Contents

1. Assessment of Higher Mental Functions **1**
GRK Sarma, Madhusudanan M

Overview of Mental Status Examination 1
Assessment of State Functions 3
Pictorial Pretest 3; Physiological Basis 3; Methodology and Observations 6; Interpretation 8; Caveats 8; Answers to the Pretest 8
Language Disorders 9
Definitions Important in Language Assessment 9; Physiologic Basis 10; Methodology 11; Observations 13; Interpretation 14
The Apraxias 19
Pictorial Pretest 19; Physiological Basis 20; Methodology 25; Interpretation 25; Answers to the Pretest 26
Calculations 28
Calculations and Related Parietal Lobe Functions (Finger Identification, Right-Left Orientation) 28
The Agnosias 31
Physiologic Basis 31; Methodology 33; Interpretation 35; Caveats 36
Memory 38
Pretest 38; Physiologic Basis 39; Methodology 40; Interpretation 43; Caveats 44; Answers to the Pretest 44
Construction and Dressing 45
Pictorial Pretest 45; Construction 45; Dressing 47; Answer to the Pretest 48
Tests for Higher Order Thinking (Reasoning, Abstraction, Judgment, and Executive Functions) 49
Physiologic Basis 49; Methodology 49; Judgment, Insight, and Social Appropriateness 50
Mini-mental Status Examination 51
Methodology 51; Interpretation 53; Caveats 53

2. Examination of a Patient in Coma **60**
Raghunandan Nadig, GRK Sarma

Pictorial Pretest 60; Physiological Basis 62; Examination of the Comatose Patient 63; Level of Consciousness 64; Breathing 65; Circulation 66; Motor Response to Stimulus 72; Answers to the Pretest 75

3. Cranial Nerves **76**
GRK Sarma, Seshu Babu G

The Olfactory Nerve (I N) 76
Physiologic Basis 76; Definitions 77; Methodology 77; History 77; Examination Technique 78; Interpretation 78; Caveats 79

The Optic Nerve (II N) 80
Physiologic Basis 80; Methodology 82; Answers to the Pretest 93; Clinical Interpretation 99
Ocular Motor Nerves (III, IV and VI) 104
Pictorial Pretest 104; Ocular Motor Nerves 104; Physiologic Basis of Ocular Motor System 106; Certain Terms and Rules 108; Answers to the Pretest 116; Examination of Pupils and Lids 117; The Pupils 119; Eyelids 133; Answers to the Pretest 1 135; Answers to the Pretest 2 136; Answers to the Pretest 3 137
Examination of Gaze Disorders 138
Pretest 138
Saccades 139
Physiologic Basis 140; Methodology 143; Interpretation 144; Answers to the Pretest 147
The Pursuit System 148
Smooth Pursuit System 150
Vergence System 152
Physiologic Basis 152; Methodology 153; Interpretation 153
Nystagmus 154
Physiologic Basis 154; Methodology and Observations 158; Interpretation 161; Caveats 162
Trigeminal Nerve (V N) 163
Pictorial Pretest 163; Physiological Basis 163; Motor Nucleus 166; Sensory Portion 167; Trigeminal Nerve Divisions 167; Examination Method 171; Answers to the Pretest 174
The Facial Nerve (VII N) 176
Methodology 177; Interpretation 179; Caveats 180
Vestibulocochlear Nerve (VIII N) 181
Physiological Basics 181; Cochlear Nerve 183; Vestibular Nerve 185; Nystagmus in Vestibular Lesion 188; Some Practical Points 189
Glossopharyngeal Nerve (IX N) 191
Physiologic Basis 191; Methodology 192; Interpretation 193; Caveats 193
Vagus Nerve (X N) 194
Physiologic Basis 194; Methodology 197; Interpretation 197
Accessory Cranial Nerve (XI N) 200
Pictorial Pretest 200; Physiological Basis 200; Methodology 203; Interpretation 203; Caveats 204; Answers to the Pretest 204
Hypoglossal Nerve (XII N) 206
Pictorial Pretest 206; Answer to the Pretest 211

4. Motor System **212**
GRK Sarma

Muscle Tone 214; Assessment of Muscle Power—General Principles 223
Scapular Movements 228
Scapular Abduction and Forward Rotation 229; Scapular Elevation 231; Scapular Adduction 232; Scapular Depression and Adduction 233; Shoulder Flexion 235; Shoulder Abduction 239; Shoulder Internal Rotation 243

