Contents

CLINICAL CONSIDERATIONS

1. *"I cannot pass urine"*
   Acute Retention of Urine **1**
   Common pitfalls 1, Can acute retention be prevented? 2, Must a patient wait for treatment until he develops acute retention? 4, Is there any harm in delaying treatment? 6, Near normal sized gland: Does the patient need treatment? 8, Medical (nonoperative) treatment of enlarged prostate 10, Can enlargement of prostate be prevented? 13, Acute retention: What to do? 13, Catheterization 14, Pitfalls in catheterization 15, When you fail to pass the catheter 17, Leaking of urine around the catheter 19, Choice of surgery: Open prostatectomy vs TUR-P 19, Recurrence of symptoms following TUR-P 22, BPH and sexual function 23, Acute retention in females 23, Acute retention in children 24, Cancer of the prostate 25.

2. *"I pass excess urine"*
   Frequency of Urination **27**
   Rule out UTI (Urinary Tract Infection) 27, Rule out diabetes and congestive heart failure 27, Rule out residual urine 28, Frequency-urgency syndrome: The overactive bladder (OAB) 30.

3. *"I have pain and burning during urination/I have pus in my urine"*
   Clinical Aspects of Urinary Tract Infections **34**
   Important principles and pitfalls 34, UTI in children (Males and Females) 35, UTI in children: A menace to the kidneys 36, UTI and females 39, Diagnostic difficulty: Collection of proper urine sample 39, Principles of treatment of UTI in females 40, UTI in pregnancy 42, Choice of antibiotics 42, Silent UTI in pregnancy 43, Conditions

Contd...

that mimic UTI 43, UTI and adult males 43, Prostatitis (acute and chronic): Genital/pelvic pain syndrome 45, UTI and diabetes mellitus 46, UTI and use of alkalizers 47, "I have pus in my urine" 47.

4. *"I have blood in my urine"*
Hematuria **49**
Believe the patient 49, Sudden, spontaneous, gross hematuria and clot retention 50, Drug-induced hematuria 50, Pain and hematuria 51, Exercise and hematuria 51, Hematuria following trauma 51, Hematuria and normal IVP 52, Drugs to stop hematuria 52, Blood in the semen (Hematospermia) 52.

5. *"I have severe pain in my abdomen"*
Renal (Ureteric) Colic **53**
Making the initial diagnosis 53, What to do? Management of acute colic 55, Should diuresis be induced in acute ureteric obstruction due to stone? 55, Investigations: X-ray KUB/Ultrasound/IVP 56, Choosing a treatment modality for stone removal 57, Ureteric stones 58, Kidney stones 60, Bladder stones 63, Alkalizers and prevention of recurrent stone formation 63.

6. *"I have pain in my scrotum"*
Painful Scrotal Swelling: **64**
Testicular Torsion *vs* Epididymo-orchitis
Diagnostic clues 65, Pain in a 'normal' testis: Stone in the ureter? 66.

7. *"My scrotum is enlarged"*
Painless Scrotal Swelling: **67**
Hydrocele and Hernia *vs* Testicular Tumor
Timing of operation (in infants and children) 69, Varicocele 70.

8. *"My child does not have testes*
Undescended Testes **71**
Diagnostic pitfall: All absent testes are not undescended testes 71, Why is the treatment necessary? 73, Ideal time for treatment 74, Medical treatment 74.

Contd...

9. *"My child screams while passing urine"*
Phimosis **75**
Phimosis in the older age group 75, Paraphimosis 76.

10. *"My child passes urine in bed"*
Bed-wetting (Nocturnal Enuresis) **77**
Investigations 77, Treatment 78.

11. *"I cannot hold urine/I leak urine in my clothes*
Incontinence of Urine **79**
The elderly male 79, The multiparous female 80, Incontinence common in both sexes and all age groups 81, Miscellaneous cases 82.

12. *"I have sexual weakness"*
"I don't have children"
Impotence and Infertility **84**
Impotence 84, Pitfalls 85, Investigations 85, Guidelines for treatment 85, Infertility 87, Common pitfalls 87, What is normal semen 88, What to do and what not to do 88, In vitro fertilization (ICSI—Intracytoplasmic Sperm Injection) 89, Sperm processing and intrauterine insemination (IUI) 89, Insemination by donor semen 89.

13. **HIV and AIDS** **90**
What are HIV and AIDS? 90, How does HIV infection occur 91, How HIV is not transmitted? 93, How does infection with HIV lead to AIDS? 93, How does a person with AIDS die? 94, Risk of transmission of HIV from the patient to the doctor 94, Universal precautions for health workers 94, What are universal precautions? 95, Procedure in the event of contamination with infected blood 96.

14. **Some Harmless Urological Conditions** **97**
Simple renal cysts 97, Anatomical anomalies of kidneys 98, Silent stone 99, Prostatic calculi 100, Sebaceous cysts of the scrotum 100.

Contd...

INVESTIGATIONS AND PROCEDURES

15. **Common Urological Investigations** **101**
Urine examination 101, Timing and method of urine collection 101, Special situations: Tuberculosis and malignancy 103, Blood urea and serum creatinine 103, PSA 104, Ultrasound examination 105, X-ray KUB and IVP 106, Uroflometry 106.

16. **Common Urological Operations** **109**
Cystoscopy 109, Optical urethrotomy for stricture of urethra 112, Transurethral resection of prostate (TUR-P) 113, Some other new methods for treatment of enlarged prostate 115, Other uses of TUR 116, TUR of bladder tumors 117, Operations for urinary stones 118, D-J stenting 121.
