CONTENTS

1. Paediatric History and Examination 1
Krishna M Goel, Robert Carachi

The history 1
Clinical manifestations of disease 1
History and documentation 2
Introduction 4
History of present complaint 4
Past medical history 5
Mother's pregnancy, labour, delivery and the neonatal period 5
Dietary history 5
Developmental history 5
Family and social history 5
Physical examination 6
A guide to examination of a child-patient 12
Respiratory system 13
Cardiovascular system 14
Percussion of the heart is not normally undertaken in children 14
Gastrointestinal system 14
Nervous system 14
Cranial nerve 14
Locomotor system 15
Developmental assessment 15

2. Growth and Development 18
Louis Low

Normal growth 18
Assessment and monitoring of growth 19
The growth hormone: IGF 1 axis 21
Genetics of stature 21
Puberty 21
Child development 23
Gross motor development 23
Fine motor development in early childhood 24
Language and speech development in childhood 24
Social development 25
Emotional and cognitive development 26
Development assessment 26

3. Neonatal Paediatrics 28
Samuel E Ibhanesebhor, Chikkanayakanahali Manjunatha, Syed Rehan Ali, Zulfiqar Ahmed Bhutta

Introduction 28
Neonatal resuscitation 28
Hypoxic ischaemic encephalopathy 30
Whole baby hypothermia 31
Routine newborn examination 32
Perinatal injuries 33
Meconium aspiration syndrome 34
Transient tachypnoea of the newborn (or 'wet lung') 34
Cyanotic congenital heart disease 34
Neonatal jaundice 35
Intrauterine growth restriction or retardation 37
Preterm 37
Chromosomal abnormalities 41
Haematology 42
Inborn errors of metabolism 43
Multiple gestation 46
Maternal substance and alcohol abuse 47
Neonatal sepsis 47
Neonatal procedures 48
Vaccination and weaning 48
Nutrition 48
Discharge planning 50
Withholding and withdrawal of treatment 50
- **Newborn health in developing countries** 50

Introduction 50
Birth asphyxia 51
Neonatal infections 52
Term IUGR/LBW 55
Congenital malformations and inherited disorders 56
Prematurity 57
Respiratory distress syndrome 57

4. Paediatric Genetics 59
Margo L Whiteford

Introduction 59
History 59
Patterns of inheritance 60
Investigations 63

5. Nutrition 75
Tahmeed Ahmed, Zulfiqar Ahmed Bhutta, Krishna M Goel

- **Protein-energy malnutrition and micronutrient deficiencies in childhood 75**

Protein-energy malnutrition 75
Causes of PEM 75
Classification of PEM 75
Management of mild or moderate malnutrition 77
Facility-based management of severe acute malnutrition 77
Phases of management of severe acute malnutrition 78
Treatment of complications 81
Community-based management of severe acute malnutrition 83

- **Other disturbances of nutrition 83**

Vitamin D deficiency 89
Vitamin D metabolism 89
Vitamin C (ascorbic acid) deficiency 92
Vitamin B deficiencies 93
Vitamin E (tocopherol) deficiency 97
Vitamin K deficiency 97
Biotin and pantothenic acid 97

6. Respiratory Disorders 100
Anne Margaret Devenny

Introduction 100
History and examination 100
Respiratory investigations 100
Examination 101
The respiratory tract in children 102
Other congenital lung abnormalities 104
Acquired abnormalities 105
Acquired lower respiratory tract problems 105
Aspiration pneumonia 108
Asthma 108
Bronchiectasis 112
Cystic fibrosis 112
Pulmonary tuberculosis 116
Bronchiolitis obliterans 116
Pneumothorax 116
Sleep disordered breathing in children 117
Obstructive sleep apnoea 117
Neuromuscular causes of sleep disordered breathing 118
Sudden infant death syndrome 118
Chest injury 118
Foreign body inhalation 118
Questions and answers 119

7. Gastroenterology and Hepatology 121
Krishna M Goel, Robert Carachi, Zulfiqar Ahmed Bhutta

- **Gastrointestinal and Liver Disease**

Introduction 121
Gastro-oesophageal reflux disease (GORD) 121
Gastrointestinal haemorrhage 122
Oesophageal varices 123
Peptic ulcer 123
Blood per rectum 124
Rectal prolapse 124
Intestinal polyps 125
Infantile colic 125
Recurrent abdominal pain in children 125
Appendicitis 125
Foreign bodies 128
Necrotising enterocolitis 129
Toddler's diarrhoea 130
Infectious diarrhoea in childhood 130
Fermentative diarrhoea (disaccharide intolerance) 130
Parasitic intestinal infection 131
Nematodes 131
Cestodes 133
Inflammatory bowel disease 134
Coeliac disease (gluten-sensitive enteropathy) 137
Cystic fibrosis 139
Idiopathic childhood constipation 141
Protein-losing enteropathy 143
Wilson's disease (hepatolenticular degeneration) 144
Jaundice 145
Viral infections of the liver 145
Cirrhosis of the liver 147
Pancreas 148
Juvenile tropical pancreatitis 148
Liver transplantation 148

