Contents

SECTION 1: Introduction to Cardiopulmonary System

1. Brief Anatomy of Cardiovascular System **3**

- Anatomy of the Heart 3
- Location of the Heart 3
- Layers of the Heart Wall 3
- Chambers of the Heart 3
- Valves of the Heart 5
- Pathway of Blood through the Heart 6
- The Pulmonary and Systemic Circuits and the Blood Supply to the Heart 6
- Blood Supply to Myocardium 7

2. Physiology of Cardiovascular System **8**

- Cardiac Cycle 8
- Pressure Changes during Cardiac Cycle 10
- Electrocardiogram 12
- Properties of the Heart Muscles 13
- Importance of Frank-Starling's Law 15

3. Brief Anatomy of Respiratory System **19**

- Anatomical Features of the Lungs 20
- Pleura 20
- Lungs 22
- Surface Marking of the Lungs 24
- Fissures of the Lungs 25
- Bronchopulmonary Segments 26

4. Physiology of Respiratory System **28**

- Composition of Air 28
- Definition of Respiration 28
- Functions of Respiratory System 29
- Structure of Respiratory Tract 30
- Control of Respiration 31
- Mechanics of Breathing 32
- Lung Volumes and Capacities 34

SECTION 2: Role of Physiotherapy in Cardiopulmonary Diseases

5. Cardiac Rehabilitation **39**
- Goals of Cardiac Rehabilitation 39

6. Pulmonary Rehabilitation **50**
- Economic Impact of Lung Disease 50
- Multidisciplinary Nature of Pulmonary Rehabilitation 50
- Physiology of Muscular Exercise 53

SECTION 3: Respiratory System

7. Respiratory System Assessment **61**
- Subjective Assessment 61
- Inspection 65
- Palpation 70
- Percussion 73
- Auscultation 74
- Laboratory Evaluation 74

8. Respiratory Diseases and their Physiotherapy Management **76**
- Chronic Obstructive Pulmonary Diseases 76
- Risk Factors for COPD 77
- Asthma 87
- Pathophysiology 88
- Classification of Asthma 91
- Laboratory Evaluation 93
- Tuberculosis 96
- Risk Factors 97
- Symptoms 97
- Pathogenesis 97
- Clinical Manifestations 99
- Respiratory Failure 107
- Acute versus Chronic Respiratory Failure 107

9. Respiratory Care in Intensive Care Unit **116**
- Purpose 116
- Role of Physiotherapist in Intensive Care Unit 124

SECTION 4: Cardiovascular System

10. Assessment of Cardiovascular System **127**
- Clubbing 127
- Splinter Hemorrhages 128
- Cyanosis 128
- Arterial Pulses 128
- Rate and Rhythm 128
- Amplitude and Contour 128
- Volume 132
- The Venous Pulse 133
- Heart Sounds 137

11. Cardiovascular Diseases and their Physiotherapy Management **142**
- Hypertension 142
- Causes of Hypertension 144
- Pathophysiology 146
- Heart Failure 151
- Causes of Heart Failure 151
- Treatment for Heart Failure Patient 161
- Ischemic Heart Disease 165
- Etiopathogenesis 165
- Risk Factors for Coronary Artery Disease 167
- Effects of Myocardial Ischemia 168
- Pathophysiology 170
- Complications of Myocardial Infarction 173
- Congenital Heart Disease 181
- Classification 181
- Rheumatic Heart Disease 199
- Pathology 199

12. Mechanical Ventilation **202**
- Clinical Objectives of Mechanical Ventilation 202
- Indications 202
- Hazards and Complications of Mechanical Ventilation 202

13. Humidity and Aerosol Therapy **213**
- Clinical Indications for Delivery of Humidified Gases and Aerosols 214
- General Principles of Equipment Operation 214
- Humidifiers 214
- Aerosol Therapy 220

14. Medical Gas Therapy **229**
- Goals of Medical Gas Therapy/Oxygen Therapy 229
- Harmful Effects 230
- Oxygen Delivery Devices 233
- Low Flow Systems 234
- High Flow Systems 238

15. Airway Care and Management **240**
- Airway Management 240
