Contents

SECTION 1: Introduction, Technical Aspects and Approach

1. Technical Aspects of Chest Radiography in Pediatric Cardiac Patients 3
2. Radiographic Views 23
3. Systematic Assessment of Radiographic Film: Step-by-Step Approach 40
4. Classification and Radiographic Approach for Recognition of Congenital Heart Disease 49

SECTION 2: General Assessment

5. Radiographic Assessment of Thymus 61
6. Radiographic Assessment of Diaphragm 73
7. Assessment of Pulmonary Vascularity on Radiograph 97
8. Radiographic Evaluation of Pericardium on Chest Radiograph 141
9. Radiographic Assessment of Airways 158
10. Evaluation of Soft Tissue on Radiograph 187
11. Skeletal Survey in Cardiology 196
12. Cardiac Silhouette Assessment 242
13. Radiographic Assessment of Cardiac Size 269
14. Radiographic Assessment of Cardiac Chambers 295

SECTION 3: Congenital Heart Disease Evaluation

15. Radiographic Evaluation of Situs and its Abnormalities 329
16. Acyanotic Shunt Lesions 347
    - A. Atrial Septal Defect 347
    - B. Ventricular Septal Defect 363
    - C. Patent Ductus Arteriosus 376
17. Cyanotic CHD with VSD-PS Substrate (Tetralogy of Fallot Physiology) 389
    - A. Approach for Radiographic Evaluation of TOF and its Variants 389
    - B. Classical Tetralogy of Fallot and VSD-Pulmonary Atresia 398
    - C. Tetralogy of Fallot with Absent Pulmonary Valve Syndrome 422
    - D. Differential Diagnosis of TOF Substrate and Cardiomegaly 434

18. Cyanotic CHD with Increased Pulmonary Blood Flow (Admixture Lesions) 441
A. Transposition of Great Arteries 441
B. Total Anomalous Pulmonary Venous Connection 452
C. Truncus Arteriosus 467
19. Ebstein, Scimitar and Congenitally Corrected Transposition of Great Arteries 476
A. Ebstein's Anomaly and Related Disorders 476
B. Scimitar Syndrome (Congenital Venolobar Syndrome) and Variants 488
C. Congenitally Corrected Transposition of Great Arteries 505
20. Obstructive Lesions 519
A. Pulmonary Stenosis 519
B. Aortic Stenosis 531
C. Coarctation of Aorta 541
21. Pulmonary Arteriovenous Malformations and Related Lesions 553

SECTION 4: Differential Diagnosis

22. Pulmonary Artery Assessment and Differential of Pulmonary Artery Enlargement 571
23. Assessment of Aorta, Arch Sidedness and Differential Diagnosis of Aortic Enlargement 581
24. Radiological Evaluation of Left Heart Border on Frontal Film 602
25. Radiological Evaluation of Right Heart Border on Frontal Film 618
26. Evaluation of Cardiac Mass on Right Side (Dextrocardia) 635
27. Radiological Evaluation of Unusual Presence of Heart in Left Hemithorax 651
28. Differential Diagnosis for Wall-to-Wall Heart (Massive Cardiomegaly) 657
29. Differential Diagnosis of Rib Notching 667

SECTION 5: ICU and Postoperative Surgical Radiology

30. Radiological Evaluation of Cardiopulmonary Issues in Cardiac Intensive Care Unit 679
31. Radiographic Assessment of Catheters and Tubes in Cardiac Intensive Care Unit 710
32. Radiographic Assessment of Extracorporeal Membrane Oxygenation and Other Mechanical Support Devices 764
33. Radiographic Evaluation of Air Leak Syndromes and Air Trapping 784
34. Radiological Course for Operated (Surgical/Percutaneous/Hybrid) Cardiac Lesions 816

SECTION 6: Prosthesis Assessment on Radiograph (Percutaneous and Surgical)

35. A. Radiographic Evaluation of Occluders/Devices on Plain Radiograph 863
B. Radiographic Evaluation of Stents on Plain Radiograph 909
36. Pacemaker and Conduction Devices Evaluation on Radiograph 939
37. Radiological Evaluation of Percutaneous/Surgically Implanted Valve and Rings 968
38. Sternal Wire and Vascular Clips Assessment on Radiograph 985

SECTION 7: Miscellaneous

39. A. Radiographic Evaluation of Pulmonary Hypertension....1009
B. Radiographic Assessment in Eisenmenger Syndrome....1025
40. Utility of Targeted Barium Swallow (Esophagogram) in Present Era: Vascular Ring Assessment....1048
41. Cardiovascular Calcification Assessment on Radiograph....1059
42. Hemodynamic Assessment from Plain Radiographic Film....1078
43. Visible Signs and Patterns on Radiographs....1091
44. Mixed Bag Case Scenario....1127
