Contents

SECTION 1: HISTORICAL EVOLUTION OF LUMBAR DISC HERNIATION

1. **Back Pain, Sciatica and Herniated Lumbar Intervertebral Disc Historical Anecdote** **3**
   PS Ramani

2. **History of Lumbar Disc Disease and Herniation** **4**
   Pragnesh Bhatt
   - Prior to 20th Century 4
   - 20th Century—First Half 5
   - 20th Century—Second Half 6
   - Artificial Disc Technology 6

3. **Evolution and Progress of Concept of Minimally Invasive Surgical Management of Herniated Lumbar Intervertebral Disc** **7**
   PS Ramani
   - Evolution 7
   - Progress 7
   - Minimally Invasive Concepts 7
   - Progress in Minimally Invasive Surgical Techniques 8

SECTION 2: BASIC KNOWLEDGE IN LUMBAR DISC HERNIATION

4. **Applied Anatomy and Normal Functions of Lumbar Spine** **11**
   Eko Agus Subagio
   - Applied Anatomy 11
   - Normal Functions of the Lumbar Spine 19

5. **Microanatomy of Degenerative Disc Disease** **22**
   Wolfgang Rauschning, Benjamin Hoch
   - Uppsala Cryoplanning Technique 23

6. **Natural History of Degenerative Changes in Lumbar Spine** **30**
   S Phanikiran, K Sridhar
   - Relevant Anatomy 30
   - Etiology and Pathogenesis of Disc Degeneration 31
   - Clinical Manifestations 33

7. **Clinical Biomechanics Related to Lumbar Disc Degeneration and Herniation** **36**
   Kourosh Karimi Yarandi, Abbas Amirjamshidi, Mohammad Shirani Bidabadi, Reza Sanjari
   - Basic Biomechanical Principles 36
   - Biomechanically Related Anatomy and Physiology 37
   - Spondylosis and Degeneration 39
   - The Aging Spine 41
   - Biomechanics of Intervention 42
   - Biomechanics of Nonfusion Implants and Dynamic Stabilization 42
   - Biomechanics of Traction Devices 44

8. Factors Responsible for Symptomatology of Lumbar Disc Herniation **47**
Alok Agarwal
- The Origin of Back Pain and Sciatica 47
- Factors Causing Back Pain and Sciatica 51

9. Clinical Presentation of Lumbar Disc Herniation **57**
Sudhendoo Babhulkar, Sumeet Pawar
- Neurogenic Claudication 58
- Blood Supply 58
- Back Pain 58
- Sensory Dysfunction 58
- Sciatic Pain 58
- Sciatica 59
- Physical Signs 60

SECTION 3: INVESTIGATIONS

10. Role of CT in Diagnosis of Lumbar Disc Herniation **65**
Manoj Deshmukh, Jay Kotecha
- Indications for CT Myelogram 65
- Technique of CT Myelogram 65
- Anatomy and Physiology 66
- Pathology 67
- Possible Complications 68

11. MRI in Diagnosis of Herniated Lumbar Intervertebral Discs **70**
Makarand Kulkarni, Palak Popat
- Relevant Anatomy 70
- MRI Anatomy of the Disc 70
- The Pathological Disc 71
- Ancillary Features of an Overall Degenerative Process: The Mimics of a Discogenic Pain 73
- The Postoperative Spine 73
- Failed Back Surgery Syndrome 73

12. Image Diagnosis of Lumbar Disc Herniation **75**
Kyeong-Sik Ryu, Chun-Kun Park
- Plain Radiography 75
- Computed Tomography 75
- Magnetic Resonance Imaging 76
- Discography and CT Discography 76
- Myelogram 77
- Myelo-CT 77

SECTION 4: SURGICAL TECHNIQUES

13. Lumbar Laminectomy **83**
PS Ramani
- Factors Contributing to Lumbar Canal Stenosis 83
- Surgical Technique 84
- Laminoplasty Instead of Laminectomy 87
- The Closure 87
- Complications 87

14. Microlumbar Decompression for Lumbar Disc Disease **89**
Abdul Hafid Bajamal, Muhammad Faris, Eko Agus Subagio
- Indication for Surgery 89
- Operative Techniques 90
- Lateral Recess Stenosis 92
- Foramen Decompression 92
- Multiple Disc Prolapse 92
- Wound Closing 92
- Special Situation 92
- Complication 93
- Results 94

