Contents

1. Background and History **1**

- *Definition of Social Epidemiology 1*
- *History of Social Epidemiology 2*
- *Significant Concepts of Social Epidemiology 3*
- *Guiding Concepts in Social Epidemiology 5*
- *Counterfactual Challenges to Social Epidemiology 18*

2. Issues Related to Effect of Social Determinants on Disease 25

- *Theories of Disease Causation 25*
- *Social and Psychological Factors and Health 28*
- *People, Places and Health 32*
- *The Social Causes of Disease: Biological Pathways 33*

3. Identification and Analysis of Health Disparities 41

4. Theories and Constructs 50

- *Psychosocial Theory 51*

5. Fundamental Measurement Issues in Social Epidemiology 66

Part 1: Measures of Disease Frequency 66

- *Mathematical Quantity 68*
- *Epidemiological Quantity Measurement 72*
- *Prevalence 74*
- *Comparing Disease Occurrence 76*

Part 2: Measures of Socioeconomic Status 79

- *Socioeconomic and Health 80*
- *Socioeconomic Status Measurement 80*

Part 3: Measuring Poverty 86

Part 4: Measuring Health Inequities 96

- *Reasons for Health Inequities 97*
- *Barriers in Concepts and Paradigms 98*

Part 5: Measuring Racial Inequities 100

- *Race and the Evolution of Ideas of Racial Difference 101*

6. Fundamental Design and Analysis Tools in Social Epidemiology **111**

- *Community-based Participatory Research 112*
- *Definition and Principles of CBPR 113*
- *Utility, Possibilities and Potential Outcomes of CBPR 119*
- *Process of Community-based Participatory Research 124*
- *Key Challanges of Community-based Participatory Research 127*
- *Reflections on CBPR Challenges in Practice 131*
- *Whether CBPR Useful? 134*
- *Network Methods in Social Epidemiology 135*
- *Basic Network Concepts 137*
- *Identifying Social Interactions 144*
- *Multilevel Studies 153*
- *Multilevel Models 156*
- *Experimental Social Epidemiology-controlled Community Trials 160*
- *Natural Experiments and Instrumental Variable Analyses in Social Epidemiology 166*

7. Use of Social Epidemiology **177**

- *Identifying the Relevant Contexts 202*
- *The Family Level 204*
- *Investigating General and Specific Contextual Effects from a Longitudinal, Life-Course Perspective, and Across Generations 208*
- *Developing Quasi-Experimental Family-based Designs for the Analysis of Causal Effects in Observational Multilevel Analyses 209*

Self-Evaluation Questions *213*
