Contents

Section-1: General Anatomy and Physiology

1. Introduction to Human Anatomy and Physiology 3–16
2. Cell, Cell Cycle and Cell Division 17–26
3. Tissues 27–42
4. Histological Techniques 43–46

Section-2: Organisation of Body

5. Organisation of Body 49–98

Section-3: Systemic Anatomy and Physiology

6. Skeletal System 101–156
7. Muscular System 157–202
8. Anatomical and Functional Organization of Nervous System 203–244
9. Peripheral Nervous System 245–290
10. Somatosensory, Somatomotor and Autonomic Nervous System 291–320
11. Special Senses 321–350
12. Respiratory System 351–392
13. Cardiovascular System 393–452
14. Blood and its Components 453–462
15. Lymphatic System 463–480
16. Digestive System 481–530
17. Urinary System 531–550
18. Endocrine System 551–570
19. Reproductive System 571–600
20. Skin 601–606

Section-4: Genetics

21. Genetics 609–618

Section-5: Basis of Radiological Anatomy and Clinical Examination

22. Basics of Radiological Anatomy 621–628
23. Anatomical Basis of Clinical Examination 629–640
Appendix 641–641
Index 643–655
