Contents

1. Basic Considerations for Porcelain Laminate Veneers **1**
Definition 1
History and Clinical Results 1
Advantages and Disadvantages 2, 3
Indications and Contraindications 3, 5
Factors Affecting the Final Results 7

2. Diagnosis and Treatment Planning **9**
Understanding People's Concerns and Needs 9
Establishing What Dental Problems May be Present 9
Planning Laminate Veneers 11
Understanding the Nature of Form 12
Providing Initial Treatment 17

3. Clinical Procedures for Tooth Preparation and Veneer Cementation **19**
Tooth Preparation 19
Gingival Retraction 25
Impression Taking 26
Postoperative Bleaching: Optional 28
Shade Selection and Other Information 29
Provisional Restorations 30
Try-in 32
Bonding and Cementation 34
Finishing and Polishing 38
Maintenance and Repairs 40

4. Laboratory Procedures for the Fabrication of Porcelain Laminate Veneers **44**
Choice of Methods 44
Refractory Die Technique 45
Making the Master Cast 45
Making the Refractory (Working) Cast 46

Preparatory Firing of the Refractory Cast 48
Porcelain Build-up, Firing and Glazing 50
Removal of Porcelain Veneers from the Refractory Dies 52
Postseparation Correction 54
Etching the Fitting Surfaces 57
Delivery of the Porcelain Laminate Veneers 61
