Contents

1. General Aspects of Obstetric Vasculopathies **1**
What are Obstetric Vasculopathies 2

2. Cardiovascular Changes in Normal Pregnancy **4**
Blood Pressure 5
Longitudinal Changes in Cardiac Functions 6
Peripheral Vascular Resistance 9
Changes in Venous System: Any? 9

3. Immunology of Obstetric Vasculopathy **11**
Leads through Recurrent Spontaneous Abortion (RSA) 11
Fetus as an Allograft 11
What Protects the Fetus? 12
Fetus as a Unique Allograft 13
Suppressor Mechanisms in Protection 16
Partner Specificity in Miscarriages 18
Autoimmunity in Recurrent Pregnancy Loss 19
Embryo Decidua Crosstalk in immunology of Obstetrics Vasculopathy 22
Implantation Not a Right of Embryo 23
Results of the Crosstalk 23
Other Contributory Mechanisms 24
What is Spontaneous Resolution? 27
The Miracle of Paradox 28

4. Endothelial Cell Dysfunction and Obstetric Vasculopathy **31**
The Phenomenon of Endothelial Cell Activation 32
Endothelial Activation and Prostaglandins 33
Plasminogen and Allied Procoagulant Activity—A Manifestation of Endothelial Cell Activation 34
Antiphospholipid Antibodies Act through Procoagulant Mechanism 34
Endothelial Cell Adhesion Molecule Disturbances 35
Components of Fibronectin 36
Vascular Endothelial Growth Factor (VEGF) 37
Endothelin 37
Other Molecules Contributing to Endothelial Cell Activation 38

5. Oxidative Stress and Obstetric Vasculopathies **42**
What is Oxidative Stress 42
Our Basic Study 43
What is a Free Radical? 43
Oxidative Stress and Health 44
The Mischief of Free Radicals in Vascular Walls 45
Lipid Peroxides: the Agents of Oxidative Stress 45
Lipid Metabolism in Normal Pregnancy and its Bearings in Abnormal Pregnancy 47

Placental Lipid Peroxidation 54
Clinical Manifestations 57
Reperfusion 57
Innate Maternal Reducing Systems 59
The Family of Free Radicals 61
Vascular Endothelium and Oxidative Stress 62
Inefficient Second Wave of Trophoblastic Invasion 63
Nitric Oxide in Obstetric Vasculopathy 65
Placental Atherosis in Obstetric Vasculopathy 69
Extracellular Reducing Systems 70
Exercise and Prevention of Obstetric Vasculopathies 74
Treatment Bearings 76

6. The Placenta, Trophoblasts and Obstetric Vasculopathies 80
Basic Process of Normal Placenta and Placentation 80
Oxygenation and Trophoblastic Differentiation 83
Faults in Fetomaternal Linkage at Placenta and Obstetric Vasculopathy 84
Maternal Environment Preventing Trophoblastic Invasion 84

7. The Genetics of Obstetrics Vasculopathies 86
Basis for Reviewing the Role of Genetics in Obstetric Vasculopathies 86
Challenges to the Genetic Studies in Obstetric Vasculopathies 87
Mammalian Studies 88
Application of Genetic Models 89
Examining Associations 89
Fetal Contributions: Any? 89
Reverse Associations 91
Immunology and Genetics 91
Inputs from Animal Models 92
Epigenetic Features in Preeclampsia 92

8. Obstetric Vasculopathies and their Effects on Heart 95
Hemodynamics in Normal Pregnancy and During Obstetric Vasculopathies 95
Effect of Preeclampsia on the offspring—Any? 97

9. Obstetric Vasculopathies and their Effects on the Renal System 98
Vulnerability of Renal System 98
Special Features of Renal Failure in Obstetric Vasculopathies 99
Kidney Lesions 101
Renal Function Alterations in Preeclampsia 107

10. Obstetric Vasculopathies and their Effects on the Central Nervous System 111
The Privileged Status of Central Nervous System (CNS) 111
Pathological Lesions in Preeclampsia 112
Psychiatric Complications Following Obstetric Vasculopathies: Any Correlation? 113

