CONTENTS

Chapter 1. **Introduction** 1

Chapter 2. **Position of the Patient and Transducer** 11

Chapter 3. **M-Mode and Doppler Examination** 24
M-mode 24
Doppler echocardiography 29

Chapter 4. **Echocardiographic Evaluation of Cardiac Chambers** 41
Global systolic function 41

Chapter 5. **Acyanotic Congenital Heart Disease** 46
Atrial septal defect (ASD) 47
Ventricular septal defect (VSD) 51
Common atrioventricular canal 56
Patent ductus arteriosus (PDA) 58
Pulmonary stenosis (PS) 60
Congenital left ventricular outflow obstruction (LVOT) 62
Aortic stenosis 63
Coarctation of aorta 64

Chapter 6. **Cyanotic Heart Disease** 66
Transposition of great arteries (D-TGA) 66
L-TGA 68
Tetralogy of Fallot 69

Tricuspid atresia 72
Total anomalous pulmonary venous return (TAPVR) 74
Truncus arteriosus 76

Chapter 7. **Acquired Valvular Disease** 79
Rheumatic heart disease 79
Mitral stenosis (MS) 81
Mitral regurgitation 83
Mitral valve prolapse 85
Aortic regurgitation 88
Tricuspid regurgitation 90
Tricuspid stenosis 92

Chapter 8. **Cardiac Infections** 93
Infective endocarditis 93
Pericardial disease 96

Chapter 9. **Disease of Myocardium** 101
Cardiomyopathy 101
Trauma 112

Chapter 10. **Pediatric Echocardiogram Report and its Pitfalls** 113
Errors 113

Chapter 11. **Fetal Echocardiography** 117
Indications 118
Equipment 118
Anatomic imaging 120

Chapter 12. **Neonatal Echocardiography** 128
Persistent pulmonary hypertension (PPHN) of newborn 129
Ductal flow 129
Atrial shunting 130
Cardiac functions and output 130
Functional echocardiography 131

Chapter 13. **Echocardiography in Intensive Care Unit** 138
Why echo in ICU? 138
Preload assessment: Prediction of volume responsiveness 138
Practical evaluation of LV systolic function 141

Index *151*
