CONTENTS

1. GENERAL PRINCIPLES ..... 1 – 42

Introduction to plastic surgery
History of plastic surgery
Ethical issues in plastic surgery
Photography in plastic surgery
Anaesthesia for plastic surgery
Biology of wound healing
Skin grafting
Flaps
Principles of microvascular surgery
Principles of tissue expansion
Principles of fat, dermis grafting
Principles of tendon repair
Principles of muscle repair
Principles of cartilage repair
Principles of bone grafting
Principles of nerve grafting
Implants in plastic surgery
Thermal injury
Endoscopic plastic surgery
Fetal surgery
Robotics in plastic surgery

Answers, Explanations and References

2. AESTHETIC SURGERY ..... 43 – 82

Anthropometry and cephalometric analysis
Aesthetic forehead surgery
Aesthetic periorbital surgery
Aesthetic surgery of the face
Aesthetic rhinoplasty
Aesthetic orthognathic surgery
Blepharoplasty
Hair restoration

Answers, Explanations and References

3. HEAD AND NECK ..... 83 – 126
Facial soft tissue injuries
Facial fractures
Temporomandibular joint dysfunction
Cranial reconstruction
Scalp reconstruction
Auricle reconstruction
Forehead reconstruction
Periorbital reconstruction
Lip reconstruction
Midface reconstruction
Oral cavity reconstruction
Mandible reconstruction
Hypopharyngeal reconstruction
Neck reconstruction
Facial paralysis

Answers, Explanations and References

4. CRANIOFACIAL AND CLEFT ..... 127 – 168
Embryology of the craniofacial complex
Classification of craniofacial clefts
Craniofacial syndromes
Craniofacial microsomia
Cleft lip
Cleft palate
Craniosynostosis
Orthodontics in cleft lip and palate

Answers, Explanations and References

5. ONCO-PLASTIC SURGERY ..... 169 – 187
Paediatric tumours
Vascular anomalies
Salivary gland tumours
Tumours of craniofacial skeleton
Oral malignancies
Tumours of the mandible
Skin malignancies

Answers, Explanations and References

6. TRUNK AND LOWER EXTREMITY ..... 188 – 224
Breast augmentation
Breast reduction
Abdominoplasty
Liposuction
Chest reconstruction

Breast reconstruction
Abdominal wall reconstruction
Genital reconstruction
Pressure sores
Lower extremity reconstruction

Answers, Explanations and References

7. UPPER LIMB ..... 225 – 259

History of hand surgery
Anatomy of hand
Examination of upper extremity
Radiology of the hand
Anaesthesia for upper extremity
Principles of upper extremity surgery
Fingertip reconstruction
Thumb reconstruction
Flexor tendon injuries
Extensor tendon injuries
Fractures and dislocations
Peripheral nerve injuries
Brachial plexus injuries
Replantation and revascularisation
Thermal and nonthermal injuries
The stiff hand
Degenerative diseases of the hand
Infections of the hand
Ischaemic conditions of the hand
Nerve entrapment
Tumours of the upper extremity
Congenital anomalies of the hand
Tendon transfers in the upper extremity
Prosthetic rehabilitation of the hand

Answers, Explanations and References

8. RECENT ADVANCES ..... 260 – 276

Answers, Explanations and References
