Contents

1. Antimicrobial Choice for Disease Conditions

Central Nervous System *1*

Ophthalmic Infections *11*

Ear, Nose, and Throat Infections *19*

Cardiovascular Infections *31*

Respiratory Infections *39*

Gastrointestinal Infections *53*

Urogenital Infections *71*

Skin and Soft Tissue Infections *88*

Systemic Febrile Illnesses *110*

2. Basic Pharmacotherapeutics

Adult Dosing of Common Antibacterials *115*
Pediatric Dosing of Common Antibacterials *117*
Dosing of Antimicrobials in Renal Failure *119*
Antibiotic Spectrum *122*
Drug-Drug Interactions *124*
Common Antibiotic Side Effects *126*
Organisms and Disease State Relationship *127*

3. Antimicrobials for Specific Pathogen

TB

Tuberculosis 129
- Tuberculosis: Case Definitions 129
- Features of Pulmonary Tuberculosis 130
- Features of Extrapulmonary Tuberculosis: Common Causes 131
- Features of Extrapulmonary Tuberculosis: Less Common Causes 135
- Drugs for Tuberculosis 138
- First Line Drugs, Modes of Action and Recommended Doses 140
- Principles for Management of Tuberculosis 141
- General Treatment of Tuberculosis 143
- Alternate Treatment Regimens 145
- Treatment Regimens in Special Situations 146
- Duration of Treatment for Tuberculosis 148
- Management of Drug Toxicity 149
- Management of Hepatitis 150
- Management of Cutaneous Reactions 151
- Management of Drug Resistant Tuberculosis 152
- The WHO Recommendations 154
- Treatment and Follow-up of Smear-positive cases 157
- Treatment and Follow-up of Smear-negative cases 158
- Diagnostic Algorithm for Pediatric Pulmonary TB 159
- Treatment Card for Tuberculosis (RNTCP) 160

Malaria 162
- General Guidelines in the Treatment of Malaria 162
- Treatment for Malaria 164

Antimalarial Drugs in Pregnancy 168
Drugs for Management of Malaria 169
Treatment of Malaria in Children 170
Artemisinin based Combined Therapy (ACsT) for Treatment of
Multi-drug Resistant *Falciparum* malaria and mixed infectious including falciparum 174
Management of Complications of Malaria 176

HIV

Recognizing HIV Infection in Adults 177
HIV Testing Methods with Advantages, Disadvantages and Interpretation 178
Presumptive and Definitive Criteria for Recognizing HIV related Clinical Events 179
Principles of Antiretroviral Therapy 187
Antiretroviral Drugs 188
When to Start Antiretroviral Therapy 201
Monitoring and Management of Adverse Effects 204
Common Drug-drug Interactions with ARVs 208
Current Guidelines for Resistance Testing 209
Follow up of Patients on HAART 209
Syndromic Approach to Management of Infections Associated with HIV/AIDS 212
Use of Antiretrovirals in Perinatal Care 221
Treatment Regimes for Prevention of Mother to Child Transmission of HIV 222
Initiation of ART in Patients with TB, Cryptococcal Meningitis and Syphilis 224
When to Suspect HIV among Patients with Tuberculosis 227
Tuberculosis and HIV Antiretroviral Treatment 228
Basic and Expanded Regimens for PEP 229
CDC Guidelines for Evaluating the Risk of HIV Transmission following
Occupational Exposure 230

Viral

Management of Viral Infections
Antiviral Therapy 239
Antiviral Agents 248

Fungal

Management of Fungal Infections 250
Antifungal Agents 259

Parasitic

Management of Parasitic Infections 261
Antiparasitic Agents 272

4. Antimicrobial Prophylaxis and Immunizations
Prophylaxis for Medical Conditions 277
Prophylaxis for Prevention of Endocarditis 284
Childhood Immunization Schedule 288
Rabies Vaccination 292
Prophylaxis in Surgical Patients 294

5. Algorithmic Tables: Antimicrobial Choice Based on Syndrome
Acute Diarrhea 303
Fever: Community Acquired 304
Fever: Hospital Acquired 305
Jaundice 306
Febrile Neutropenia 309

Meningitis ***310***
Pneumonia ***311***
Sexually Transmitted Diseases ***315***
Surgical Site Infection ***316***
Urinary Tract Infection ***317***
Management of Severe Malaria ***318***

6. Basic Microbiology

Gram Stain, AFB Smear, Malaria Smear ***319***

7. Antimicrobial Name: Generic and Trade

Drug Listing by Brand Name ***323***

8. *Index* ***339***
