Contents

1. Advances in Understanding of Pathophysiology and Management of Diastolic Heart Failure **1**

Kanu Chatterjee

Clinical Definition 1; The Risk Factors 2; Pathophysiology 3; Diagnosis 6; Management 6

2. Cardiovascular Pharmacogenetics **11**

Josephine H Li, Geoffrey S Ginsburg, Deepak Voora

Principles of Pharmacogenetics 12; HMG-CoA Reductase Inhibitors 13; Thienopyridines 19; Aspirin 25; Warfarin 26; Diuretics 29; Beta-Blockers 30; Antiarrhythmic Drugs 34

3. Advances in Clinical Lipidology **50**

Byron F Vandenberg

Genetics 50; Lipid Metabolism 53; Epidemiology 56; Risk Assessment and Biomarkers 58; Risk Assessment and Imaging for Subclinical Atherosclerosis 62; Current Therapies 65; Emerging Therapies 75

4. Advances in Peripheral Arterial and Aortic Diseases **88**

Tonga Nfor, Suhail Allaqaband, Tanvir Bajwa

Lower Extremity Peripheral Artery Disease 88; Subclavian Artery Disease 106; Cerebrovascular Disease 106; Renal Arterial Disease 110; Mesenteric Ischemia 114; Aortic Aneurysm and Dissection 115

5. Stem Cell and Gene Therapy in Cardiology **137**

Eric Fuh, Yerem Yeghiazarians

Stem Cells 138; Types of Stem Cells 139; Stem Cell Clinical Trials 142; Routes of Administration 149; Mechanisms of Action 150; Gene Therapy 151; Mechanism of Action 151; Limitations of Viral Delivery Vectors 152; Potential Clinical Targets 153; Novel Approaches 154

6. Endovascular Treatment of Acute Stroke: Advances and Disappointments **165**

James D Rossen

Limitations of Intravenous Tissue Plasminogen Activator 165; Techniques of Endovascular Recanalization in Acute Stroke 166;

Clinical Benefit, Brain at Risk and Time to Reperfusion 166; Intra-arterial Pharmacologic Thrombolysis 167; First Generation Thrombectomy Devices 167; Clinical Impact of Ischemic Penumbra Imaging and Endovascular Intervention Studies 168; Second Generation Thrombectomy Devices: Stent Retrievers 169; Randomized Trials of Endovascular Therapy for Acute Stroke 172; Limitations of Endovascular Therapy Trials and Lessons Learned 174

7. Recent Advances in Percutaneous Structural Heart Interventions 177

Hjalti Gudmundsson, Phillip A Horwitz

Advances in Valvular Heart Disease Management 177; Advances in Nonvalvular Structural Heart Disease 184

8. Advances in Catheter-based Treatment of Coronary Artery Disease 198

Ankur Vyas, Saket Girotra

Advances in Stent Technology 198; Advances in Pharmacotherapy 200; Advances in Coronary Lesion Assessment 203; Advances in Applications of PCI 207; Appropriateness of PCI 219

9. Cardiac Computed Tomography: Technical Advancements and Future Applications 230

Amandeep S Dhaliwal, Gardar Sigurdsson

Engineering and Postprocessing Improvements 230; Radiation 234; Anatomical versus Functional Diagnosis of Coronary Disease 237; Cardiac CT Perfusion Imaging 239; Cardiac CT and Risk Stratification of Acute Chest Pain 243; Cardiac CT in Risk Stratification of Stable Chest Pain 244; Cardiac CT and Diastolic Dysfunction 245; Cardiac CT and Systolic Dysfunction 247; Cardiac CT and Coronary Allograft Vasculopathy 247; Cardiac CT and Evaluation of Valve Disease 248

10. Advances in the Treatment of Arrhythmias 253

Yiming Wu, Alexander Mazur

Advances In Implantable Cardiac Devices 253; Atrial Fibrillation 260

Index 275
