Contents

Section 1: PROLOGUE

1. Introduction *3*

- **1.1 Numerical data**
- **1.2 Attitude towards statistics**
- **1.3 Role of statistics**
- **1.4 Data**
- **1.5 Universe and sample**
- **1.6 Accuracy**
- **1.7 Controls**
- **1.8 Study and learn from problems**
- **1.9 Glossary of the chapter**

Section 2 : BASICS OF STATISTICS

2. Data Collection *11*

- **2.1 Introduction**
- **2.2 Scales of measurement of data**
- **2.3 Reliability of data**
- **2.4 Validity of data**
- **2.5 Source of data**
  - **2.5.1 Routine**
    - **2.5.1.1 Census**
    - **2.5.1.2 Vital registration**
    - **2.5.1.3 Disease notification**
    - **2.5.1.4 Disease registry**
    - **2.5.1.5 Medical records**
    - **2.5.1.6 Hospital records**
    - **2.5.1.7 Environmental health data**
  - **2.5.2 Non Routine**
    - **2.5.2.1 Sample registration system**
    - **2.5.2.2 Disease surveillance**
    - **2.5.2.3 Manpower statistics**
    - **2.5.2.4 Surveys**
    - **2.5.2.5 Additional adhoc demographic data**
    - **2.5.2.6 Economic and fiscal data**
    - **2.5.2.7 Security schemes and social schemes**

2.6 Study and learn from problems
2.7 Glossary of the chapter

3. Data Tabulation *17*
3.1 Introduction
3.2 Master table
3.3 Frequency table
3.4 Mechanical tabulation
3.5 Types of table
3.5.1 Simple table
3.5.2 Cross-table
3.5.3 Table with multi variables
3.5.4 Tables prepared for statistical analysis
3.6 Other standards
3.7 Care at tabulation
3.8 What tabulation does
3.9 Study and learn from problems
3.10 Glossary of the chapter

4. Data Presentation *24*
4.1 Introduction
4.2 Use of graphical representation
4.3 Bar chart
4.4 Histogram
4.5 Frequency polygon
4.6 Cumulative frequency curve
4.7 Line diagram
4.8 Pie diagram
4.9 Pictogram
4.10 Scatter diagram
4.11 Map diagram
4.12 Study and learn from problems
4.13 Glossary of the chapter

***Section 3:* UNDERSTANDING OF STATISTICS**

5. Measures of Central Tendency *39*
5.1 Introduction
5.2 Mean
5.2.1 Arithmetic mean
5.2.2 Geometric mean
5.2.3 Hormonic mean

5.3 Median
5.4 Mode
5.5 Study and learn from problems
5.6 Glossary of the chapter

6. Measures of Variability ***53***
6.1 Introduction
6.2 Commonly used measures of dispersion
6.2.1 Range
6.2.2 Mean deviation
6.2.3 Standard deviation
6.2.3.1 Uses of variance and SD
6.2.3.2 Methods of calculating SD
6.2.3.2.1 Ungrouped data
6.2.3.2.2 Grouped data
6.2.4 Coefficient of variation
6.2.5 Quartile deviation
6.3 Study and learn from problems
6.4 Glossary of the chapter

7. Confidence Intervals ***74***
7.1 Introduction
7.2 Null hypothesis
7.3 True mean and confidence interval
7.4 Major principles of confidence interval
7.5 True proportion and confidence interval
7.6 True mean and confidence interval
7.7 Confidence interval on true proportion
7.8 Confidence interval for two independent means
7.9 Confidence interval on paired means
7.10 Special Note on confidence interval
7.11 Study and learn from problems
7.12 Glossary of the chapter

8. Normal Distributions ***89***
8.1 Introduction
8.2 Properties
8.3 Short table of Z
8.4 SE of proportion
8.5 Study and learn from problems
8.6 Glossary of the chapter

9. Decision Making Process ***95***
9.1 Introduction
9.2 Area in decision making

9.3 Type-II error
9.4 Type-I error
9.5 General procedure in decision
9.6 Study and learn from problems
9.7 Glossary of the chapter

Section 4: SPECIFIC STATISTICAL TECHNIQUES

10. Sampling Technique *103*
10.1 Introduction
10.2 Terminology
10.3 Criteria
10.4 Types of sampling
10.4.1 Simple random sampling
10.4.2 Stratified sampling
10.4.3 Systematic sampling
10.4.4 Multistage sampling
10.4.5 Cluster sampling
10.4.6 Area sampling
10.5 Nonprobability sampling
10.6 Applications
10.7 Errors in sampling
10.8 Study design
10.9 Study and learn from problems
10.10 Glossary of the chapter

11. Sample Size *110*
11.1 Introduction
11.2 Factors influencing sample size
11.3 Formulae used
11.3.1 When prevalence/proporotion rate known
11.3.2 To obtain the estimate of quantitative data
11.3.3 When control groups are possible
11.3.4 In sociological studies
11.4 Other ways of estimation
11.5 Table of error/accuracy to distance of standard error
11.6 Relation of confidence interval to accuracy
11.7 Study and learn from problems
11.8 Glossary of the chapter

12. Statistical Inference with Mean, Proportion and Normal Deviate *120*
12.1 Introduction
12.2 Standard error of the mean

12.3 Standard error of the proportion
12.4 Standard error of the difference between two means
12.5 Standard error of the difference between two proportions
12.6 Normal Deviate
12.7 Study and learn from problems
12.8 Glossary of the chapter

13. Probability—Binomial Distribution *129*
13.1 Probability
13.2 Application of binomial distribution
13.2.1 Risk factor evaluation
13.2.2 New treatment evaluation
13.3 Study and learn from problems
13.4 Glossary of the chapter

