Contents

1. Introduction 1
2. Varieties of Data and Methods of Presentation 5
3. Methods of Sampling Population 8
4. Measures of Averages and Variability 15
5. Probability: Concepts and Utility 24
6. Frequency Distributions: Continuous and Discrete Variables 38
   - 6.1 Normal Distribution / Normal Curve 42
   - 6.2 Student's 't' Distribution 50
   - 6.3 'F' Distribution 54
   - 6.4 Binomial Distribution 56
   - 6.5 Poisson Distribution 57
   - 6.5 a Poisson Distribution: Examples 60
   - 6.6 Chi-square Distribution 62
7. Correlation and Regression 68
8. Quality of the Data and Measurement 77
9. Experimental Designs and Investigations 90
10. Inferential Procedures and Tests of Hypotheses 95
    - 10.1 Comparison of Two Means with Small Samples: 't' Test . 101
    - 10.2 Comparison of Two Means with Large Samples: Normal Test 106
    - 10.3 Comparison of Two Proportions with Large Samples: Normal Test 108
    - 10.4 Comparison of Sample Mean with a Known Value of Population Mean: t Test/ Z Test 110
    - 10.5 Comparison of Sample Proportion with Ideally Needed Values:t Test/Z Test 113
    - 10.6 Differentials of Variances Between Samples: 'F' Test 115
    - 10.7 Comparison of Several Proportions: Chi-square Test 118
11. Analysis of Variance and Covariance Procedures 122
    - 11.1 Analysis of Variance 122
    - 11.2 Analysis of Covariance 143
    - 11.3 Multiple-group Comparision: Test Procedures 153

12. Multivariate Analytical Procedures 164
13. Logistic Regression Procedures: Utility 169
14. Meta-analysis 175
15. Rank Correlation and Partial Correlations 179
15.1 Multiple Correlation Coefficient 186
16. Non-parametric Tests 189
17. Confidence Limits for Variance and Chi-square Test: Examples . 209
18. Vital Statistics and Morbidity 226
19. Life Table Methodology 239
20. Sources and Availability of Vital Statistics 250
21. Sample Size Needs and Determination 255
22. Research Methodology 268
23. Recollection of Concepts of Biostatistics in Brief 270
24. Examples and Exercises 273
25. Useful References 297
Appendices 298
I : Basic Mathematics 298
II : Statistical Tables 306
III : Glossary of Biostatistical Terms 323

Subject Index *349*

List of Figures

S.No	Figures	Fig. No	Page No
1.	Development of the faculties of Statistics/Biostatistics	1.1	3
2.	Curve of normal distribution of iron content of foods	6.1.1	48
3.	Distribution of sample means and raw data	6.1.2	49
4.	Chi-square distribution with degrees of freedom of 1 and 6	6.6.1	65
5.	Depictions of frequency distribution	6.6.2	66
6.	The six common probability distributions used in elementary statistical methods	6.6.3	67
7.	Shared variance of variables x and y (overlapping area)	7.1	74
8.	Scatter Diagrams: Varieties of possible relationships	7.2	75
9.	Quality control chart	8.1	79
10.	Quality control chart	8.2	81
11.	Distribution of calcium content of food to demonstrate accuracy and precision	8.4	86
12.	Error in surveys	8.5	87
13.	Two-tailed test procedure	10.1	99
14.	One tail test procedure	10.2	100
15.	Population of India (1991)	18.1	232
16.	Population of India (2001)	18.2	233
17.	Population of Sweden (2001)	18.3	233
18.	Population of China (2001)	18.4	233
19.	Population of United States of America (2001)	18.5	234
20.	Population of pyramids of China and India (Projections) for years 2000 and 2050	18.6	234
21.	Changes in population by sex over time in India (1971-2016)	18.7	235
