Contents

1. General Pharmacology **1**
- Some Terminologies *1* • Bioavailability *2*
- Drug Antagonism *6* • Drug Agonism *8*
- Muscarinic Cholinergic Receptors *9* • Ion Channel Receptors *13*
- Biotransformation *15* • Second Messengers *18*
- Adverse Drug Reactions *19*

2. General Anesthetics **24**
- History *24* • Physiological Effects of General Anesthetics *24*
- Components of General Anesthesia *25*
- Minimum Alveolar Concentration *25*
- Mechanism of Anesthesia *27*
- General Principles of Inhalational Anesthesia *27*
- Clinical Signs of Anesthesia (Based on Ether Anesthesia) *27*

Common Anesthetics **29**
- Halothane *29* • Isoflurane *30* • Enflurane *31*
- Desflurane *31* • Sevoflurane *32* • Nitrous Oxide *32*
- Xenon *33* • Therapeutic Gases *34*

3. Parenteral Anesthetics **35**
- Ideal Anesthetic (IV) agent *35* • Barbiturates *36*
- Propofol *37* • Etomidate *38* • Ketamine *39*
- Midazolam *41* • Fentanyl *41*
- Total Intravenous Anesthesia *42* • Conscious Sedation *44*
- Role of α_2-Receptor Agonists (Clonidine and Dexmedetomidine) in Anesthesia *44*

4. Hypnotics and Sedatives **46**
- Definitions *46* • History *46* • Classification *46*
- Mechanism of Action *47* • Benzodiazepines *47*
- Barbiturates *49* • Newer Hypnotics *50* • Buspirone *51*
- Comparative Study of Commonly Used Drugs *51*

5. Skeletal Muscle Relaxants **53**
- Classification *53*
- Features Common to All Muscle Relaxants *53*
- Pharmacokinetics *54*

6. Drugs Used in Reversal of Neuromuscular Block **61**
- History *61* • Classification *61* • Mechanism of Action *61*
- Pharmacokinetics *62*

7. Anticholinergic Drugs Used in Anesthesia **65**
- Actions of Prototype Drug Atropine *65*
- Pharmacokinetics *66* • Preanesthetic Medications *67*

8. Nonsteroidal Anti-inflammatory Drugs **68**
- History *68* • Pathophysiology *68*
- Classification *69* • Mechanism of Action *69* • Aspirin *70*
- Other Salicylates in Use *72*
- Acetaminophen (Paracetamol) *72*
- Indomethacin *73* • Sulindac *73* • Tolmetin *74*
- Ketorolac *74* • Nabumetone *74* • Diclofenac *74*
- Ibuprofen *74* • Other Propionic Acid Derivatives *75*
- COX-2 Selective NSAIDs *75*
- Comparative Study of Some Commonly Used Analgesics *76*
- Patient-controlled Analgesia *77*
- Common Adverse Effects of NSAIDs *77*

9. Centrally Acting Analgesics/Opioids **78**
- Endogenous Opioid System *78* • Opioid Receptors *79*
- Codeine *82* • Pethidine/Meperidine *82* • Fentanyl *83*
- Remifentanil *83* • Methadone *83* • Tramadol *83*
- Uses of Morphine and Congeners *84* • Agonist Antagonists *84*
- Opioid Antagonists *85* • Drug Interaction *86*
- Points to Note *86*

10. Local Anesthetics **87**
- History *87* • Structure *87*
- Mechanism of Action *88* • Pharmacokinetics *88*
- Cocaine *89* • Lidocaine *89* • Bupivacaine *89*
- Clinical Preparation *90* • Features of Amide LA *91*
- Molecular Mechanism of Action *94* • Regional Anesthesia *94*
- Epidural Block *99*

11. Drugs Used in Nausea and Vomiting **101**
- Classification *101*
- Comparative Study of Commonly Used Drugs *108*

12. Drugs Used in Peptic Ulcer Disease **109**
- Classification *109* • H_2 Antagonists *110*
- Proton Pump Inhibitors *111* • Prostaglandin Analogs *112*
- Sucralfate *113* • Colloidal Bismuth *113* • Antacids *114*

13. Drugs Used in Treatment of Asthma **115**

Drugs for Bronchial Asthma **115**
- Definition *115*
- Classification of Drugs Used in Bronchial Asthma *116*
- Sympathomimetics *118* • Methylxanthines *120*
- Anticholinergics *122* • Glucocorticoids *122*
- Mast Cell Stabilizers *123*
- Leukotriene Pathway Inhibitors *123*
- K^+ Channel Openers *124*
- Treatment of Status Asthmaticus/Acute Severe Asthma *125*

14. Drugs Used in Cough **126**
- Pharyngeal Demulcents *127*
- Expectorants/Mucokinetics *127* • Mucolytics *127*
- Antitussives *127*

