CONTENTS

1. Introduction 1
2. History of Anaesthesia 6
3. Anaesthesiologist 24
4. Surgical Team 36
5. Safe Practice of Anaesthesia 46
6. Mechanics of Respiration 68
7. Oxygen and Anaesthesia 89
8. Operating Department 111
9. Anaesthesia Machine 123
10. Operating Table and Positions Used for Surgery 140
11. Basic Skills 144
12. Clinical Anaesthesia 177
13. Preanaesthetic Assessment 182
14. Preanaesthetic Medications 200
15. Balanced Anaesthesia (In Modern Practice) 207
16. Anaesthesia and Vital Organs 213
17. Guidelines for Emergency Abdominal Surgeries 242
18. Perioperative Anaestetic Complications 247
19. Maintenance of Airway in an Unconscious Patient 258
20. Recovery Room Guidelines 265
21. Postoperative Nausea and Vomiting (PONV) 282
22. General Anaesthesia 293
23. Assessment of Blood Loss during Surgery and Volume Replacement 306
24. Regional Anaesthesia 318
25. Central Neural Block 325
26. Theatre Asepsis and Sterilization of Equipments 349
27. Day Care Anaesthesia 368
28. Some Commonly Used Procedures, Equipments and Drugs 371
29. Cardiopulmonary Cerebral Resuscitation (CPCR) 385
