Contents

Section I: Planning and Execution of Research

1. Planning Your Research **3**

2. Research Study Designs **17**

3. Ethical Issues of Research **45**

4. Hypothesis Development and Measurements **56**

5. Collecting Data and its Management **67**

Section II: Biostatistical Applications in Research

6. Sampling Issues in Research **91**

7. Describing Your Observations **103**

8. Assessment of Risk **114**

9. Analyze Your Observations: Check Statistical Significance **123**

10. Analyze Your Observations: Estimate Confidence Interval, Correlation and Regression **146**

11. Presenting Your Observations **158**

Section III: Concluding the Research

12. The Basis for Drawing Conclusions **173**

13. Sources of Error in Studies **184**

14. Writing the Thesis/Report **193**

Glossary ***203***

Appendices

Appendix I: *Table of Random Numbers* *215*

Appendix II: *Table of Probability from the Standard Gaussian Distribution (z test)* *216*

Appendix III: *Table of Critical Values for Chi-Square Distribution* *217*

Appendix IV: *Table of Critical Values for Student's t Distribution* *218*

Appendix V:	*Table of Student's t Distribution: Number of Observations for Level of t Test; Single-sample t Test and Paired t Test*	*219*
Appendix VI:	*Table of Student's t Distribution: Number of Observations for Paired t Test*	*221*
Appendix VII:	*Table of F Distribution*	*223*
Appendix VIII:	*Table of Critical Values for Wilcoxon-Mann-Whitney Two SampIe Rank Test*	*225*
Appendix IX:	*Table of Percentage Points for the Wilcoxon Signed Rank Sum Test*	*227*
Appendix X:	*Table of Critical Values of the Correlation Coefficient*	*227*
Appendix XI:	*Table of Critical Values of Spearman's Correlation Coefficient*	*228*
References		*229*
Index		*233*