15. Drugs Acting in Cardiovascular System **129**

Pathophysiology of Shock and its Management **129**
- Types of Shock *129* • Compensatory Mechanisms *130*
- Treatment *130*

Vasodilators **134**
- Sodium Nitroprusside *134* • Glyceryl Trinitrate *135*
- Hydralazine *136* • Minoxidil *137*
- Vasodilators in Heart Failure *137*

β-Blockers **140**
- Classification *140* • Pharmacokinetics *141*
- Pharmacodynamics *142* • Uses of β-Blockers *143*
- Adverse Effects *143* • β-Blockers in Heart Failure *144*

Inotropic Agents and Vasoconstrictors **146**
- Adrenaline *146* • Noradrenaline *147* • Dopamine *147*
- Dobutamine *148* • Phenylephrine *148*
- Mephentermine *149* • Metaraminol *149*
- Midodrine *149* • Milrinone *149*

Drugs used in Hypertension **151**
- Causes *151* • Treatment *152* • Indications for Therapy *153*
- Blood Pressure Management Protocol *153*

Drugs Used in Ischemic Heart Disease **160**
- Drugs Used in Angina *160*
- Drug Therapy in Acute Myocardial Infarction *160*
- Clinical Pearl *161*

Diuretics **162**
- Osmotic Diuretics *164*
- Vasopressin Antagonists *165*

Pathophysiology of Renin–Angiotensin System **166**
- Components of Renin-Angiotensin System *166*

ACE Inhibitors **170**
- Characteristics *170* • Adverse Effects *171*

Angiotensin II Receptor Blockers (ARBs) **172**
- Actions *172* • Advantages *172* • Characteristics *172*

Calcium Channel Blockers **173**
- Mechanism of Action *173* • Verapamil *175*
- Cilnidipine *175*

Cardiac Glycosides **176**
- Mechanism of Action *176*

Cardiac Dysrhythmia and Antiarrhythmics **178**
- First-degree AV Heart Block *178*
- Second-degree AV Heart Block *178*
- Third-degree AV Heart Block *179*
- Wolff-Parkinson White Syndrome (Preexcitation Syndrome) *183*
- Lown–Ganong–Levine Syndrome *184*
- Classification of Antiarrhythmic Drugs *185*

16. Anticoagulants, Fibrinolytics and Antiplatelet Agents **187**
- Anticoagulants *187*
- Heparin Antagonist (Protamine Sulfate) *191*
- Platelet Inhibitors *191* • Fibrinolytics *193*

17. Drugs Used in Central Nervous System **195**

Drugs Used in Parkinsonism **195**
- Levodopa *195* • Dopamine Receptor Agonists *196*
- COMT Inhibitors *197* • Selective MAO Inhibitors *197*
- Muscarinic Receptor Antagonists *198*
- Drug-induced Parkinsonism *198*

Antidepressants **200**
- Mechanism of Action *201*
- Long-term Effects of Antidepressants *201*

Anesthetic Implications in Patients on Antiepileptic Drugs **205**

18. Drugs Acting on Endocrine System **206**

Antidiabetic Drugs **206**
- Preoperative Glycemic Goals *206*
- Insulin in Treatment of Diabetes *206*
- Methods of Insulin Therapy *207* • Diabetic Ketoacidosis *207*
- Hyperosmolar Nonketotic Coma *207*
- Hypoglycemia *208* • Oral Antidiabetic Agents *208*

Drugs Used In Thyroid Disorders **211**
- Antithyroid Drugs *211*

19. Oxygen Therapy and Humidification **213**
- Indications *213* • Techniques of Oxygen Therapy *213*
- Toxicity *215* • Humidification *215* • Antioxidants *217*

20. Drug Therapy in Special Cases **218**

The Pediatric Patients **218**
- Physiology in the Neonate and Pediatric Patients *218*
- Pharmacology of Anesthetic Drugs *221*

Patient with Chronic Renal Failure **222**
- Features Associated with Chronic Renal Failure *222*
- Preoperative Preparation *222* • Postoperative Follow-up *224*
- Dose Calculation in Impaired Renal Function *224*

Patient With Liver Dysfunction **225**
- Pathophysiological Changes Associated with Chronic Liver Disease *225*
- Preoperative Preparation *225*
- Postoperative Follow-up *226*

The Elderly Patient **227**
- Age-related Changes in Pharmacokinetics and Pharmacodynamics *227*
- Drugs with Reduced Renal or Hepatic Elimination in the Elderly *228*

21. Management of Emergency Situations **229**
- Acute Severe Asthma *229* • Hypertensive Crisis *229*
- Severe Laryngospasm *230* • Pulmonary Edema *231*
- Malignant Hyperthermia *231*
- Raised Intracranial Pressure *231* • Acute Adrenal Crisis *231*
- Thyroid Storm *232* • Cardiac Arrest *232*

Bibliography **234**

Index *235*