- **Infectious diarrhoea in childhood 149**

8. Paediatric Cardiology 157
Trevor Richens

Introduction 157
General principles of diagnosis 157
Examination 157

- **Congenital heart abnormalities 162**

Acyanotic congenital heart disease 162
Cyanotic congenital heart disease 169
Acquired heart disease 176
Heart rhythm abnormalities 181
Case studies 183

9. Care of the Paediatric Surgical Patient 186
Shilpa Sharma, Devendra K Gupta

- **Basic paediatric surgery 186**

Introduction 186
History taking of paediatric surgical patients 186
Clinical examination 187
Pre- and postoperative care 188
Fluid and electrolyte management 189
Blood transfusion 191
Summary 192

- **Paediatric trauma and burns 192**

Paediatric trauma 192
Physiological parameters 193
Approach to the injured child 193
Emergency treatment 195
Child abuse 197
Burns 197
Emergency room management 200
Surgical management of the burn wound 202
Complications and rehabilitation 203
Long-term complications 204

10. Neonatal Surgery 205
Devendra K Gupta, Shilpa Sharma

Congenital diaphragmatic hernia 205
Oesophageal atresia 206
Infantile hypertrophic pyloric stenosis 209
Malrotation 210
Hirschsprung's disease 212
Anorectal malformations 214
Neural tube defects 220
Hydrocephalus 223

11. General Paediatric Surgery 228
Devendra K Gupta, Shilpa Sharma

Cleft lip and palate 228
Branchial arch anomalies 230
Thyroglossal cyst 233
Umbilical hernia 234
Intussusception 235

Surgical jaundice in children 235
Choledochal cyst 238
Inguinal hernia and hydrocoele 241

12. Paediatric Urology **244**
Devendra K Gupta, Shilpa Sharma

Hydronephrosis 244
Exstrophy of bladder 247
Undescended testis or cryptorchidism 249
Phimosis 253
Paediatric intersex disorders 253

13. Paediatric Oncology **258**
Devendra K Gupta, Shilpa Sharma, Robert Carachi

Wilms' tumour 258
Neuroblastoma 261
Rhabdomyosarcoma 265
Hepatoblastoma 268
Hepatocellular carcinoma 270
Germ cell tumours 271

14. Dermatology **279**
Mary Mealyea

Introduction 279
Common terms used 279
History 280
Vascular anomalies 280
Disorders of pigmentation 283
Café au lait macules 284
Dermal melanocytosis 285
Epidermal naevi 285
Blistering disorders 286

15. Haematological Disorders **299**
Krishna M Goel

Haematopoiesis 299
The normal blood picture in infancy 299
Iron deficiency or nutritional anaemia of infancy 300
The megaloblastic anaemias (folate deficiency, vitamin B_{12} deficiency) 302
The haemolytic anaemias 303
Autoimmune haemolytic anaemia 309
Paroxysmal nocturnal haemoglobinuria 310
Microangiopathic haemolytic anaemia 310
Aplastic and hypoplastic anaemia 310
Congenital hypoplastic anaemia (Blackfan Diamond anaemia) 310
Fanconi-type familial aplastic anaemia 311
Acquired hypoplastic anaemia 312
Albers-Schönberg disease (osteopetrosis, marble bones) 312
The thrombocytopaenic purpuras 312
Idiopathic thrombocytopaenic purpura 313
Neonatal thrombocytopenic purpura 314
Wiskott-Aldrich syndrome 315
Henoch Schönlein purpura 315
Blood clotting defects 315
Haemophilia A 316
Haemophilia B (Christmas disease) 316
Von Willebrand disease 316
Disseminated intravascular coagulation consumption coagulopathy 317
Acute leukaemias 318
Meningeal and testicular leukaemia 319