14. Poisson Distribution *142*
14.1 Introduction
14.2 Formula
14.3 Evaluation
14.4 Application of Poisson distribution
14.5 Short table of value of e^{-n}
14.6 Study and learn from problems
14.7 Glossary of the chapter

15. Chi-Square Test (X^2) *149*
15.1 Introduction
15.2 Idea of contingent table
15.3 How is expected number determined
15.4 Calculation of Chi-square
15.5 Zone of significance in Chi-square distribution
15.6 Chi-square with Yate's correction
15.7 Chi-square test for larger than 2 × 2 tables
15.8 Goodness of fit
15.9 Measure of the degree of association
15.10 Study and learn from problems
15.11 Glossary of the chapter

16. Student 't' test *162*
16.1 Introduction
16.2 General procedure
16.3 Common applications
16.4 Assumptions in 't' test
16.5 Formulae
16.5.1 To test the difference between sample mean and population mean
16.5.2 To test the differences between two samples

16.5.3 To test for paired observations
16.5.4 't' test for correlation coefficient
16.6 Short table of 't' values
16.7 Study and learn from problems
16.8 Glossary of the chapter

17. Analysis of Variance (ANOVA) *172*
17.1 Introduction
17.2 Steps in analysis
17.3 Short table of 'F' test
17.4 'F' distribution
17.5 Uses of 'F' test
17.6 Study and learn from problems
17.7 Glossary of the chapter

18. Pearson's Correlation *180*
18.1 Introduction
18.2 Assumption
18.3 The formula
18.3.1 Easy formula
18.3.2 A better one than easy formula
18.3.3 The best formula
18.4 Correlation (r) in the form of r^2
18.5 Study and learn from problems
18.6 Glossary of the chapter

19. Regression Coefficient *189*
19.1 Introduction
19.2 Regression coefficient
19.3 Formulae
19.3.1 Method one
19.3.2 Method two
19.3.3 Method three
19.4 Assumptions
19.5 Study and learn from problems
19.6 Glossary of the chapter

20. Spearman Rank Correlation (ρ) *200*
20.1 Introduction
20.2 Formula used
20.3 Significance of the test
20.4 Study and learn from problems
20.5 Glossary of the chapter

Section 5: PRESENT AREA OF INTEREST

21. Population Statistics *207*
- **21.1 Introduction**
- **21.2 Characteristics of population**
- **21.3 Sources of population statistics**
  - **21.3.1 Census**
  - **21.3.2 Registration of vital events**
  - **21.3.3 Surveys**
- **21.4 Supplementary material on population statistics**
  - **21.4.1 Common logarithms**
  - **21.4.2 Natural logarithms**
  - **21.4.3 Interpolation**
- **21.5 Evolution of population**
- **21.6 Population trend**
  - **21.6.1 World trend**
  - **21.6.2 India trend**
  - **21.6.3 Age pyramid**
- **21.7 Rates and ratios**
- **21.8 Accuracy and error in population statistics**
- **21.9 The life table**
- **21.10 Mortality study**
- **21.11 Fertility study**
- **21.12 Population growth**
  - **21.12.1 Natural increase method**
  - **21.12.2 Arithmetic progression method**
  - **21.12.3 Geometric progression method**
- **21.13 Migration or transit population statistics**
- **21.14 Working force of population (manpower)**
- **21.15 Morbidity study**
- **21.16 Study and learn from problems**
- **21.17 Glossary of the chapter**

22. Life Table *227*
- **22.1 Introduction**
- **22.2 Conventional notation**
- **22.3 Proportion of dying**
- **22.4 Life table column's relations**
- **22.5 Link between life table and population data**
- **22.6 Uses of life table**
- **22.7 Construction of a life table**
- **22.8 Study and learn from problems**
- **22.9 Glossary of the chapter**

23. Statistics in Multidimensional Approach to Problems *237*
- **23.1 Investigation of an epidemic**
- **23.2 PEM study**
- **23.3 Clinico-epidemiological study of tongue cancer**
- **23.4 Outbreak of epidemic jaundice in medical college campus**
- **23.5 Prospective study (cohort) for birth defects**
- **23.6 Prevalence of varicose vein**
- **23.7 Programme to detect symptomatic diabetes**
- **23.8 Ideal vaccine trial**
- **23.9 Influences on studies in anaesthesia**
  - **23.9.1 Benefit of $NaHCO_3$ in epidural anaesthesia**
  - **23.9.2 Chloroform as general anaesthesia**
  - **23.9.3 Block with intrathecal pethidine**
  - **23.9.4 Effect of pancuronium and vancuronium in intraocular pressure**
- **23.10 Epidemiological study on industrial accident**

24. Other Biostatistical Techniques *278*
- **24.1 Cluster analysis**
- **24.2 Snedecor's F ratio**
- **24.3 Logistic regression**
- **24.4 Meta analysis**
- **24.5 Multiple correlation**

***Section 6:* APPENDIX**

Appendix *297*

- **Square of numbers**
- **Square, square root, reciprocals**
- **5% (Roman Type) and 1% (Bold Face Type) points for the distribution of F**
- **Values of t**
- **The distribution of *t** (Two-Tailed Tests)**
- **Correlation coefficient at the 5% and 1% levels of significance**
- **Values of Chi-Square**
- **Probability of a greater value (X^2 Table)**
- **Area of normal curve with mean 0 and standard deviation 1 lying beyond a given relative deviate**
- **Z table cumulative normal frequency distribution (Area under the standard normal curve from 0 to Z)**
- **Two numbered random numbers**
- **Five numbered random numbers**

***Section 7:* YELLOW PAGES**

- **Commonly used formulae** *315*
- **Abbreviations** *327*

Index *331*
