CONTENTS

1 INTRODUCTION 1

Surface Marking of the Heart 4
Anatomy of the Heart 6
Chambers of the heart 7
Structure of the heart 10
Arterial supply of the heart 10

2 CONDUCTION SYSTEM OF THE HEART 13

The Cardiac Cycle 13
Cardiac Output 15
Factors affecting cardiac output 16
Arterial Blood Pressure 16
Normal values 17
Physiological variations 17
Heart sounds 19
Heart Sounds 20
Coronary Circulation 21
Coronary blood flow and its measurement 21
Factors regulating coronary blood flow 22
Blood Investigations 24
Normal values of blood tests to detect Myocardial infarction 24
Lab studies 24
Imaging studies 25
Other tests 26
Procedures 27

3 ATHEROSCLEROSIS 29

Clinical presentations 30

4 Ischemic Heart Disease 31

Angina Pectoris 31
Types 31
Management 32

5 Myocardial Infarction 35

Definition 35
Prevalence 35
Pathophysiology 35
Other risk factors 38
Signs and Symptoms 38
Symptoms 38
Signs 38
Background 39
Sex 39
Age 39
Clinical history 40
Physical examination 40
Causes 41
Differential Diagnosis 42
Atherosclerosis 43

6 Coronary Heart Disease 49

Introduction 49
Epidemiology 50
Distribution of the disease 50
Determinants of the disease 50
Common presentations of coronary heart disease 53
Clinical Features 54
In angina pectoris 54
In acute myocardial infarction 55
Diagnostic procedures (investigations) 56
Laboratory investigations 56
Electrocardiography 57
Exercise stress testing 58

Continuous ambulatory electrocardiography 60
Tilt table testing 61
Radiologic procedures 62
Computed Tomography 63
Computed tomography angiography 63
Fluoroscopy 64
Magnetic resonance imaging 66
Magnetic resonance angiography 67
Radionuclide imaging 67
Positron emission tomography 69
Cardiac catheterization and coronary angiography 70
Cardiac catheterization 71
Prevention of angina pectoris and ischemic heart disease 72
Primary prevention 72
Primordial prevention 73
Primary Prevention 73
Secondary prevention (early diagnosis and treatment) 78
Surgical Therapy 81
Treatment during the attack of MI 82
Diet for Heart Patients 82
Management of Myocardial Infarction 84
General management 84
Control of chest pain 85
Management of Heart Attacks in the Hospital in CCU 86
Drug category 86
Nitroglycerine dosing schedule in myocardial infarction 87
Platelet aggregation inhibitors 88
Long-term Medical Management/Post MI Management 88
Surgical Procedures 90
Balloon angioplasty (percutaneous transluminal coronary angioplasty) 90

Revascularization procedures for opening blocked arteries 92
Candidates for emergency angioplasty 92
Angioplasty and coronary stents 93
Stem Cell Management 95
Complications of MI and Management 95
Prevention of Second Heart Attack 96
Heart Attacks in Women 97
Risk of heart attacks in women 97
Cholesterol treatment guidelines in women 98
Diagnosis of heart attacks in women 98
Treatment of heart attacks in women 99
Estrogen and coronary heart disease in women 99
Medical/ Legal Pitfalls 100
Prognosis 101

7 STROKE 102-107

Cerebral Thrombosis 102
Cerebral Hemorrhage 104
Second common cause of stroke is cerebral hemorrhage 104
In Order of Frequency the Common Sites of Hemorrhage are 104
Clinical Features of Cerebral Hemorrhage are 104
Cerebral Embolism 105
The third important cause of the stroke is cerebral embolism 105
Causes of cerebral embolism are mainly divided into 106
Prevention and Control 106
Primary prevention 106
Prevention of Atherosclerosis 107

8 HYPERLIPIDEMIA 108-122

Econdary Prevention 110
General medical management in acute phase 110
Tertiary Prevention 113
General Management Strategies for the Patient with Dyslipidemia 113

9 HYPERTENSION 123-134

Essential hypertension 125
Risk factors (or precipitating factors) of hypertension are 125
Non-renal causes of hypertension (secondary hypertension) contribute 5% of cases 126
Clinical manifestation 127
Usually the patients attend to the doctor in 3 ways 128
Prevention and Control 129
Drug therapy 131
Diuretics 131
Beta-blockers 132
ACE inhibitors 132
Calcium channel blockers 132
Some useful multiple drug regimens 133

10 LOW BLOOD PRESSURE 135-148

Causes 137
Symptoms 138
Orthostatic Hypotension 139
Causes 139
Symptoms and diagnosis 141
Treatment 141
Fainting 142
Causes 142

Symptoms 145
Diagnosis 146
Treatment 148

11 Congenital Heart Diseases 149-153

Classification of Congenital
Heart Diseases 149
Acyanotic with (left to right) shunt 149
Acyanotic without a shunt 149
Cyanotic with (right to left) shunt 150
Congenital heart diseases with
order of prevalence 150
Epidemiology 150
Prevention 152

12 Obesity and Heart Disease 154-165

Measurement of obesity 154
Other classification are 155
Average and range of
desirable body weight per height 156
Health consequences of obesity are 156
Epidemiology 157
Assessment of obesity 158
Medical evolution of the obese patients 159
Prevention and Control 160
Primary prevention (health promotion and
specific protection) 160
Secondary prevention 162
Five principles for healthy living 163
Tips to healthy living 163
Alcohol 164
Lifestyle measures for control of
hypertension 164
Stress can cause reduced ability to
cope, mental illness or physical illness 165

Index 167
