CONTENTS

1. Definition 1
2. Epidemiology 3
3. Aetiopathology 5
   a. Causative agent 5
   b. Age of onset 7
   c. Sex affected most 7
   d. Risk factors 7
   e. Environmental factors 8
   f. Mode of transmission 8
   g. Incubation period 8
4. Pathogenesis 9
5. Stages of Poliomyelitis 11
   a. Acute Phase 11
   b. Convalescent or recovery phase 11
   c. Chronic or residual phase 11
6. Clinical Features 13
   a. Inapparent or subclinical infection 13
   b. Minor illness 13
   c. Non-paralytic polio 13
   d. Paralytic polio 15
7. Types of Paralytic Polio 17
   a. Spinal polio 17
   b. Bulbar polio 18
   c. Bulbospinal polio 20

8. Peculiar Features Seen in Polio 21
a. In the early stage 21
b. In the later stage 22
9. Diagnosis 26
a. Viral isolation 26
b. Serology 26
c. Cerebrospinal fluid (CSF) 26
10. Prognosis 27
11. Differential Diagnosis 29
12. Treatment 34
a. Preventive treatment 34
• Salk vaccine 34
• Sabin vaccine 35
b. Conservative treatment 36
c. Surgical treatment 37
• Tendon transplantation 37
• Release of contracture 37
• Arthrodesis 38
• Resection 38
• Tendon lengthening 38
• Osteotomy 39
13. Physiotherapy Treatment 40
a. Identification data 40
b. Chief complaint of the patient 41
c. History of the patient 41
d. On observation 42
• Local observation 42
• General observation 42

e. On examination 42
- **Local 42**
- **Palpation 43**
- **Motor examination 43**
  - **MMT 43**
  - **Range of motion 120**
  - **Superficial reflexes 146**
  - **Deep reflexes 146**
- **Sensory examination 149**
- **Postural examination 150**
- **Gait examination 154**

f. Treatment plan 160
- **Acute phase 160**
- **Recovery phase 175**
- **Chronic or residual phase 193**

14. Appliances for Polio Patient 203

Conclusion 209

Some of the Bio-electrical Modalities and Exercise Gadgets Used in Physiotherapy Department 211
