Contents

1. Mast Cells and Innate Immunity 1
Matthew J Hamilton, Richard L Stevens

2. An evolving View on the (Patho)physiology of Immunoglobulin E 20
Nicolas Charles, Juan Rivera

3. B-Cells and Allergy 36
Elke O Luger, Andreas Radbruch, Margitta Worm

4. Dendritic and T Cells 43
Carsten Schmidt-Weber

5. Eosinophils 48
Hirohito Kita

6. Human Basophils: Biological Properties and Role in Allergic Eye Diseases 77
Giorgio Giannattasio, Giuseppe Spadaro, Giancarlo Marone Arturo Genovese, Gianni Marone

7. Role of Environment in Allergy 95
Wolfgang Schober, Heidrun Behrendt

8. Reprogramming Immune Inflammation and Airway Hyperreactivity 107
Joan Stein-Streilein, Jie Zhang-Hoover

9. Epidemiology of Ocular Allergies 115
Matthias Möhrenschlager, Johannes Ring

10. Allergy and Skin 129
Florian Woelbing, Tilo Biedermann

11. Mast Cell-driven Skin Responses beyond Type I Allergic Reactions 143
Frank Siebenhaar, Martin Metz, Marcus Maurer

12. Allergic Diseases of the Eye: Pathophysiology 153
Bita Manzouri, Santa Jeremy Ono

13. Type I Reaction in the Eye 167
Andrea Leonardi, Chiara De Dominicis, Laura Motterle

14. Ocular Allergy: New Terminology and Differential Diagnosis 178
Christoph Deuter, Deshka Doycheva, Manfred Zierhut

15. Atopy as a Risk Factor for Corneal Allograft Rejection ... 184
Jerry Y Niederkorn

16. Antihistamines 192
Andrea Leonardi, Velika Deligianni, Antonio Manfre

17. Mast Cell Stabilizing Medications 202
Neal P Barney, Ellen B Cook, James Stahl, Frank M Graziano

18. Systemic Immune Therapy: The Modern Concept based on more than Hundred Years of Experience and Research 212
Jörg Fischer, Tilo Biedermann

19. Immunomodulation in Allergic Diseases: When Anti-inflammatory Agents Play Immunomodulation 220
Sara Lattanzi, Francesca Mori, Anna Hellquist, Vincenzo Casolaro
