Contents

1. Anatomy of Structures Related to the Fundus **1**

2. Examination Techniques and Investigations **12**

3. Lesions of the Optic Nerve Head **45**

Swollen Optic Nerve Head (ONH) 48

Pale Optic Nerve Head 63

Excavations of the Optic Nerve Head 72

Anomalous Tissue on and around the Optic Nerve Head 78

Disks of Abnormal Size 85

4. Macula **88**

Thickening/Elevation of the Macula 90

Wrinkling of the Macula 105

Well-defined Red Lesions 112

Altered Pigmentation at the Macula 124

Scars 140

Predominantly Subretinal Lesions 142

Crystalline Deposits 155

Abnormalities in the Vasculature of the Macula 157

5. Lesion of the Retina **166**

Red Colored Lesions 167

Small, White Fluffy Lesions 169

Multiple Disseminated Yellowish Lesions 177

Extensive Well-demarcated White Lesions 193

Extensive Ill-defined Yellowish-white Lesions 200

Large Areas of Greyish-white Opalescence 208

Pigmented Lesions 215

Hypopigmented Fundus 237

6. Abnormalities in the Retinal Vasculature **242**

Diseases with Primarily Alterations in the Wall and Caliber of the Blood Vessels 244

Diseases with Primarily Abnormal Retinal Vessels 266

Diseases with Primarily Retinal Hemorrhages 281

Diseases with Primarily Retinal Exudates 298

7. Peripheral Retinal and Choroidal Lesions **309**

Cigar/Spindle Shaped Lesions Lying Circumferentially 311

Well-demarcated Red Areas 314

Cyst-like Lesions 321

Small Triangular Tent-like Lesions 322

Pigmented Lesions 323

Grey/White Lesions 324

Lesions due to Abnormal Architecture of the Oral Bay 328

8. Mass Lesions of the Fundus **329**

Brown Mass Lesions 330

White Mass Lesions 335

Reddish Orrange Mass Lesion 341

Yellow Mass Lesions 346

Grey Elevation 349

Diffuse Mass Lesions 364

Multifocal and Bilateral Mass Lesions 365

9. Lesions of the Vitreous **366**

Small Opacities, Allowing Good Retinal View 367

Medium Sized Opacities, Partially Hampering Retinal View 372

Large Opacities, Occluding Retinal View 379

Membrane-like Lesions 386
