Contents

1. Medical Education 1

Basic Principles of Education *1*; What to Know? *3*; Patchy Knowledge *5*; Syndromes and Signs *5*; Books to Follow *6*; Learning in the Age of Superspecialization *7*; Value of Nonclinical Subjects *9*; Recent and Old Knowledge *10*; What to do and why to do? *11*; Bedside Case Presentation *11*; Maintenance of Records *12*; Daily Note *13*; Group Answer *14*; Group Examination *14*; Learning by Overhearing *15*; Thesis *16*; Appearing an Interview *16*; Examinations and Failure *17*; Duty in OPD, Indoor and Casualty *19*; Teaching Hospital *20*; Problem Solving and New Ideas *21*; Undergraduate Teaching *22*

2. Diagnosis 23

General Errors 23

Reaching at a Diagnosis *23*; Going through the Treatment Papers at the Beginning *24*; Taking History and Examining the Patient Repeatedly *25*; One Track Mind *26*; Inability to Use Common Sense *28*; Assemble all the Points to Come to a Conclusion *31*; Conversion Reactions *32*

Errors in Analysis of Symptoms 32

The Chief Complaints *32*; Uncommon Manifestations of Common Diseases/Common Manifestations of Uncommon Diseases *33*; Inadequate Family History/Community History *35*; Extramarital Sexual Contact *35*; Sexual/Genital Problem in Females *36*; Missing Menstrual History/Obstetrics History *36*; History of Rheumatic Fever *37*; History of Animal Bite *38*; Dry Cough *38*; Noninfective Causes of Fever *38*; True Convulsion and Pseudoconvulsion *39*; Hemoptysis and Hematemesis *40*; Bleeding Piles and Bacillary Dysentery *41*; Evaluation of Chest Pain and Abdominal Pain *41*

Errors in Elicitation of Signs 42
Comfort of the Patient *42*; Privacy of the Patient *43*; Examining a Patient under Treatment *43*; Method of Examination *44*; Doubtful Findings *45*; Missing the Obvious *45*; Jumping for a Conclusion *47*; Blood Pressure Recording *47*; Low Blood Pressure *51*; Respiration *51*; Bradycardia *53*; Pulse Deficit *54*; Irregularly Irregular Pulse *55*; Regular Rhythm with Normal Heart Rate *55*; Tachycardia *55*; Temperature *56*; Jugular Venous Pulse *58*; Gag Reflex *59*; Ninth and Tenth Cranial Nerve *60*; Limitations of Sensory Examination *60*; Romberg Test *61*; Common Errors in Motor System Examination *61*; All Paraplegia is not Due to Spinal Cord Disease *62*; Interpretation of Vocal Resonance *63*; Limitations of Physical Findings in a Respiratory Case *64*; Red Urine *65*; Cannon Wave and Cannon Sound *65*; Inspecting Excreta in your Own Eye *66*; Anemia and Hypoproteinemia *68*; Mass in Left Iliac Fossa *69*; Intestinal Obstruction *69*; Examination of Genitalia *70*; Per Rectal Examination *70*; Looking for a Turning Point *71*; Hurried Examination *72*

3. Investigations 73
Investigating without Proper Planning *73*; Prioritizing the Investigations *73*; Timing of Investigation *75*; Challenging a Report *76*; Why we Get Wrong Reports? *81*; Collection of Samples *83*; A Report may be an Eye Opener *86*; Limitations of Investigations *88*; Giving Opinion on Investigations without Seeing the Patient *91*; Persistence of Abnormal Report *92*; Test of Choice *93*; Urgent Evaluation of Certain Cases *94*; Influence of Treatment on Investigations *95*; Tests to Monitor Disease Course *96*; Harmful Tests *98*; Tests in Woman *98*; Precautions before Testing *99*; Common Mistakes in ECG Interpretation *100*; Diagnosis of Diabetes Mellitus *101*

4. Management 102
Chloromycetin Therapy *102*; Aminoglycoside Therapy *103*; Restless Patient *103*; Prevention of Bedsore *105*; Prevention of Fecal Impaction *105*; Prescription

Over Phone *106*; Prescribing without Seeing the Patient *107*; Incomplete Prescription *107*; Many Drugs in One Prescription *108*; Prescribing in Pregnancy *109*; Prescribing in Lactation *114*; Drugs and Renal Failure *115*; The Decision of not Treating an Illness *122*; Poisoning *123*; Intakes and Output *128*; Putting Ryle's Tube in a Patient of Tetanus *128*; Issuing Discharge Certificate *129*; Interdepartmental Referral *130*; Dealing with Death *131*; Brought Dead *137*; Filling-up the Death Form *138*; Left and Right *138*; Hypoglycemia *139*; Physical Verification of the Drugs *140*; New Complaint while on Treatment *141*; Adverse Drug Reactions *142*; Control of Vomiting *144*; Diarrhea with Dehydration *145*; Food and Water in ARF *148*; Treatment of Hypokalemia *149*; Incurable Disease *149*; Chronic Disease *150*; Motivating to Complete ATT *150*; Pregnancy and Diseases *151*; Drugs Changing the Color of Urine *152*; Long-term Treatment *152*; Drugs Worsening an Illness *153*; Snakebite *154*; Unknown Bite *156*; Drug Interaction *156*; Mode of Drug Administration *158*; Benefit of Doubt *159*; Ryle's Tube in Corrosive Poisoning *160*; Treatment Precedes Diagnosis *160*; Care of Old People *161*; Wrong Ideas about Insulin *162*

5. Bedside Procedures **165**

Administration of Intravenous Fluid *165*; Blood Transfusion *169*; Maintaining Asepsis *174*; Administration of Local Anesthetics *175*; Test for Bleeding Time and Clotting Time *175*; Look for Patency *176*; Keep the Patient under Observation *176*; Lumbar Puncture *176*; Feeding through Nasogastric Tube *179*; Parenteral Alimentation *182*; Pleural Aspiration *184*; Peritoneal Aspiration *186*; Pericardiocentesis *188*; Aspiration of Amebic Liver Abscess *191*; Catheterization of Bladder *192*; Removal of the Catheter *194*; Carotid Sinus Massage *196*; Cardiac Massage *197*; Intramuscular Injections *198*; Medical Certificate of Cause of Death *202*
