# Contents

## PART I: History and Scope of Medical Microbiology

1. **History of Medical Microbiology** *1*
   *Contributions of Louis Pasteur 1; Contributions of Robert Koch 2; Antimicrobial Agents 3; Discovery of Viruses 4; Nobel Laureates 5*
2. **Scope of Medical Microbiology** *6*
   *Microorganism 6; Microbiology and Patient 6; Microbiology and Healthy Individual 7; Microbiology and Community 7; Branches of Microbiology 7; Role of Medical Microbiology 7*

## PART II: Cellular and Molecular Microbiology

3. **Bacterial Morphology** *8*
   *The Bacterial Cell 9; Bacterial Spores 15; Classification of Bacteria 17; Techniques to Study Morphology of Bacteria 17*
4. **Nutrition and Growth of Bacteria** *22*
   *Nutrients 22; Oxygen and Carbon Dioxide 22; Temperature 23; Moisture and Desiccation 24; Bacterial Metabolism 24; Bacterial Growth 24*
5. **Bacterial Genetics** *27*
   *Mutations 29; Gene Transfer 29; Newer Approaches to Bacterial Genetics 32; Genetic Engineering 32*
6. **Bacteriophage** *38*
7. ***In Vitro* Cultivation of Bacteria** *41*
   *Bacteriological Media 41; Cultivation of Bacteria 43; Anaerobic Cultures 45*
8. **Identification of Bacteria** *46*

## PART III: Microbial Control and Mechanism of Pathogenicity

9. **Disinfection and Sterilization** *49*
   *Definitions 49; Physical Agents 49; Chemical Agents 53; Ideal Disinfectant 56; Combined Treatments 59*
10. **Antimicrobial Chemotherapy** *60*
    *Antiviral Drugs 62; Antifungal Drugs 62; Drug Resistance 63; Biochemical Mechanisms of Drug Resistance 63*
11. **Infection and Disease** *65*
    *Dynamics of Infectious Diseases 66*
12. **Microbial Pathogenicity** *69*
    *Pathogenic Microorganisms 69; Virulence Factors of Microorganisms 69*

## PART IV: Immunology

13. **Nonspecific Defenses of Host** *74*
    *Host-parasite Relationship 74; Resistance of Host to Microorganisms 74*
14. **Overview of Acquired Immunity** *78*

15. Functional Anatomy and Development of Immune System 82
16. Biology of Immune Response 85
*Dynamics of Antigen Elimination 85; Immune Response 85; Uses of Primary and Secondary Immune Responses 86; Factors Influencing Antibody Production 87*
17. Antigen 88
18. Antibody 91
*Monoclonal Antibody (Hybridomas) 94*
19. Cells of Immune System 95
*Major Cells of Immune System 95*
20. The Complement System 100
21. Antigen-Antibody Reactions 105
*Precipitation 106; Agglutination 110; Complement Fixation Test 112; Neutralisation Tests 113; Immunofluorescence 114; Enzyme Immunoassays 115; Radioimmunoassay 115; Miscellaneous Tests 116; Opsonisation 117*
22. Hypersensitivity 118
*Type I Hypersensitivity 118; Type II Hypersensitivity 120; Type III Hypersensitivity 121; Type IV Hypersensitivity 122; Type V Stimulatory Hypersensitivity 123*
23. Immunodeficiency 125
24. Autoimmunity 128
*Major Histocompatibility Complex (MHC) 128; Autoimmunity 128*
25. Transplantation and Malignancy 131
*Tumour Immunology 132*
26. Blood Group Antigens 135

## PART V: Gram-positive Bacteria

27. Staphylococcus 139
*Species of Staphylococcus 139; Staphylococcus aureus 139; Coagulase Negative Staphylococci 146; Staphylococcus epidermidis 146; Staphylococcus saprophyticus 146; Micrococcus 147; Planococcus 147*
28. Streptococcus 148
*Streptococcus pyogenes 149; Other Pathogenic Streptococci 154; Group C and G Streptococci 155; Group D Streptococci 155; Viridans Streptococci 156*
29. Pneumococcus 158
30. Corynebacterium 162
*Corynebacterium Diphtheriae 162; Other Corynebacteria 167*
31. Mycobacterium 169
*Mycobacterium tuberculosis 169; Tests for Confirmation of Identity 175 Mycobacterium leprae 178; Atypical Mycobacteria 181; Mycobacteria Producing Skin Ulcers 182; Saprophytic mycobacteria 183*
32. Bacillus 184
*Bacillus anthracis 184; Anthracoid bacilli 187; Bacillus cereus 187; Bacillus stearothermophilus 188; Other Bacillus Species 188*
33. Clostridium 189
*Clostridium botulinum 190; Clostridium difficile 192; Clostridium perfringens 193; Clostridium novyi 196; Clostridium septicum 196; Other Histotoxic Clostridia 197; Clostridium tetani 197*
34. Actinomycetes 200
*Actinomycosis 200; Nocardiosis 201; Actinomycotic Mycetoma 202*

