Contents

Section 1: Medical Aspect of Diabetic Foot

1. Diabetes Mellitus—A Clinical Challenge 3
2. Top Ten Countries for Number of Adults with Diabetes 4
3. Epidemiology of the Diabetic Foot 5
4. Economical Burden of the Diabetic Foot Ulcer 6
5. Pathway to Diabetic Foot Ulcer 7
6. Factors Associated with Foot Ulcer 8
7. Pathophysiology of Foot Ulceration 9
8. Diabetic Peripheral Neuropathy 10
9. Types of Peripheral Neuropathy 11
10. Tests for Peripheral Neuropathy 12
11. Vibration Test 13
12. Biothesiometer or Neuro-esthesiometer 14
13. Other Tests for Peripheral Neuropathy 15
14. Neuropad (Autonomic Test) 16
15. Neuro-osteoarthropathy (Charcot Foot) 17
16. Indications for a Neurological Referral in Patients with Suspected Diabetic Sensorimotor Neuropathy 18
17. Oral Symptomatic Therapies in Painful Diabetic Neuropathy 19
18. Peripheral Arterial Diseases 20
19. Stages of Peripheral Arterial Disease 21
20. Chronic Critical Ischemia 22
21. Classification of Peripheral Arterial Disease 23

22. Interpretation of the Ankle-brachial Index 24
23. Computed Tomography Scan Angiogram of Lower Limbs 25
24. Transcutaneous Oxygen Monitor 26
25. Clinical Symptoms of Neuropathic and Ischemic Foot Ulcers 27
26. Neuroischemic Diabetic Foot (Mixed) 29
27. Diabetic Foot Infections 30
28. Risk Factors for Infection 31
29. Three Most Important Clinical Categories of Infections 32
30. Cellulitis 33
31. Deep Soft Tissue Infection 34
32. Chronic Osteomyelitis 35
33. Criteria for Diagnosis of Osteomyelitis 36
34. Typical Features of Diabetic Foot Osteomyelitis on Plain X-rays 37
35. Classification and Severity of Infection 38
36. Indications of Worsening Infection 39
37. Characteristics Suggesting a More Serious Diabetic Foot Infection and Potential Indications for Hospitalization 40
38. Factors that May Influence Choices of Antibiotics Therapy for Diabetic Foot Infections (Specific Agents, Route of Administration, Duration of Therapy) 42
39. Factors Potentially Favoring Selecting Either Primarily Antibiotics or Surgical Resection for Diabetic Foot Osteomyelitis 43
40. Antibiotic Regimens for Mild, Moderate, and Severe Diabetic Foot Infections 44

prelims_new.indd 18 2/7/2019 2:34:42 PM

41. Duration of Treatment for Infected Diabetic Foot 46
42. Wagner Classification 48
43. PEDIS Classification 49
44. The University of Texas Classification 51
45. SINDBAD Classification 52
46. Lower Extremity Threatened Limb Classification System 53
47. Ischemia: Clinical Category 54
48. Foot Infection: Clinical Category 55
49. Simple Staging of the Diabetic Foot 56
50. Consider the Whole Patient and not the Hole in the Patient to Ensure Effective Care of the Foot Ulcer 58
51. Foot Examination 59
52. Ulcer Assessment 60
53. Wound Bed 61
54. Examination of Edge, Wall, and Base 62
55. A Summary of the Management of Diabetic Foot Ulcer 63
56. Local Wound Treatment 65
57. Role of Debridement in Ulcer Management 66
58. Debridement Methods and Its Characteristics 67
59. Summary of Indications for Different Dressings/Devices 68
60. Ulcer Healing 69
61. Surgical Intervention in Severe Cases where Abnormal Pressure Distribution is Causing Persistent and Nonresolvable Ulceration 70
62. Biomechanics Factors and Footwear 71

