# Contents

**1. Equipment and Culture Media ..... 1**

*RK Sharma*

- Equipment 2

  *Incubators 2; Benchtop Incubators 3; Laminar Flow 4; Clean Benches 5; Culture Lab Air Cleaner (Coda Air Filtration System) 5; In Vitro Fertilization (IVF) Workstation 6; Microscopes 6; Micromanipulation 6; Ovum Aspiration Pump 7; Controlled Rate Freezing System/Cryosystems 7; General Equipment 7; Labware and Disposables 8; Ovum Pickup Needles 9; Embryo Transfer Catheter 9; Oocyte Preparation Pipettes 9; Denudation Pipettes 9; Holding Pipettes 9; Injection Pipette 10*

- Culture Media for IVF 10

  *Composition 11; pH and Osmolality 11; Temperature 11; Culture Conditions 12; Water 12; Protein Source 12; Chelators 13; HTF Hepes 13; Enhance HTF 13; Enhance Day 1 13; Enhance Day 3 13; Enhance Day 5 14; Human Serum Albumin (HSA) 14; Mineral Oil 14; Polyvinyl Pyrrolidone (PVP) 14; Hyaluronidase 14*

**2. Computer-assisted Semen Analysis (CASA) ..... 15**

*Shubhangi Gangal*

**3. Semen Analysis ..... 19**

*Kuldeep Jain*

- Introduction 19

  *Terminology 20; Background Data 20; Physical Parameters 21; Microscopic Examination 22*

**4. Sperm Morphology ..... 25**

*Savita Nagpal*

- The WHO Criteria (1987) 25
- The WHO Criteria (1992) 25
- The Strict Criteria 26

  *Clinical Relevance of Strict Criteria 27; Papanicolaou Stained Smear 28*

**5. Semen Preparation: Ejaculated Sperm for ICSI ..... 31**

*Sandro C Esteves*

- Materials, Equipment and Reagents 31

  *Material and Equipment 31; Reagents 32*

- Procedures 32

  *Double-density Gradient Centrifugation 32; Swim-up 33*

**6. Semen Preparation: Sperm Extraction for ICSI ..... 37**

*Sandro C Esteves*

- Materials, Equipment, Reagents and *in vitro* Fertilization (IVF) Laboratory Set-up 37

  *Material and Equipment 37; Reagents 38; Laboratory Set-up 38*

- PESA/MESA Sperm Processing 38
- PESA-MESA-TESA-TESE Sperm Processing 39
- TESA Sperm Processing 41
- TESE Sperm Processing 41

- Cryo-thawed Epididymal/Testicular Sperm Processing 44
- Methods for Selecting Viable Immotile Sperm for ICSI 44
  *Hypo-osmotic Swelling Test (HOST) 44; Sperm Tail Flexibility Test (STFT) 44; Motility Stimulant Sperm Challenge (MSC) 45; Preparation of Microdroplets 45*
- Appendix 45
- Glossary 46

**7. Semen Preparation: Infected Sample (HIV) ..... 48**

*Ved Prakash*

- Risk of Transmission 49
- Laboratory Aspects 49
- Screening for Seropositive Male Partners 50
- Sperm Separation Technique 50
- Semen Preparation from Infected Sample 51
  *Double Density Gradient Centrifugation with Swim-up 51*
- Equipment and Disposables 51
- Medium for Sperm Preparation 52
- Procedure 52

**8. Oxidative Stress Tests ..... 54**

*Ashok Agarwal*

- Introduction 54
  *What are Free Radicals? 54; Types of Free Radicals 54; Generation of Free Radicals in the Seminal Ejaculate 55; What is Oxidative Stress? 55; Measurement of Free Radicals 55; Luminometers 56; Chemiluminescence Measurement 57; Reference Values for Abnormal ROS 60; Probes for Extracellular and Intracellular ROS Measurement 61*

**9. TUNEL Test ..... 64**

*Ashok Agarwal*

- Assay Principle 64
- Specimen Collection 64
- Staining Protocol 65
- Staining Solution (Single Assay) 65
  *Negative Control 65; Positive Control 66*
- Flow Cytometry 66
- Factors Affecting the Assay Results 66
- Reference Range of Sperm DNA Damage 67

**10. Reactive Oxygen Species Measurement ..... 68**

*Rima Dada*

- Methodology 68
  *Sample Collection 68; Sample Analysis 69; Instrument Setup 69; Preparation of Tubes 69; ROS Estimation 69; Data Analysis 70; Calculation of ROS 70; Materials Required 70; Chemicals Required 71*
- Preparation of Reagents and Solutions 71

**11. Assessment of DNA Fragmentation (Halo Test) ..... 72**

*Ved Prakash*

- Assessment of DNA Fragmentation (Halo Test) 72
- Lab Protocol 73
  *Principle of the Method 73; Material and Equipment 73*

- Sperm Sample 74
  *Procedure 74*
- Sperm Classification 75
  *Sperm without Fragmented DNA 75; Sperm with Fragmented DNA 75; Sperm Chromatin Dispersion Patterns Observed after Staining 76*
- Interpreting the Results 76
- Safety and the Environment 77
- Precautions 77

**12. Sperm Function Tests ..... 78**
*MM Misro*
- Hypo-Osmotic Swelling (HOS) Test (Patent Filed) 78
  *Protocol 78*
- Nuclear Chromatin Decondensation Test (Patent Filed) 79
  *Protocol 79*
- Acrosome status and function (Patent Filed) 79
  *Protocol 80*

**13. Micromanipulator Set-up and ICSI ..... 81**
*Alex C Verghese*
- Microinjection 81
- Intracytoplasmic Sperm Injection (ICSI)—Procedure and Equipment 81
  *Materials and Methods 81; Microinjection Dish Preparation 82; Preparation of the Microinjection Capillaries 82; Procedure of Microinjection 82; Assessment of Fertilization 83*
- Intracytoplasmic Morphologically Selected Sperm Injection (IMSI) 83
- Petri Dish ICSI (PICSI) 83

**14. IMSI and PICSI Sperm Selection ..... 85**
*Juan G Alvarez*
- IMSI Protocol 85
- PICSI Protocol 86

**15. Oocyte Spindle Imaging System ..... 87**
*Juan G Alvarez*

**16. Semen Cryopreservation and Banking ..... 90**
*Pankaj Talwar*
- Indications of Semen Cryopreservation 90
- Outline of Cryoprotectants 90
- Essentials of Freeze-thaw Cycle 92
- Legislation Pertaining to the Semen Banking 96
- Donor Screening Prior to Semen Banking 96
- Crossinfection in the Semen Banks 97
- Security of the Semen Bank 97

**17. Semen Vitrification ..... 99**
*Juan G Alvarez*

*Index ..... 101*