## PART VI: Gram-negative Bacteria

35. **Neisseria** 203
*Neisseria meningitidis 203; Neisseria gonorrhoeae 206; Other Neisseriae 208*

36. **Haemophilus** 209
*Haemophilus influenzae 209; Other Haemophilus Species 212; Gardnerella vaginalis 213*

37. **Bordetella** 214
*Bordetella parapertussis 217; Bordetella bronchiseptica 217; Bordetella avium 217*

38. **Brucella** 218

39. **Enterobacteriaceae** 222
*Escherichia coli 224; Klebsiella 228; Proteeae 228; Other Members of Enterobacteriaceae 230*

40. **Salmonella** 232
*Enteric Fever 235; Salmonella Gastroenteritis 240; Salmonella bacteraemia with Focal Lesions 240*

41. **Shigella** 241

42. **Yersinia** 245
*Yersinia pestis 245; Yersinia pseudotuberculosis 248; Yersinia enterocolitica 249*

43. **Vibrio** 251
*Vibrio cholerae 251; V. parahaemolyticus 256; Aeromonas 256; Plesiomonas 257*

44. **Pseudomonas** 258
*Pseudomonas aeruginosa 258; Other Species of Pseudomonas 260; Burkholderia mallei 260; Burkholderia pseudomallei 260; Burkholderia cepacia 260*

## PART VII: Spirochaetes and Other Bacteria

45. **Treponemes** 261
*Treponema 262; Treponema Pallidum 262; Pinta 269; Endemic Syphilis 270*

46. **Leptospira** 271

47. **Borrelia** 274
*Borrelia vincenti 275; Lyme Disease 275*

48. **Mycoplasma** 276

49. **Chlamydia** 278
*Psittacosis 280; Trachoma 280; Lymphogranuloma venereum 280*

50. **Rickettsia** 282
*Epidemic Typhus 284; Brill-Zinsser Disease 284; Endemic or Murine Typhus 284; Scrub Typhus 284; Trench Fever (Quintana Fever) 285; Rocky Mountain Spotted Fever 285 Q-fever 285; Laboratory Diagnosis of Rickettsial Diseases 286; Ehrlichia 287; Rochalimaea 287*

51. **Non-sporing Anaerobes** 288
*Anaerobic Gram-negative Bacilli 288; Bacteroides, Prevotella and Porphyromonas 288; Fusobacteria and Leptotrichia 290; Anaerobic Gram-positive Bacilli 290; Anaerobic Cocci 290; Peptostreptococcus and Peptococcus 290; Veillonella and Acidaminococcus 291; Spiral Shaped Motile Anaerobes 291*

52. **Legionella** 292
*Legionella pneumophila 292*

53. **Campylobacter and Helicobacter** 294
*Helicobacter pylori 295; Gastrospirillum hominis 296*

**54. Miscellaneous Bacteria** *297*
*Pasteurella multocida 297; Actinobacillus 297; Francisella tularensis 297; Streptobacillus moniliformis 298; Spirillum minus 298; Listeria monocytogenes 298; Erysipelothrix rhusiopathiae 299; Calymmatobacterium granulomatis 299; Eikenella 299; Cardiobacterium 300; Chromobacterium 300; Achromobacter 300; Capnocytophaga 300; DF-2 Bacteria 300; Flavobacterium meningosepticum 300; Kingella 300; acinetobacter 301; Alcaligenes 301; Bartonella 301*

**55. Normal Microbial Flora of the Human Body** *302*
*Sites with Normal Flora 303*

## PART VIII: General Virology

**56. Nature and Classification of Viruses** *306*
*Viroids 308; Prions 308*

**57. Morphology of Viruses** *209*

**58. Replication of Viruses** *313*
*Release 314; Defective Viruses 315*

**59. Cultivation and Assay of Viruses** *316*

**60. Genetics of Viruses** *320*
*Mutations 320; Genetic Recombination Between Viruses 320; Interaction Between Viral Gene Products 320; Genetic Variation in Nature 321; Viral Vectors 321*

**61. Viral Pathogenesis and Host Response** *322*
*Pathogenicity of Viruses 322; Host Response to Viral Infections 323*

**62. Oncogenic and Teratogenic Viruses** *328*
*Oncogenic Viruses 328; Teratogenic Viruses 329*

## PART IX: DNA Viruses

**63. Adenoviruses** *330*
*Adenoviruses Associated Defective Viruses 332*

**64. Herpesviruses** *333*
*Herpes Simplex Virus 334; Varicella-zoster Virus 336; Cytomegalovirus 337; Human Herpesvirus 6 339; Human Herpesvirus 7 340*