15. Lumbar Microdiscectomy with Preserving of Ligamentum Flavum and Fat Tissue **95**
R Kemal Koc
- Prognosis in Patients Undergoing Lumbar Disc Surgery 95
- Surgical Procedures for Lumbar Disc Herniation Up to Now 95
- Terminology 95
- Surgical Microscope 95
- Indications for Surgical Treatment of Lumbar Disc Herniation 96
- Patient Selection Criteria [American Academy of Neurological Surgeons (AANS), American Academy of Orthopedic Surgeons (AAOS)] 96
- Preoperative Planning 96
- Anesthesia 96
- Preparation of the Patient and Position 96
- Skin: Interlaminar Approach 96
- Preserving of Ligamentum Flavum 96
- Approach to the Spinal Canal with One-sided Flap Technique while Maintaining the Ligamentum Flavum 96
- Advantages of Preserving of Ligamentum Flavum 97
- Identification of Nerve Root 97
- Identification of Disc Herniation 97
- Removal of Disc Herniation 97
- Discectomy 97
- Closing 98
- Postoperative Care 98
- Complications 99
- Preoperative Poor Prognostic Factors 99

16. Annular Repair in Lumbar Discectomy **100**
Ben Roitberg, Michael Cui, Javed Khader Eliyas
- Annulus Fibrosus: Structural and Molecular Composition 100
- Physiology of the Intervertebral Disc 101
- Annular Healing 102
- Annular Healing Influenced by Surgical Technique 102
- Need for Repair 102
- Techniques of Repair 102
- Newer Research in Regenerative Techniques 104
- Challenges in Research 105

17. Discoplasty after Excision of Herniated Disc **108**
PS Ramani
- Author's Technique 108
- Results 108

18. Far Lateral Disc Prolapse **109**
Matthew J Tait, Nicholas WM Thomas
- Anatomy 109
- Etiology/Pathogenesis 110
- Clinical Presentation 110

19. Extraforaminal Approach to Lumbar Disc Herniations **114**
Mahmet Resid Onen, Sait Naderi
- History 114
- Anatomy 115
- Clinical Findings 115
- Surgical Technique 115
- Combined Extraforaminal—Medial Approach 116
- ELIF Applications with Far Lateral Extraforaminal Approach 117
- Complications 117

20. Surgical Management of Extraforaminal (Far Lateral) Disc Herniations **119**
Enrique Klériga-Grossgerge, Jesús Carlos Bustamante-Vidales, Christian Andrés Chalita Pérez-Tagle, Gerardo Francisco Zambito-Brondo
- Clinical Findings 120
- Treatment 120

21. Minimally Invasive Treatment for Back Pain: A Review **125**
Jin-Sung Kim, Chun-Kun Park
- History and Evolution 125
- Pathophysiology and Clinical Symptoms 126
- Facetal Pain 127
- Sacroiliac Joint Pain 127
- Treatment 129

22. Percutaneous Transforaminal Endoscopic Lumbar Discectomy: Transforaminal Endoscopic Spinal System Method **138**
PD Kulkarni
- Various Types of Approaches Used for Lumbar Discectomy (Past and Present) 138
- Historical Developments 138
- Laser Lumbar Discectomy 139
- Applied Anatomy of the Lumbar Spine 139
- Anatomy of the Intervertebral Foramen 139
- Boundaries and the Contents of the IVF 140
- Boundaries of the Intervertebral Foramen 140
- Structures in the Intervertebral Foramen 140
- Anatomy of the Triangular Safe Zone of 'Kambin' 140
- Applied Anatomy and Safe Needle Passage 141
- Endoscopic Anatomy 141
- Percutaneous Transforaminal Endoscopic Lumbar Discectomy 142
- Endoscopes and Surgical Instruments 143
- Operative Technique 145
- Transforaminal Operative Technique (Further Considerations) 146
- Anatomical Considerations and the Need for Foraminoplasty 147
- Downward or Upward Migrated Disc Herniations 150
- Future Developments 151
- Laser in Endoscopic Spinal Surgery 152

- Review of Literature 152
- Summary 152
- Clinical Practice Guidelines 153

23. Percutaneous Endoscopic Lumbar Discectomy 155
Yasuhiko Nishimura
- Procedure 156
- Complications of Surgery 159

24. Percutaneous Transforaminal Endoscopic Discectomy 161
Sushil Patkar
- New Concepts 161
- Indications 161
- Contraindications 161
- Operative Technique 161
- Marking Entry Point 162
- Postoperative Care 163
- Possible Complications 163

