Contents

1. Basic Applied Anatomy **1**

- Lumbar Disc *1*
- Interlaminar Space *2*
- Ligamentum Flavum *3*
- Epidural Space *3*
- Epidural Veins *5*
- Lumbar Neural Foramen *5*
- Far-lateral Space *6*
- Disc Prolapses and Sites *6*

2. Preoperative Preparations **10**

- Positioning *10*
- Level Marking *13*
- Preparation of Operating Site *15*

3. Operative Techniques with Case Examples **16**

- Interlaminar Approach *16*
  - Lateral Disc Prolapse—Lower Level *16*
  - Centrolateral Large Disc Prolapse with Lateral Canal Stenosis *52*
  - Lateral Disc Prolapse—Upper Level *75*
- Migration *84*
  - Inferior Migration of Large Fragments—Central and Lateral *84*
  - Inferior Migration—Central *92*
  - Superior Migration—Lateral *98*
- Recurrent Disc Prolapse *105*
  - Recurrent Disc Prolapse (Acute and Small) *105*
  - Recurrent Disc Prolapse (Chronic and Large) *113*
  - Far-lateral Disc Prolapse (Shoulder Approach) *123*
  - Far-lateral Disc Prolapse (Axillary Approach) *130*
  - Foraminotomy and Discectomy (Axillary Approach) *131*

4. On-table Complications **136**

- Dural Tear *136*
- Epidural Venous Bleed *139*

5. Steps to Prevent Epidural Fibrosis **142**

6. Epidural Medications **143**

7. Micro Lumbar Double-hook Retractors **144**

8. Instruments **148**

9. Microscopes and Magnifying Loupes **155**

10. Final Thoughts **157**