Examination of Forearm and Hand 244
Elbow Flexion 244; Forearm Supination 247; Forearm Pronation 248; Wrist Flexion 249; Metacarpophalangeal Extension 252; Finger Flexion at Proximal and Distal Interphalangeal Joints 253; Testing of Distal Interphalangeal Flexion 254; Finger Metacarpophalangeal Extension 255; Finger Abduction 256; Finger Adduction 257; Thumb Movements 258; Thumb Extension 260; Thumb Abduction 261; Thumb Adduction 263; Thumb Opposition 264; Little Finger Opposition 265
Examination of Power of Lower Limb Muscles 266
Hip Flexion 266; Hip Extension 267; Hip Adduction 268; Hip Abduction 269; Hip External Rotation 270; Hip Internal Rotation 271; Knee Flexion 272; Knee Extension 273; Ankle Plantar Flexion 275; Foot Dorsiflexion and Inversion 276; Foot Inversion 277; Foot Eversion 278; Toe Metatarsophalangeal Flexion 279; Toes Plantar and Distal Interphalanges Flexion 280; Toe Dorsiflexion 281

5. Examination of the Sensory System 283
GRK Sarma

Proprioception 284
Physiologic Basis 284; Methodology 285; Other Tests 286; Interpretation 287
Vibration 287
Physiologic Basis 287; Methodology 288; Interpretation 289
Tactile Sensation 291
Methodology 291; Pain and Temperature 292; Segmental Localization of Sensory Loss 294

6. Reflexes 299
GRK Sarma

Deep Tendon Reflexes 299; Superficial Reflexes 307; Superficial Abdominal Reflex 307; Superficial Anal Reflex 308; Bulbocavernosus Reflex 308; Cremasteric Reflex 309; Plantar Reflex and the Babinski Sign 309; Pathologic or Primitive Reflexes 314; Pictorial Pretest 314; Primitive Reflexes 315; Grasp Reflex 315; Primitive Oral Reflexes 317; Palmomental Reflex 318; Answers to the Pretest 319

7. Examination of Coordination 320
GRK Sarma

Basic Principles 321; Testing of Station/Stance 323; Past Pointing 325; Position Holding 326; Finger-to-Nose Test 327; Heel-Knee-Toe Test 328; Dysdiadochokinesis 329; Rebound Test 330

8. Examination of Gait 332
GRK Sarma

Gait Assessment 332; Interpretation 335; Caveats 338

9. Examination of Movement Disorders 339
GRK Sarma

General Approach to Movement Disorders 339; Tremor 344;

Archimedes Spiral Drawing (Spirography) 350;
Dystonia 353; Chorea 359; Myoclonus 364; Tics 371

10. Clinical Evaluation of Seizures and Epilepsies **376**
Elisabeth Hartl, Soheyl Noachtar

Seizure Semiology 376
Pictorial Pretest 376; Physiological Basis 378; Answers to the Pretest 386

11. Examination of a Patient with Vertigo **388**
GRK Sarma, Thomas Mathew

Physiologic Basis 389; Ocular Alignment and Ocular Tilt Reaction 390; Subjective Visual Vertical (Bucket Test) 391; Head Heave Test 393; Examination of Eye Movements 393; Gaze-evoked Nystagmus 394; Head-Shaking Nystagmus 395; Hyperventilation-induced Nystagmus 396; Vibration-induced Nystagmus 397; Valsalva-induced Nystagmus 397; Positional Testing 398; The Vestibulo-ocular Reflex 402; Head Heave Test (Translational VOR) 404

12. Autonomic Nervous System **407**
GRK Sarma

Pictorial Pretest 407; Introduction 408; Heart Rate Response to Breathing 411; Bedside Orthostatic Test (Active Standing) 412; Valsalva Maneuver 414; Answers to the Pretest 415

13. Examination of a Patient with Neck Pain **417**
GRK Sarma

Pictorial Pretest 417; Examination of a Patient with Neck and Arm Pain 418; Answers to Pretest 425

14. Examination of a Patient with Low Back Pain **426**
GRK Sarma

Physiological Basis 426; Examination 431; Interpretation 433

15. Examination of Other Joints **436**
GRK Sarma

Shoulder Joint 436; Sacroiliac Joint 440; Knee Joint 443

16. Examination of Trigger Points **451**
GRK Sarma

Myofascial Pain 451

17. Neurological Examination of a Neonate **458**
Chandrakala BS

General Examination 460; Posture 460; Involuntary and Spontaneous Movements 461; Neurobehavioral Items 462; Fontanelles, Sutures and Head Circumference 463; Tone 464; Reflexes 470; Central versus Neuromuscular Hypotonia 473; Cranial Nerve Examination 473; Summary of Age Related Neurological Examination Findings in Neonates 475

18. Pediatric Neurological Examination **477**
Sushma K, Ranjini Srinivasan

General Principles of Pediatric Neurological Examination 477; General Physical Examination in Pediatric Neurology 478

Index *497*