25. Percutaneous Endoscopic Lumbar Discectomy (History, Evolution, Surgical Strategy, Outcome and Complications) 165
Jin-Sung Kim, Chun-Kun Park
- History and Evolution 165
- Rationale for MISS 165
- The Inclusion and Exclusion Criteria 166
- Surgical Techniques and Strategies 167
- Cutting Edge of Percutaneous Endoscopic Lumbar Discectomy (PELD) 167
- Postoperative Care 172
- Limitations of Percutaneous Endoscopic Lumbar Discectomy 172
- Complications 172

26. Minimally Invasive Surgical Management of Lumbar Disc Herniation by Anterior Epidural Endoscopy: Epiduroscopy 177
Marcos Masini, Aldo Calaça
- Material and Methods 177
- Procedure Technique 178
- Results 178
- Discussion 179

27. Lumbar Microendoscopic Discectomy 183
Mehmet Zileli, Vehbi Gülmen
- Indications 183
- Contraindications 183
- Surgical Procedures 184
- Postoperative Care 189
- Complications and Avoidance 190

28. Minimally Invasive Lumbar Microdiscectomy 192
Richard Kim, Pulak Ray, Christopher M Loftus, Bong-Soo Kim
- History 192
- Surgical Technique 193
- Complications 196
- Review of Results 196

29. Tubular Microsurgical Discectomy for the Treatment of Lumbar Disc Herniation **199**
Marcos Masini, Wellingson Silva Paiva, Rogério Safatle Barros
- Patients and Methods 199
- Results 200
- Discussion 201

30. Endoscopic Spine Surgery as Treatment for Lumbar Disc Herniation and Foraminal Stenosis **204**
Enrique Osorio-Fonseca, Jorge Felipe Ramírez, José Gabriel Rugeles, Gabriel Oswaldo Alonso
- Historical Perspective of Low Back Endoscopy 204
- Low Back Endoscopic Equipment 205
- Disc Herniation and Low Back Foraminal Stenosis Treatment via Endoscope 206

31. Minimally Invasive Technique for Lumbar Disc Herniation **213**
A Bambang Darwono

32. Laser Assisted Percutaneous and Endoscopic Lumbar Discectomy **219**
Martin TN Knight
- Laser System 219
- Laser Techniques 223

33. Thermodiscoplasty and Percutaneous 360 degree Rhizolysis as a Treatment for Herniated Disc or Facet Lumbar Pain **225**
Enrique Osorio-Fonseca, Jorge Felipe Ramírez, José Gabriel Rugeles, Gabriel Oswaldo Alonso
- Importance and Origin of Disc and Facet Pain 225
- Thermodiscoplasty and 360 degree Rhizolysis 227

34. Lumbar Discs Herniation Treated by Ozone Therapy **231**
Marcos Masini, João Flávio G Madureira
- Background 231
- Patients and Methods 232
- Technique 232
- Guidelines and Assessments 234
- Results 234
- Complications 235
- Discussion 235

35. Use of Robots in the Surgical Management of Lumbar Disc Herniation: Dream or Reality **240**
PS Ramani
- Clinical Use of Robotic Technology 240
- Some Results 240
- Increased Popularity 240
- Mandatory Requirements 241
- Current Application of Robotic Technology in Spinal Surgery 241
- Discussion 241
- Future Developments 241

SECTION 5: SURGICAL TECHNIQUES INFREQUENTLY USED IN LUMBAR DISC HERNIATION

36. In-Space Interspinous Distraction Device for Stabilization of Lumbar Spine in Motion Segment Instability in Lumbar Disc Herniation **245**
PS Ramani
- Pathophysiology 245

- Principles of Management 245
- Indications 246
- Contraindications 246
- The Implant (In-Space Device) 246
- Essential Preoperative Requirements 247
- Surgical Technique 247
- Results 248
- Complications 248

37. New Surgical Method for Lumbar Disc Herniation Associated with Lumbar Canal Stenosis 250
Futoshi Suetsuna, Taito Itabashi
- Surgical Technique 250
- Case Presentation 253
- Discussion 255