16. Paediatric Rheumatology **323**
Paul Galea, Krishna M Goel

Introduction 323
Causes of arthralgia and arthritis in children 323
Juvenile idiopathic arthritis 323
Treatment of juvenile idiopathic arthritis 327
Physiotherapy and occupational therapy 329
Juvenile reactive arthritis 329
Benign joint hypermobility syndrome 330
Limb pains of childhood with no organic disease (idiopathic limb pains) 330
Juvenile dermatomyositis 331
Paediatric systemic lupus erythematosus 333
Neonatal lupus erythematosus 334
Juvenile scleroderma 335
Juvenile systemic sclerosis 336
Vasculitic syndromes 336

17. The Urinary System **340**
Krishna M Goel

Introduction 340
Acute post-streptococcal glomerulonephritis 340
Primary IGA nephropathy 342
Nephrotic syndrome 342
Congenital nephrotic syndrome 343
Urinary tract infections 344
Renal tuberculosis 346
Hypertension in children 346
Renal vein thrombosis 350
Renal calculi (urolithiasis) 350
Hypophosphataemic vitamin D-resistant rickets (phosphaturic rickets) 351
Renal fanconi syndrome (cystinosis) 352
Nephrogenic diabetes insipidus 353
Renal tubular acidosis 354
Nocturnal enuresis 354
Haemolytic uraemic syndrome (D+HUS, D –HUS) 356
Acute renal failure 356
Chronic renal failure 358

18. Diseases of Nervous System **360**
Prabhakar D Moses, Maya Mary Thomas, Beena Koshy

Introduction 360
- **Congenital malformations of CNS 360**

Microcephaly 360
Craniosynostosis 361
- **Infections of the nervous system 361**

Pyogenic meningitis 361
The Waterhouse-Friderichsen syndrome 363
Aseptic meningitis 363
Acute encephalitis and encephalopathy 364
Sclerosing panencephalitis 365

Acute encephalopathy 365
Tuberculosis of the central nervous system 366
Brain abscess 367
Neurocysticercosis 367
- **Acute flaccid paralysis 368**
Acute postinfectious polyneuropathy (Guillain-Barre'syndrome) 369
- **Convulsions in infancy and childhood 370**
Febrile seizures 375
- **Childhood stroke 375**
- **Movement disorders 378**
Rheumatic chorea (Sydenham's chorea, St. Vitus dance) 379
- **Neurocutaneous syndromes 379**
Neurofibromatosis (Von Recklinghausen's disease) 379
Tuberous sclerosis (epiloia) 380
Sturge-Weber syndrome (encephalofacial angiomatosis) 380
Ataxia–telangiectasia (Louis-bar syndrome) 381
Von Hippel-Lindau disease 381
- **Neurodegenerative disorders 381**
Neuronal ceroid lipofuscinoses 382
- **Neuromuscular disorders 382**
Spinal muscular atrophy (SMA) 382
Muscular dystrophy 383
Myasthenia gravis 384
Congenital mysathenic syndromes 385
- **Autonomic nervous system 385**
Familial dysautonomia (Riley-Day syndrome) 385
- **Brain tumour in children 386**
- **Cerebral palsy 386**
- **Learning disorders 392**
Learning disability (developmental retardation) 392
Management of children with learning impairment 398

19. Accidental Poisoning in Childhood 399
Krishna M Goel

Introduction 399
Assessment of the child and management 399
Poison identification and assessment of the severity of overdose 401
Salicylate poisoning 403
Paracetamol poisoning 403
- **Ibuprofen 404**
Acute iron poisoning 404
Barbiturate poisoning 405
Poisoning by antihistamines 405
Poisoning by tricyclic and related antidepressants 405
Atropine poisoning 405
- **Antimalarials 406**
Poisoning by digoxin 406
Poisoning by petroleum distillates, insecticides and weed-killers 406
Acute alcohol poisoning 407
Lead poisoning 407
Caustic ingestion 408
Swallowed foreign bodies 409
Acute carbon monoxide poisoning 410
Snake bite 410
Insect stings 411
Marine stings 411
Plant and mushroom poisoning 411
Drowning and near drowning 411

20. Metabolic Diseases 413
Peter Galloway, Rajeev Srivastava, Krishna M Goel

Inborn errors of metabolism 413
Common aetiological principles 413
Treatable disorders 414
Clinical approach to diagnosis 415
- **Specific common disorders 416**
Disorders of amino acid metabolism 416
Other disturbances of amino acid metabolism 419
Disorder of branched-chain amino acid metabolism 420
- **Urea cycle disorders 420**
Disorders of the sulphur-containing amino acids 421
- **Disorders of specific sugars 421**
Pathogenesis 421
Clinical features 422
Diagnosis 422
Treatment 422
Disorders of purine and pyrimidine metabolism 423
- **Congenital methaemoglobinaemia 424**
Aetiology 424
Pathogenesis 424
Clinical features 424
Diagnosis 424
Treatment 424
Glycogen storage disorders 424
Inborn errors of lipid metabolism (the lipidoses) 427
The mucopolysaccharidoses 429
Mitochondrial defects 431
Peroxisomal disorders 432

