Contents

Section 1: General Microbiology

1. Introduction to Microbiology 3
2. Microscopy 5
3. Anatomy and Physiology of Bacteria 11
4. Sterilisation and Disinfection 17
5. Culture Media 24
6. Culture Methods 60
7. Identification of Bacteria by Biochemical Methods 69
8. Stains Used in Microbiology 79
9. Direct Microscopic Examination and Staining Procedures 89
10. Antimicrobial Susceptibility Testing 96

Section 2: Immunology/Serology

11. Basics of Immunology 103
12. Introduction to Serology and Serodiagnostic Procedures 106
13. Laboratory Procedures in Serology 114

Section 3: Systematic Bacteriology

14. Staphylococci 139
15. Streptococcus 148
16. Pneumococcus 156
17. Neisseria and Branhamella 159
18. Corynebacterium Diphtheriae 165
19. Bacillus Anthracis 170
20. Clostridium Tetani 173
21. *Escherichia Coli* 177
22. Klebsiella 183
23. Proteus 185
24. Shigella 188
25. Salmonella 192
26. Vibrio 202
27. *Helicobacter Pylori* 208
28. *Pseudomonas Aeruginosa* 211
29. *Haemophilus Influenzae* 214
30. *Mycobacterium Tuberculosis* 219
31. *Mycobacterium Leprae* 227
32. Spirochaetes 231
33. Leptospira 237
34. Mycoplasma 240
35. Actinomycetes 243
36. Nocardia 245
37. Chlamydiae 247

Section 4: Virology

38. Viruses: General Properties and Classification 253
39. Cultivation of Viruses 256
40. Diagnostic Virology 261
41. Influenza and Respiratory Viruses 274
42. Neurological Disease due to Viruses 283
43. Enterovirus Infections 285
44. Viral Gastroenteritis 289
45. Arthropod Borne Viral Diseases 293
46. Herpes Viruses Diseases 296
47. Childhood Fever 303
48. Viral Hepatitis 307
49. Chronic Neurological Diseases due to Viruses 310
50. Warts 312
51. Retroviruses 313
52. Rabies, Non-arthropod Borne Haemorrhagic Fevers, Arenavirus Infections 316
53. Antiviral Therapy 319

Section 5: Parasitology

54. Intestinal Protozoa 325
55. Blood and Tissue Pathogens 338
56. Multicellular Parasites 354
57. Trematodes 362
58. Nematodes 369
59. Laboratory Procedures in Parasitology 377

Section 6: Mycology

60. Introduction, Classification and General Properties of Fungus 393
61. Laboratory Diagnosis of Fungal Infections 397
62. Laboratory Culture of Fungi 401
63. Diagnostic Mycology 405
64. Laboratory Diagnosis of Subcutaneous Mycosis 408
65. Laboratory Diagnosis of Systemic Mycosis 411
66. Rhizopus, Absidia and Mucor 419
67. Antifungal Chemotherapy 421
68. Mycotoxicosis 423
69. Summary of Procedures in Mycology 425

Section 7: Medical Entomology

70. Introduction to Medical Entomology 443

Section 8: Laboratory Investigation of Microbial Infections

71. Laboratory Investigation of Microbial Infections 451
