Contents

1. Basic Concepts 1
- Introduction 1
- Treatment Methodology 3
- The Attendant 16

2. Inflammation and Pain 18
- Inflammation 18
- Pain 25

3. Physical Agents 35
- A General Concept 35
- Classification of Physical Agents 38
- Modalities Available 41
- Effects, Indications and Contraindications 43

4. Physical Modalities 48
- Low Frequency Currents 49
- Faradic Type Currents 49
- Galvanic Type Currents 52
- Special Currents of LFC 60
- Medium Frequency Currents 65
- Interferential Currents 65
- Transcutaneous Electroanalgesic Nerve Stimulation Currents 78
- High Frequency Currents 85
- Introduction 85
- Cold Therapy 86
- Whirlpool 93
- Hydrocollator Packs 97
- Paraffin Wax Therapy 100
- Other Conductive Heat Modalities 104
- Infrared Radiations 111
- Ultraviolet Radiations 117
- Laser 129
- Microwave Diathermy 139

• Ultrasound 147
• Short Wave Diathermy 163

5. Other Conventional Physical Modalities 176
• Intermittent Compression Pump 176
• High Voltage Pulsed Galvanic Stimulation 178
• Spinal Traction 181

6. Advanced Electrotherapeutics 192
• Hyperstimulation 193
• Microcurrent Stimulation 196
• Strength Duration Mode TEANSC 197
• Extracorporeal Shock Wave Therapy 199
• Biofeedback 213
• Electromyograph 218

7. Equipment, Hazards and Safety 234
• The Equipment 234
• Hazards of Electrophysical Equipments 236
• Physiological Effects of a Shock 237
• The Safety 238
• Precautions 238
• Special Precautions 240

8. Bibliography 243
Index 247