**65. Poxviruses** *341*
*Smallpox 341; Human Monkeypox 342; Cowpox 342; Buffalopox 342; Tanapox 343; Milker's Nodules 343; ORF 343; Molluscum contagiosum 343*

**66. Papovaviruses** *344*
*Human Papillomaviruses 344; Human Polyomaviruses 345*

**67. Parvoviruses** *346*

## PART X: RNA Viruses

**68. Picornaviruses** *348*
*Poliovirus 348; Coxsackieviruses 351; Echoviruses 352; Enteroviruses Types 68-72 353; Enterovirus 71 353; Rhinoviruses 353*

**69. Paramyxoviruses** *355*
*Measles 355; Mumps 357; Infections Caused by Parainfluenza Viruses 359; Infections Caused by Respiratory Syncytial Virus 359*

70. Orthomyxoviruses 361
*Avian Influenza (Bird Flu) 364*
71. Retroviruses 367
*Human T Cell Leukaemia Viruses 367; Human Immunodeficiency Virus 368*
72. Rhabdoviruses 382

## PART XI: Multiple Viral Complexes

73. Viral Hepatitis 389
*Hepatitis A Virus 389; Hepatitis B Virus 391; Hepatitis C 396; Hepatitis E 397; Hepatitis D 398; Hepatitis G 399; Hepatitis F 400; Overview of Viral Hepatitis 400*
74. Arboviruses 401
*Definition 401; Virology of Common Arboviruses 401; Togaviridae 402; Bunyaviridae 402; General Clinical Features 403; Laboratory Diagnosis of Arboviruses 404; Arboviral Diseases in India 404; Dengue Fever and Dengue Haemorrhagic Fever 405; Kyasanur Forest Disease 406; Chikungunya Virus 407*
75. Miscellaneous Viruses 408
*Rubella 408; Rotavirus 410; Coronaviridae 411; Arenaviridae 412; Lymphocytic Choriomeningitis 413; Argentinian Haemorrhagic Fever 413; Bolivian Haemorrhagic Fever 413; Lassa Fever 413; Filoviruses (Ebola and Marburg Virus) 413*

## PART XII: Mycotic Infections

76. Medical Mycology 415
*Spore Formation in Fungi 416; Economic Importance of Fungi 419; Mycoses 419; Tinea Versicolor 419; White Piedra (Piedra Alba) 420; Black Piedra (Piedra Nigra) 420; Dermatophytes 421; Dermatophytids (ID Reaction) 424; Paracoccidioidomycosis 424; Blastomycosis 425; Histoplasmosis (Darling's Disease) 426; Candidiasis 427; Mycetoma 429; Cryptococcosis 430; Rhinosporidiosis 431; Sporotrichosis 432; Coccidioidomycosis 433; Opportunistic Fungi 434; Otomycosis 435; Fungal Contaminants 435; Absidia Species 436; Mucor Species 436; Rhizopus Species 436; Septate Contaminants 437; Dematiaceous Contaminants 437; Alternaria Species 437; Cladosporium (Hormodendrum Species) 437; Curvularia Species 438; Penicillium Species 438; Mycotoxicosis 438; Immunodiagnosis of Fungal Infections 438*

## PART XIII: Applied Microbiology

77. Microbiology of Water, Milk and Air 440
*Examination of Milk 444; Bacteriological Examination of Milk 445; Examination of Milk for Specific Pathogens 446; Examination of Air 446*
78. Nosocomial Infections 448
*Role of Microbiology Laboratory in Prevention and Control of Nosocomial Infections 450*
79. Blood Transfusion Associated Infections 452
*Blood Culture 453*
80. Quality Assurance in Microbiology 455
81. Immunoprophylaxis Against Infectious Diseases 458
*Vaccine 458; Immunoglobulins and Antisera 460*

## PART XIV: Clinical Microbiology

**82. Laboratory Diagnosis of Important Clinical Syndromes** *462*

*Laboratory Diagnosis of Meningitis 462; Laboratory Diagnosis of Tetanus 465; Laboratory Diagnosis of Gas Gangrene 466; Laboratory Diagnosis of Urinary Tract Infections 467; Laboratory Diagnosis of Pertussis 468; Laboratory Diagnosis of Pyrexia of Unknown Origin 470; Laboratory Diagnosis of AIDS 472; Molecular Level Detection 474; Laboratory Diagnosis of Syphilis 474; Laboratory Diagnosis of Sore Throat 476; Laboratory Diagnosis of Cholera 478; Laboratory Diagnosis of Diarrhoeal Diseases (Gastroenteritis) 480; Laboratory Diagnosis of Acute Respiratory Infections (ARI) 484*

*Index* *489*