11. Obstetric Vasculopathies and their Effects on Hematological System 114
Alteration in Coagulation Factors (other than Platelets) and Procoagulants 114
Alteration in other Cellular Components of Blood 115
Review of Coagulation Alterations in Obstetric Vasculopathies 116

12. Obstetric Vasculopathies and their Effects on the Liver 120
Pathological Changes in the Liver 121
Liver in Hemolysis Elevated Liver Enzymes Low Platelets (HELLP) Syndrome 122

13. Ophthalmic Features in Obstetric Vasculopathy 124
Retinal Edema 125
Central and Peripheral Cause of Visual Alterations 125

14. Vascular Responses in Obstetric Vasculopathy 127
Blunted Vascular Response 127
Placental Ischemia 128
Animal Experiments 128
Hard Facts Emerging from Animal Experiments 134

15. Clinical Profile of Obstetric Vasculopathies 136
Hypertension 136
Proteinuria 140
Edema 141
Other Laboratory Parameters 142

16. Differential Diagnosis of Obstetric Vasculopathies 144
Preeclampsia and Chronic Hypertension 144
Transient Hypertension 146
Renal Diseases 146
Hepato-Hematological Involvements 147

17. Predicting Obstetric Vasculopathies 148
Overview of Available Predicting Measures 148
Application of Predicting Systems for other Uses 149
The Amorphous Characterizations of Pathogenesis and Clinical Features 149
Overview of the Types of Tests 150
Negative to Positive Predictive Value 151
Conditions Based Tests 151
An Ideal Test 151
Clinical Tests 151
Urinary Tests 153
Hematological Cellular and Non-cellular Indices 154
Epidemiological Indices 158
Color Doppler in Obstetric Vasculopathies: The Game Changer 159

18. Prevention of Preeclampsia and other Obstetric Vasculopathies 164
What is the Difference between Disease and Derangement? 165
Preventing Obstetric Vasculopathy is a Challenge 167

Which Subjects may Benefit Out of Preventive Measures 167
Measures Prevent Occurrence or Prevent Worsening 169
Preventive Measures of Obstetric Vasculopathies 173
Prevention of Eclampsia 184

19. Color Doppler in Obstetric Vasculopathies 187
Color Doppler in Early Pregnancy 187
Third Trimester Color Doppler in Obstetric Vasculopathies 192
Color Doppler for Discontinuation of Antithrombotic Agents 199
Fetal Aortic Doppler Studies 201

20. Cardiotocography in Obstetric Vasculopathies 204
Physiology and Cardiotocography 204
Hypoxia and Fetal Heart Rate 207
Cardiotocographies in Subjects with APA Syndrome 208
Color Doppler and Cardiotocography Correlation 208

21. Treatment of Obstetric Vasculopathy: Recurrent Miscarriages 212
Corticosteroids: Not Used Any More 212
Folic Acid 213
Low Dose Aspirin 214
Heparin 215
Progesterone is Treatment of Immunological Miscarriages 215
Treatment of a Subject of Miscarriage Always for Prevention 217

22. Treatment of Obstetric Vasculopathy—Preeclampsia 218
Limitations of Blood Pressures as an Indicator of Severity 218
Early Diagnosis and Alert Surveillance 219
Do Subjects of Preeclampsia Need Admission 220
Management on Hospitalization 220
Antihypertensives 221
Induction of Labor in Pregnancy Induced Hypertension (PIH) 226
Methods of Induction of Labor 229
Cesarean Section in Pregnancy Induced Hypertension (PIH) 232
Post Delivery Care 232

23. Treatment of Obstetric Vasculopathy: Accidental Hemorrhage 235
The Etiopathology of Accidental Hemorrhage 235
The Clinical Effects of Accidental Hemorrhage 236
Cardiotocography Changes in Accidental Hemorrhage 237
Ultrasonography in Accidental Hemorrhage 238
Obstetric Management of Accidental Hemorrhage 238
Cesarean Section in Accidental Hemorrhage 239
Medical Management 239

Index 241
