CONTENTS

Unit 1: Biochemistry

Part I: Organic 2

- Glucose 2
- Glucose Tolerance Test 4
- Urea 5
- Creatinine 7
- Bilirubin 9
- Cholesterol 12
- Low-density Lipoprotein Cholesterol (LDL) 15
- High-density Lipoprotein – Cholesterol (HDL) 15
- Triacylglycerols (Triglycerides) 18
- Total Proteins 20
- Albumin 22
- Ceruloplasmin 25
- Cerebrospinal Fluid (CSF) Proteins 27
- Uric Acid 28
- Homocysteine 30
- Lactate 34
- Pyruvate 36
- Thiobarbituric Acid Reactive Substances (TBARS) 37
- Glutathione 39
- Sodium, Potassium and Chloride 41
- Calcium 44
- Phosphorus 46
- Iron and Iron-binding Capacity(IBC) 48
- Vitamin A 51
- Vitamin E 53
- Vitamin C 54

Part II: Enzymes 58

- Aspartate Transaminase (AST) Serum Glutamic-Oxaloacetic Transaminase (SGOT) 58
- Alanine Aminotransferase (ALT)/Serum Glutamic-Pyruvic Transaminase (SGPT) 60
- Alkaline Phosphatase (Bone Forming Enzyme) 63
- Acid Phosphatase 65
- Acid Phosphatase (Tartrate-Labile) for Prostatic Cancer 67
- Angiotensin Converting Enzyme (ACE) 68
- Lactate Dehydrogenase (LDH) 70
- Glucose-6-Phosphate-Dehydrogenase 73
- Amylase 75
- Ornithine Aminotransferase (OAT) 77

- Glutathione Peroxidase (GPx) 79
- Superoxide Dismutase (SOD) 82

Part III: Electrophoresis 85

- Electrophoresis of Serum Proteins 85
- Electrophoresis of Serum Lipoproteins 86

Part IV: Chromatography 89

- Sugars 89
- Amino Acids 91
- 2D Chromatography 92
- HPLC Analysis of Amino Acids 95

Part V: Inborn Errors of Metabolism 99

- Carbohydrates 99
- Glucose and Other Reducing Sugars 100
- Maple Syrup Urine Disease 101
- Cystine 102
- Tyrosine 103
- Homocystinuria 104
- Phenylketonuria 105

Part VI: Collection of Test Sample 106

- Procedure for Blood Collection 106
- Collection of Urine Sample 106
- Collection of Stool Sample 107
- Fully Automated Chemistry Analyzers 108
- Disposal of Materials 110
- Quality Control 111

Unit 2: Genetics

- Introduction 114
- Cytogenetic Methods 116
- DNA Based Methods 138
- Quantification of Gene Expression 162
- Sterilization Procedures 164

Unit 3: Hematology and Clinical Pathology

Part I: Hematology 170

- Complete Blood Count 170
- Total Erythrocyte (RBC) Count 173
- Total WBC Count 176
- Differential Count 178
- Peripheral Smear Study 182
- Erythrocyte Sedimentation Rate 186
- Platelet Count 188
- Absolute Eosinophil Count 190

- Reticulocyte Count 193
- Red Blood Cell Indices 195
- Packed Cell Volume 196
- Hemoglobin Estimation (Cyanmethemoglobin Method) 197
- Hemoglobin Electrophoresis 199
- Blood Grouping and Rh Typing 201
- Direct and Indirect Coombs' Test 206
- Activated Partial Thromboplastin Time 208
- Prothrombin Time 211
- Bleeding Time (Ivy Method) 213
- Clotting Time 215
- Clot Retraction 217
- Fibrinogen Assay (Clot Weight Method) 218
- Euglobulin Lysis Time Test 220
- Factor XIII Assay 222
- Examination of Malarial Parasite 223
- Examination of Microfilaria 227
- LE Cell Preparation 229
- Sickle Cell Preparation 231

Part II: Clinical Pathology 233

- Stool Examination 233
- Detection of Occult Blood in Stool 236
- Urine Examination—Complete Automated Method 238
- Qualitative Identification of Reducing Sugar in Urine by Benedict's Test 245
- Qualitative Identification of Protein in Urine by Heat and Acetic Acid Method 247
- Qualitative Identification of Ketone Bodies in Urine 249
- Qualitative Detection of Bile Pigments by Fouchet's Method 251
- Qualitative Detection of Bile Salts by Hay's Test 252
- Qualitative Identification of Urobilinogen in Urine by Ehrlich Aldehyde Test 254
- Qualitative Detection of Free Hemoglobin by Benzidine Test 256
- Detection of Bence Jones Protein (BJP) 257
- Analysis of CSF 259
- Mantoux Test 263
- Microscopic Examination of Urine 264

Unit 4: Microbiology & Serology

Part I: Staining Techniques 268

- Gram Stain 268
- KOH-Calcofluor White Stain 271
- Ziehl-Neelsen Stain 273
- Concentration Method for Detection of Mycobacterium 274
- Modified Ziehl-Neelsen Stain 277

- Giemsa Stain 279
- Nigrosin Stain 281
- Lactophenol Cotton Blue Stain 283
- Hanging Drop Method for Motility 284
- Immunofluorescence Staining—*Chlamydia trachomatis* 286
- Immunofluorescence Staining—For Viruses (HSV, CMV, VZV, Adenovirus) 289

Part II: Culture Methods 291

- Bacterial and Fungal Culture—Conjunctival Swab Semi-quantitative Method 291
- Bacterial and Fungal Culture—Conjunctival Scraping 294
- Bacterial and Fungal Culture—Lid Margin Swab 297
- Bacterial and Fungal Culture—Corneal Scraping 299
- Bacterial and Fungal Culture—Intraocular Specimens 302
- Bacterial and Fungal Culture—Other Specimens 305
- Conventional Biochemical Tests for Identification of Bacterial Isolates 308
- Antibiotic Sensitivity 318
- Acid Fast Bacilli (AFB) Culture 320
- Fungal Culture 323
- Bacterial and Fungal Culture Blood Culture and Sensitivity 324
- Processing of Cerebrospinal Fluid for Bacterial and Fungal Culture 326
- Bacterial Culture—Urine 329
- Bacterial and Fungal Culture—Throat Swab 331
- Maintenance of Cell Cultures 334
- Acanthamoeba Culture 335
- *Chlamydia trachomatis* Culture by Rapid Shell Vial Technique 337
- Virus Isolation by Conventional Tube Culture Method 339

Part III: Immunology 341

- Rheumatoid Arthritis Test 341
- C-Reactive Protein 343
- Serum Antistreptolysin 'O' (ASO) Titer 347
- Serum Rapid Plasma Reagin (RPR) Test 350
- Treponema Pallidum Hemagglutination (TPHA) 353
- Widal Test 357
- Brucella Agglutination Test 360
- Qualitative Determination of HIV1/2 Antibody 363
- Rapid Detection of Hepatitis B Surface Antigen (HBs Ag) 367
- Elisa Test for the Detection of Antibodies to HIV-1 and HIV-2 368
- Western Blotting Technique—Confirmation Test for Detection of HIV–1/2 Antibodies 372
- Fluorescent Antinuclear Antibody Test (FANA) 376

Unit 5. Ophthalmic Histopathology

- Specimens Entry 380
- Fixation of Specimens 381
- Grossing Technique 383

- Decalcification 387
- Tissue Processing 389
- Embedding 392
- Paraffin Section Cutting 394
- Frozen Section 397
- Staining Techniques 400
- Immunohistochemistry 421
- Cytology Study 424
- Storing Process 426

Index *429*
