CONTENTS

1. Communication in Nursing **1**
- Introduction 1
- Importance of communication 2
- Anatomy of communication (structure) 3
- Physiology of communication (communication process) 4
- Factors influencing communication process 7
- Classification communication 12
- Verbal communication 12
- Nonverbal communication 14
- Therapeutic communication 17
- Non-therapeutic communication 19
- Nursing documentation as effective communication 23

2. Interpersonal Relations in Nursing **31**
- Introduction to interpersonal skills 31
  - Importance of interpersonal skills 31
  - Concepts of interpersonal behavior 32
  - Problems of interpersonal relations 33
- Teacher-student relationship 35
- Self concept and professional self 35
- Therapeutic use of self 37
- The johari window 38
- Characteristic of enhancing therapeutic relationship 39
- Stage of the nurse-client relationship 41

3. Human Relations in Nursing **44**
- Nature of human relations 44
- Evolution of human relations 45
- Human relations in ancient india 46
- Factors influencing human relation 47
- Tasks of human relations improvement 48
- Human relations in health care 53
- Human relation and self 54
- Groups dynamics 56
- Classification of groups 57
- Elements of groups behavior 58
- Types of health care groups 61
- Characteristics of effective groups 63

4. Principles of Education **65**
- Meaning of education 65
- Definition of education 67
- Types of education 69
- Philosophies of education 71
  - Meaning of philosophies 71

- – Important philosophies of education 72
- – Idealism 72
- – Naturalism 75
- – Pragmatism 78
- – Existentialism 82
- – Realism 83
- – Humanism 84
- – Eclectic tendency in education 86
- – Components of philosophy in nursing 87
- • Aims of education 91
- – Need for the aim in education 92
- – Factors determining educational aims 92
- – Educational aims in relation to time and space 93
- – Individual and social aims of education 93
- – Vocational aim of education 97
- – Cultural aim of education 99
- – The spiritual aim 100
- – Knowledge aim 103

5. Teaching – Learning Process **105**
- • Concept of teaching 105
- • Definitions of teaching 105
- • Nature of teaching 107
- • Characteristic of good teaching 108
- • Roles of the teacher in nursing 109
- • Functions of teaching 110
- • Principles of teaching 112
- • Maxims of teaching 113
- • Learning 113
- • Meaning and definitions of learning 114
- • Characteristics of learning 115
- • Domains of learning 115
- • Factors that influence learning 116
- • Relationships between teaching and learning 119
- • Teaching learning process in nursing 121
- • Premises of educational framework 123

6. Course Planning and Lesson Plan **126**
- • Introduction to course plan 126
- • The year plan 126
- • Unit plan 128
- • Unit planning in nursing courses 131
- – Selection and statement of objectives 132
- – Classification of objectives 133
- – Formulation of objectives 133
- – Selection of the unit plan 136
- – Selection of learning situation 136
- – Selection of the content or knowledge component 136
- – Organisation of the content of unit 137

– Selection of organizing centres 138
– Selection of method of evaluation 138
• Daily lesson planning 141
– Nature of lesson plan in teaching 141
– Definition of lesson plan 141
– Significance of lesson planning 142
– Characteristics of good lesson plan 143
– Teaching unit 143
– Teacher requirement in lesson plan 144
– Types of lesson plan 145

7. Methods of Teaching 151
• Introduction 151
• Methods of teaching used in nursing 151
– Lecturing as a teaching method 151
– Questioning as a teaching method 156
– Team teaching 159
– Demonstration as a teaching method 160
– Discussion as a teaching method 162
– Problem-discussion as a teaching method 166
– Project method 167
– Simulation in education 171
– Self-instruction module 175
– Micro teaching 179
– Programmed Instruction 184
• Methods of clinical teaching in nursing 187
– Laboratory method 189
– Nursing clinics 193
– Bedside clinic (as a method of clinical teaching) 195
– Nursing rounds (as a method of clinical teaching) 196
– Nursing care study 198
– Nursing assignment (as a method of teaching) 200
– Nursing care conference as a method of teaching 203
– Nursing team conference (as a method of teaching) 204
– Morning and afternoon report 207
– Team teaching conference 210
– Health team conference 210
– Individual conference 211
• Process recording as a method of clinical teaching 212
– The seminar as a method of teaching 217
– Case analysis method 219
– Case incident method 220
– Role play (as a teaching method in nursing) 221
– Field-trip (as a method of clinical teaching) 222

8. Educational Media 226
• Introduction 226
• Cone of experience 226
• Audio-visual aids in education 227
• Commonly used A-V aids 233

- Graphic teaching aids 233
  - Charts 234
  - Pictures 234
  - Diagrams 236
  - Maps 236
  - Graphs 237
  - Posters 238
  - Cartoons 239
  - Comic strips 239
  - Flash cards 240
- Display boards as teaching aids 241
  - Black board 241
  - Flannel board 244
  - Magnetic chalkboard 244
- None-projected teaching aids 245
  - Models 245
  - Objects and specimen 246
  - Exhibitions 248
  - Museums 249
  - Dioramas 249
- Activity teaching aids 251
  - Fields trips 251
  - Demonstration 252
  - Experiments 254
  - Dramatisation 255
  - Puppetry 255
- Auditory aids 256
  - Radio 256
  - Recording devices 257
- Still projective aids 260
  - Opaque projections 261
  - Slide and filmstrip projection 262
  - Overhead projection 264
- Motion pictures 266
  - Video 270
  - Television 271
- Computers as teaching aids 272

9. Evaluation in Nursing Education 276
- Introduction 276
- Definition of evaluation 276
- Purposes of evaluation 278
- Purposes of evaluation in nursing 278
- Characteristic of evaluation in nursing 279
- Types of evaluation 280
- Formative evaluation 280
- Summative evaluation 281
- Classification of evaluation techniques 281
- Examination 283
  - Purposes of examination 283

– Types of examination 284
– Essay type examination 284
– Objective type examination 287
– Short answer type items 289
– Alternate-response type tests 291
– Guideline for writing true false items 292
– Guideline for writing multiple choice items 295
– Matching type test items 297
– Oral examination 300
• Classification of clinical evaluation techniques 302
– Observation techniques 303
– Types of observation tools 304
– Checklist 304
– Anecdotal record 307
– Rating scale 309

10. Guidance and Counselling **314**
• Introduction 314
• Need for guidance counselling in nursing 314
• Meaning of guidance and counselling 315
• Scope of guidance and counselling in education 317
• Assumption of guidance and counselling 318
• Principles of guidance and counselling 318
• Types of guidance 320
• Educational guidance in nursing 322
– Objective of educational guidance 322
– Principles of educational guidance 323
– Classification of students and education guidance 323
– Identification of student problem 323
– Ethics in collecting guidance information 325
– Guidance folder and master register 325
• Stragies for educational guidance 326
• Phase of counselling 331
• Approaches to counselling 332
• Organisation of counselling services 337
• Issues/problems of guidance and counselling 345
• Student guidance and counseling in nursing 346

11. Health Education **351**
• Introduction 351
• Definition of health education 351
• Aims of health education 354
• Objectives of health education 354
• Role of health care provider 355
• Principles of health education 356
• New health practices 359
• Approaches to health education 361
• Planning for health education 364
• Methods and media for health education 364