prelims_new.indd 19 2/7/2019 2:34:42 PM

63. Plantar Pressure Reduction 72
64. Footwear and Offloading for the Diabetic Foot: An Evidence-based Guideline 73
65. General Guide to Footwear Based on Risk Status 74
66. Examination of the Insensate Diabetic Foot 75
67. The Diabetic Foot Ulcers: Outcome and Management 76
68. Global Burden of Limb Amputation 77
69. Preventing Diabetic Foot Amputation 78
70. Nonulcerative Pathology of Ulcers 79
71. Social Factors of the Diabetic Foot 81
72. Time is Tissue in the Diabetic Foot 82
73. Pathway to Clinical Care for Diabetic Foot Ulcer 83
74. Risk Categorization System 84
75. How to Prevent Foot Problems 85
76. Ulcer Prevention 86
77. Training of Health Care Workers 87
78. The Step-by-Step Diabetic Foot Project 88
79. Train the Foot Trainer Project 89
80. Organization of Foot Care 90
81. The Minimal Foot Clinic Model 91
82. Pathway of Refer for Foot Care 92
83. Tropical Diabetic Hand Syndrome 93
84. Algorithm for Management of Tropical Diabetic Hand Syndrome 94
85. Issues—Particular Importance in Developing Countries 95

prelims_new.indd 20 2/7/2019 2:34:42 PM

Section 2: Surgical Aspect of Diabetic Foot

86. Diabetes Mellitus—Surgical Challenge 99
87. Team Approach 100
88. Foot Salvage Surgery 101
89. Neuropathy and Surgery 102
90. Charcot Foot 103
91. Imaging in Charcot Foot 105
92. Indication for Surgical Treatment 106
93. Surgical Treatment for Charcot Foot 107
94. Choice of Surgical Procedures 108
95. Healing Time in Surgical Treatment of Charcot Foot 109
96. Complication of Surgical Treatment 110
97. Peripheral Arterial Disease and Surgery 111
98. How Peripheral Arterial Disease is Different in Diabetes than Nondiabetic Patients 112
99. Peripheral Arterial Disease, Transcutaneous Oxygen Pressure, and Surgery 113
100. Imaging Modalities 114
101. Selection of Type of Imaging 115
102. When and How to Treat Foot Gangrene When Revascularization is not Feasible 116
103. Selection of Type of Revascularization 117
104. Steps to Prevent Acute Kidney Injury in a Susceptible Patient 118
105. Use of Non-iodine Based Contrast 119

prelims_new.indd 21 2/7/2019 2:34:42 PM

106. Post-revascularization Treatment 121
107. Schedule for Antibiotics is as Follows 122
108. Post-revascularization Prevention 123
109. Necrotizing Fasciitis 124
110. Osteomyelitis 128
111. The Conservative Treatment of Osteomyelitis 129
112. Debridement in Patients with Infection and Vasculopathy 130
113. Conservative Management of Localized Gangrene 131
114. Factors That Influence Wound Closure Procedure 132
115. Factors That Retard Healing 133
116. Commonly Used Procedures within Each Surgical Category 134
117. Different Types of Dressing 138
118. Acute Wound Flowchart 139
119. Chronic Wound Flowchart 140
120. Skin Grafting in Diabetic Foot 142
121. Advantages of Split Thickness Skin Graft 143
122. Local/Regional Anesthesia for Diabetic Foot Surgery 145
123. Total Contact Cast for Diabetic Foot Patients 151
124. Advantages of Contact Casting in Diabetic Foot Ulcers 152
125. Contraindication for Total Contact Casting in Diabetic Foot Ulcers 153
126. Why Diabetes Patients Gets Bilateral Pedal Edema? 154
127. Wound Bed Preparation 155
128. Evolution of Time Frame Work 156

prelims_new.indd 22 2/7/2019 2:34:42 PM

129. Tissue Management Debridement 157
130. Selection of Types of Debridement 158
131. Types of Debridement 159
132. Callus Debridement in Diabetic Foot 162
133. Adhesive Felt for Offloading 164
134. Pressure Relief Gel Pads and Support 165
135. Deformed but Walkable Diabetic Feet 166
136. Vacuum-assisted Wound Closure 167
137. Footwear in Diabetes 170
138. Footwear Insole 171
139. Total Contact Orthosis 173
140. Rocker Outsole 174
141. Pathology Causing Toe Injuries due to Deformities and Poor Foot Care/Footwear 175
142. Guidelines for Footwear Prescription in Diabetes 176
143. Why Early Detection and Treatment of Critical Limb Ischemia 180
144. Fungal Infection in Diabetic Foot 181
145. Ten Commandments of Foot Care in Diabetes 182

Wound Care Mini: Glossary 183
Further Reading 187
