CONTENTS

1. Terminology **1**

2. Principles of Animal Use **9**

3. CPCSEA Guidelines (Committee for the Purpose of Control and Supervision on Experiments on Animals) **14**

CPCSEA guidelines for laboratory animal facility *15*
Animal experimentation involving hazardous agents *17*
Environment *23*
Animal husbandry *24*
Activity *27*
Food *27*
Bedding *28*
Water *29*
Sanitation and cleanliness *29*
Assessing the effectiveness of sanitation *31*
Standard operating procedures (SOPs)/guidelines *33*
Anesthesia and euthanasia *35*

4. Regulatory and Ethical Considerations **46**

Public health service policy on humane care and use of laboratory animals *46*
The 3 Rs *47*
Animal use requirements *48*

5. Euthanasia **50**

AVMA guidelines on euthanasia *55*
General considerations *60*
Modes of action of euthanatizing agents *64*
Inhalant agents *66*
Noninhalant agents *78*
Barbituric acid derivatives *79*

Pentobarbital combinations *81*
Chloral hydrate *81*
Tricaine methanesulfonate (MS-222, TMS) *82*
Potassium chloride in conjunction with prior general anesthesia *82*
Unacceptable injectable agents *84*
Physical methods of euthanasia *84*

6. Anesthesia and Analgesia 109
Anesthesia *110*
Anesthetic monitoring of rodents *118*
Adult rats *121*
Neonatal rats (up to 14 days old) *125*
Rabbit *129*
Assessment of analgesia *135*
Signs of pain *136*
Efficacy of various anesthetics and analgesics in commonly used rodent species *138*
Experiment guidelines for the prevention, assessment and relief of pain and distress in laboratory animals *142*

7. Experimental Animals 149
Animal identification methods *150*
Basic information about working with mice *151*
Basic information about working with rats *161*
Basic information about working with rabbits *170*

8. Injection and Blood Withdrawal Techniques 183
Gavage *185*
Injection techniques *187*
Vehicles for administration *191*
Blood withdrawal techniques *198*
Cardiac puncture *237*
Puncture of the central artery of the ear *238*

9. Protocol Development Strategies 240
Team approach and shared responsibilities *240*
Pilot studies *243*
Sample size *244*
Pain and distress *245*

Using animal behavior to monitor animal health *255*
Humane endpoints *256*
Euthanasia *259*
Experimental hazards *262*

10. Toxicology **265**
OECD guidelines for testing of chemicals *265*

11. Screening Models **273**
Simple screening *274*
Blind screening *274*
Programmed screening *274*
Psychotropic and neurotropic activity *275*
Anticonvulsant activity *280*
Anti-aggressive activity *283*
Drug effects on learning and memory *289*
In vivo methods for anti-inflammatory activity *298*

Bibliography *307*
Index *313*
