Contents

Section 1: Principles and Practice of Infertility

1. Practical Management of Infertility: An Appoach Based on 1,118 Pregnancies Recorded Over 12 Years of Experience 3

Section 2: Endocrinology of Ovulation and Induction of Ovulation

2. Applied Physiology of Ovulation 21
3. Applied Physiology and Endocrinology of Ovulation: In Vitro Maturation of Oocytes and Follicles in Clinical Practice 38
4. Endovaginal Sonography in Normal Reproductive Cycle: Follicular Dynamics and Endometrial Dating 45
5. Hyperinsulinemia 60
6. Metformin 75
7. Troglitazone, Rosiglitazone and Pioglitazone in PCOS 82
8. Clinical Management of Polycystic Ovary Syndrome 88
9. Alternate Medicine in Hyperinsulinemic Insulin Resistance 95
10. Simplified Protocol for Ovulation Induction Employing Estrogen Receptor Modulators and Enzyme Modulators 106
11. Dopamine Agonists in Hyperprolactinemia 111
12. History of Gonadotropin Hormones in Human Reproduction: Urinary and Recombinant Gonadotropins 123
13. Luteinizing Hormone in Ovulation Induction 130
14. GnRH Agonists 135
15. GnRH Antagonists 147
16. Medical Management of Hirsutism 150
17. Better Understanding of Corpus Luteal Pathology 158

Section 3: Operative Laparoscopy in Infertility and Gynecology

18. Operative Laparoscopy: Preparations, Anesthesia, Equipment and Instrumentation 171

19. Endometriosis and Infertility 203
20. Myomectomy 217
21. Operative Laparoscopy in Ovarian and Paraovarian Tumors (Period of Study: 1996 to 2003) 230
22. Ultrasound and Color Doppler Diagnosis and Operative Laparoscopy Management of Ectopic Gestation 240
23. Management of Ectopic Gestation: 13 Years of Experience on Operative Laparoscopy for Ectopic Pregnancy 251
24. Laparoscopic Tubal Implantation for Proximal Tubal Block and Reversal of Sterilization 259
25. Simplified Technique of Total Laparoscopic Hysterectomy 265

Section 4: Modern Obstetrics Trends

26. Diabetes in Pregnancy 281
27. Gestational Diabetes: Successful Management by Insulin and Oral Hypoglycemic Agents 288
28. Drug Teratogenesis 299
29. Routine Screening for Chromosomal Aneuploidies at 10 to 14 Weeks 309
30. Color Doppler Study of Fetal Vascular Anatomy and Fetal Echocardiography 326
31. Ductus Venosus and Middle Cerebral Artery Doppler 341
32. Intrauterine Fetal Growth Restriction 352
33. Gestational Trophoblastic Disease 373

Section 5: Hormones in Gynecology

34. Changing Concepts in Management of Perimenopause 385
35. Menopause 391
36. Postmenopausal Estrogen Replacement Therapy 400
37. Progestins in Gynecology 413
38. Hormone Contraception 429

Section 6: Concept of Selective Enzyme Modulation

39. Concept of Selective Enzyme Modulation 449
40. Therapeutic Revolution by Selective Estrogen Enzyme Modulators 457
41. Selective Estrogen Receptor Modulator 468
42. Tibolone 475
