Preface		**v**
Acknowledgements		**vi**
Contributors		**ix**
Case 1	Stress urinary incontinence	1
Case 2	Mixed urinary incontinence	5
Case 3	Continued incontinence after sling surgery	11
Case 4	Stress incontinence and intrinsic sphincter deficiency	19
Case 5	Stress incontinence and elevated voiding pressures	25
Case 6	Stress incontinence and neurological dysfunction/urodynamic loss of compliance	33
Case 7	OAB and history of anti-incontinence procedure in the past	39
Case 8	Refractory OAB and moderate prolapse	47
Case 9	OAB and small capacity	53
Case 10	OAB and pain with filling	61
Case 11	Post-cystectomy prolapse	65
Case 12	Recurrent vesicovaginal fistula	71
Case 13	Recurrent vesicovaginal fistula in hydradenitis patient	75
Case 14	Urethral diverticulum	79
Case 15	Vaginal prolapse and diabetes mellitus	83
Case 16	Symptomatic urethral diverticulum and incontinence	89
Case 17	Lower urinary tract symptoms in a young female	93
Case 18	Elderly female with pelvic organ prolapse	97
Case 19	Extruded vaginal mesh	101
Case 20	Tender periurethral vaginal mass	107
Case 21	Sling perforation into urethra	111

Case 22	Vaginal mesh perforation into bladder	115
Case 23	Elderly woman with isolated pelvic organ prolapse	121
Case 24	Firm vaginal mass	125
Case 25	Primary bladder neck obstruction in the female	129
Case 26	Vesicovaginal fistula	135
Case 27	Post sling obstruction	141
Case 28	Recurrent vaginal prolapse after mesh repair	147
Case 29	Recurrent anterior vaginal wall prolapse	151
Case 30	Stress incontinence, voiding dysfunction and rectocele	155
Case 31	Vaginal pain after vaginal mesh placement	163
Case 32	Vesicouterine fistula	167
Case 33	Sacrocolpopexy complication	171
Case 34	Refractory overactive bladder and moderate prolapse	173
Case 35	Young female with uterovaginal prolapse	179
Case 36	Mesh extrusion after abdominal sacrocolpopexy	183
Case 37	Transvaginal mesh complication	187
Case 38	Neobladder-vaginal fistula	191
Case 39	Stress incontinence in a patient not interested in a synthetic sling	195
Case 40	Periurethral mass after bulking agent injection with obstructive voiding symptoms and stress incontinence	199
