Air 201
39. Immunoprophylaxis Against Infectious Diseases 206
40. Food Borne Diseases 210
41. Opportunistic Infections 213

Glossary 215