21. Endocrine Disorders 434
Louis Low

Hypopituitarism 434
Disorders of the posterior pituitary 435
Short stature 436
Tall stature 438
Obesity 438
Thyroid gland 439
Parathyroid glands 445
Rickets 447
The gonads 448
Adrenal gland 450
Disorders of sex development 455
Diabetes mellitus 456
Hypoglycaemia 460

22. Paediatric Orthopaedics 462
Benjamin Joseph

Introduction 462
Deformities 462

Gait abnormalities 462
Musculoskeletal pain 465
Paralysis and pseudoparalysis 465
Joint stiffness 466
Congenital anomalies 466
- **Developmental problems 472**

Flatfoot 472
Paralytic conditions 475
Infections of bone and joints 478
Inherited disorders of bone 479
Tumours of bone 481
Hip pain in children and adolescence 482

23. Paediatric Dentistry 484
Richard Welbury, Alison M Cairns

Dental anatomy 484
Caries 486
Oral pathology/oral medicine 487
Infection 495
Bacterial infection 496
Anomalies 498
Dentoalveolar trauma 502
Oral manifestations of systemic disease 507

24. Immunity and Allergy 508
Rosemary Anne Hague

Components of the immune system 508
The next line of defence: innate (non-specific) immunity 509
Cells of innate immune system 510
The adaptive (acquired) immune system 510
Why are neonates and infants prone to infection? 512
Nutrition and immunity 513
Problems with the immune system 513
Tests of cell mediated immunity 515
Test for humoral immunity 515
Primary immunodeficiency disorders 515
- **Allergy 517**

The immunology of allergic diseases 518
Mediators of the allergic response 519
Epidemiology 519
Food allergy 520
Diagnosis of allergy 522
Management of allergy 524
Prophylactic medications 524
Future developments 526

25. Immunisation Against Infectious Diseases 527
Jugesh Chhatwal

Immunisation 527
Adverse events 528
Travel immunisation 532

26. Infectious Diseases 533
Jugesh Chhatwal

Diphtheria 533
Pertussis (Whooping cough) 535
Tetanus 536
Enteric fever (typhoid fever) 538
Shigellosis 541
Streptococcal infections 541
Pneumococcal infections 543
Meningococcal disease 543
Haemophilus influenzae 544
Staphylococcal infections 545
Tuberculosis 546
Directly observed treatment short course (DOTS) 549
Leprosy 549
Syphilis 551
Leptospirosis 552
Measles 552
Mumps 555
Rubella 556
Varicella virus (chickenpox) 556
Poliomyelitis 558
Rabies 558
Japanese encephalitis 558
Dengue fevers 559
Human immunodeficiency virus infection (AIDS) 561
Associated infections 562
Perinatal transmission 562
Malaria 563
Toxoplasmosis 565
Amoebiasis 566
Giardiasis 567
Kala azar (visceral leishmaniasis) 567

27. Paediatric Ophthalmology 569
Sarada David, Kirsteen J Thompson

Visual assessment in children 569
Nystagmus 573
Intrauterine infectious diseases 574
Orbital cellulitis 578
Allergic conjunctivitis 578
Lacrimal system 579
Cornea 580
Systemic diseases with corneal manifestations in childhood 584
Childhood lens disorders 585
Paediatric glaucoma 587
Uveitis in children 588
Retinoblastoma 591
Retinopathy of prematurity 593
Traumatic retinopathy 594
Preventive ophthalmology 594
The child with visual impairment 595

28. Haematological Investigations in Children 596
Christina Halsey, Elizabeth A Chalmers

Full blood count 596
Red cell indices 596
Blood film 596
Reticulocyte count 597
Normal ranges 597
Investigation of low haemoglobin in infancy and childhood 598
Hypochromic microcytic anaemia 598
Tests to diagnose iron deficiency 601

Tests to diagnose thalassaemia 601
Macrocytic anaemia 602
Normocytic anaemia 602
Investigation of anaemia in neonates 604
Polycythaemia 604
White cell disorders 604
Bone marrow examination 606
Platelet disorders 607
Coagulation testing in infants and children 607
When to perform a coagulation screen 608
Coagulation tests 608
Monitoring of anticoagulant therapy 610