38. Lumbar Instrumentation Surgery with Pedicle Screws in Lumbar Disc Herniation 257
Motoi Shoda
- Evaluation of the Patient Lumbar Spine 257
- Surgical Procedure 257
- Exposure and Decompression 257
- Cage Insertion 258
- Pedicle Screw Insert 258
- Complications 260

39. Total Disc Replacement of Lumbar Spine 261
Kyeong-Sik Ryu, Chun-Kun Park
- Biomechanics 261
- Types of Artificial Disc and Insertion Techniques 262
- Indications 264
- Clinical Results 265
- Complications 265
- Prospects 266
- Epilogue 267

40. Techniques, Indication and Outcome of Transforaminal Interbody Fusion in Surgical Management of Lumbar Disc Herniation 269
Christopher WK Mak, David TF Sun
- Lumbar Interbody Fusion Techniques 269
- Surgical Technique of Open Transforaminal Lumbar Interbody Fusion 270
- Surgical Technique of Minimally Invasive Transforaminal Lumbar Interbody Fusion 270
- Decision Making in Selecting Different Approaches of Interbody Fusion 271
- Indications for Transforaminal Lumbar Interbody Fusion 272
- Clinical Outcome and Fusion Rate of Minimally Invasive Transforaminal Lumbar Interbody Fusion 273

41. Association of Lateral Recess Stenosis with Lumbar Disc Herniation 275
PS Ramani, Sumeet Pawar, Sudhendoo Babhulkar
- Results 277

42. Minimally Invasive Space Shuttle Laminotomy for Degenerative Lumbar Spinal Canal Stenosis 279
Shunji Asamoto
- Anatomy of Ligamentum Flavum 279
- Surgical Technique of Minimally Invasive Space Shuttle Laminotomy 279

SECTION 6: COMPLICATIONS IN SURGERY FOR LUMBAR DISC HERNIATION

43. Diagnosis and Management of Discitis Following Lumbar Disc Surgery **285**
Kourosh Karimi Yarandi, Abbas Amirjamshidi
- Epidemiology 285
- Pathophysiology 285
- Diagnosis 286
- Clinical Findings 286
- Paraclinical Evaluations 286
- Biopsy and Culture 287
- Management 289
- Prophylaxis and Prevention 289
- Prognosis 290

44. Failed Back Surgery Syndrome in Lumbar Disc Herniation **292**
Deepak Ranade
- Classification of Failed Back Surgery Syndrome Based on Time of Occurrence 293
- Surgery 294
- Common Clinical Problems 295
- Presenting Clinical Features 296
- Criteria 296
- Unhappy Patient 296

45. Recurrent Disc Herniation **298**
Mehmet Zileli
- Etiology 298
- Epidemiology 298
- Diagnosis 299
- Treatment 299
- Complications 299
- Outcome 299
- Avoiding Recurrence 301

46. Complications in Surgical Management of Lumbar Disc Herniation: Past and Present **303**
Cumhur Kilincer
- Scope of the Chapter 303
- Evolution of Lumbar Discectomy 303
- Success and Complication Rates of Discectomy 304
- Vision Loss 305
- Wrong-Site Surgery 305
- Dural Tear and Cerebrospinal Fluid Leakage 306
- Vascular Injury 307
- Bowel Injury 309
- Ureter Injury 310
- Neurologic Injury 310
- Epidural Hematoma 311
- Ogilvie's Syndrome 311
- Infection 311
- Recurrent Disc Herniation 313
- Textiloma/Granuloma 313
- Failed Back Surgery Syndrome 313

SECTION 7: FOLLOW-UP

47. Short-term Results of Microlumbar Discectomy for Herniated Lumbar Intervertebral Disc **321**
Sumeet Pawar, Adil Chagla, PS Ramani
- Material and Methods 321
- Operative Technique 323
- Results 325
- Discussion 326

48. Long-term Follow-up of Surgical Patients of Microlumbar Discectomy **328**
PS Ramani, Shradha Maheshwari, Sudhendoo Babhulkar, Sumeet Pawar
- Methodology 328
- Material 328
- Patients Seen with Recurrent Disc Prolapse 330
- Analysis of Data 330
- Evaluation of Data 331
- Discussion 332

49. Long-term Results of Surgery for Lumbar Disc Herniation **335**
George Dohrmann, Nassir Mansour
- Patient Selection 335
- Results 335
- Discussion 337
