Manual of CORNEA

Contents

1. Development of Cornea 1
2. Anatomy of Cornea 4
3. Stem Cells 12
4. Physiology of Cornea 20
5. Note on DNA and RNA 25
6. Abnormalities of Cornea 31
7. Corneal Vascularisation 44
8. Corneal Edema and Bullous Keratopathy 53
9. Corneal Wound Healing 62
10. Chemical Burns 71
11. Dry Eye Syndrome 85
12. Ocular Surface Disorder 104
13. Fungal Corneal Ulcer 107
14. Basic Virology 119
15. Corneal (and Eye) Lesions due to Virus 123
16. Herpes Simplex 131
17. Antiviral Drugs 147
18. Punctate Keratitis 153
19. Interstitial Keratitis (Basics) 159
20. Parasitic Infestations 165
21. Deficiency State 170
22. Age Changes 174

23. Peripheral Corneal Diseases 176
24. Corneal Degeneration 189
25. Corneal Dystrophies 196
26. Corneal Pigmentation and Deposits 217
27. Thesaurismoses 226
28. Limbal Tumors 238
29. Keratoplasty 250
30. Refractive Surgeries of Eye 282
31. Prosthokeratoplasty 312
32. Immunology and Hypersensitivity Reaction 326
33. Confocal Microscopy 335
34. Corneal Topography 341
35. Sutures and Suturing 353