29. Biochemical and Microbiological Investigations in Paediatrics 611
Peter Galloway, Craig Williams

Introduction 611
What are the roles of diagnostic tests? 611
What factors are important in interpreting data? 612
What is normal? 612
What do you need to know about biochemical tests? 613
What do you need to know about microbiology tests? 614

30. Paediatric Emergencies 618
Alastair Turner, NV Doraiswamy

Introduction 618
Differences between adults and children in the emergency department 618
Basic structured approach to management 619
Cardiac arrest 620
Paediatric emergencies 628

31. Disorders of Emotion and Behaviour 639
Michael Morton, David James

An introduction to child and adolescent psychiatry 639
Problems in early childhood 641
Working with physically ill children 642
Emotional disorders and medically unexplained symptoms 643
Elimination disorders 646
Behaviour disorders 647
Eating disorders 649
Psychotic disorders 650
Communication disorders 650
Disorders with motor presentations 651
Problems of learning 652
Working with social services and police 653

32. Paediatric Radiology 655
Sanjay V Maroo, Sandra J Butler

General considerations in paediatric radiology 655
Radiation effects on children 655
Imaging modalities used in paediatric imaging 655
Respiratory and cardiac 657
Medical causes 660
Surgical causes 663
A child with a mediastinal mass 665
Chest wall masses 668
Congenital heart disease 669
Cyanotic child with congenital heart disease 672
Other cardiac and related conditions 673

- **Abdomen 675**
  A neonate with bilious vomiting 675
  Other abdominal conditions in children 678
  The child with an abdominal mass 682
- **Paediatric neuroradiology 685**
  Congenital brain malformations 685
  Holoprosencephaly 686
  Trauma, hypoxiaischaemia and haemorrhage 689
  Infections, tumours and hydrocephalus 694
  Congenital spine lesions 700
- **Paediatric skeletal radiology 702**
  Skeletal dysplasias 702
  Mucopolysaccharidoses 704
  Paediatric hip abnormalities 707
  Metabolic bone disorders 710
  Inflammatory joint and muscle conditions 711
  Bone infections 712
  Haemolytic anaemias 713
  Langerhans' cell histiocytosis 714
  Paediatric bone tumours 716
  Osteosarcoma 716
- **Paediatric renal imaging 717**
  Congenital anomalies 717
  Renal ectopia 719
  Urinary tract stones and nephrocalcinosis 722
  Dilatation of urinary tract 722
  Neoplastic diseases 724

33. Paediatric Maxillofacial Surgery 727
Khursheed F Moos

Introduction 727
Congenital deformity 728
Craniofacial microsomia 732
Clinical features 733
Treacher collins syndrome 736
Infection 738
Trauma 740
Pathology of the jaws and adjacent structures 748
Vascular anomalies 751

34. A Prescription for Play 753
Phyllis Kilbourn, Rosemary Sabatino

Introduction 753
Defining play 753
Importance of play 753
Description of forms of play 753
Play: an essential element in child development 755
The dangers of play deprivation 757
Advice for parents (or caregivers) 757
Play's role in emotional health 758
Emotional issues stemming from trauma 758

Defining organised play activities (play therapy) 758
Play: a medium of communication 759
Methods of play therapy 759
Benefits of organised play 759

35. Paediatric Rehabilitation **763**
Judy Ann John, Lydia Edward Raj

Introduction 763
The rehabilitation programme 764

36. Prescribing for Children **780**
James Wallace

The challenge 780
Pharmacokinetics 780
Compliance and concordance 781
The issues in practice 782
Prescribing in paediatrics 783
Other issues 785

37. Child Abuse and Neglect—How do We Protect these Children? **786**
Jean Herbison

Introduction 786
Various forms of abuse 786
Emotional abuse and neglect 792
Physical abuse 793
Child sexual abuse 798
Fabricated and induced illness 799
Child trafficking 799
Child protection standardised procedures 801
Legal system 801
Section 1 803
Section 2 803
Section 3 803
Child protection process for all staff 804
Standard operating procedure in relation to child protection concerns 814

38. Practical Paediatric Procedures **821**
Alastair Turner, Robert Carachi, Krishna M Goel

Introduction 821
Preparation for practical procedures 821
Restraint 821
Sedation and analgesia for clinical procedures 822
Routine practical procedures 824
Other practical procedures 838

Appendices **855**

Appendix A: Guide to biochemical values 855
Appendix B: A guide to normal ranges for the FBC in infancy and childhood 857
Appendix C: Surface area nomograms in infants and children 858
Appendix D: Percentiles of age specific blood pressure measurements in boys and girls 859
Appendix E: Childhood myositis assessment scale (CMAS) scoring sheet 863

Index *865*
