Contents

1. From Structure to Function: A Long Journey 1
Asim Kurjak, Milan Stanojević, Panagiotis Antsaklis

- Structural and Functional Development of Central Nervous System *1*
- Neonatal Aspect of Fetal Neurology *8*
- Postnatal Assessment of General Movements *10*
- Continuity of General Movements from Prenatal to Postnatal Life *11*
- Could Some Postnatal Signs of Neurological Disability be used Prenatally? *12*
- What is Kurjak's Antenatal Neurodevelopmental Test? *13*
- What have Studies about KANET Shown so Far? *17*

2. Morphological Approach to Cortical Formations 40
Ritsuko K Pooh

- Malformations of Cortical Development *42*
- Proliferation Disorders *43*
- Migration Disorders *46*
- Postmigrational Disorders *48*
- Future Perspective *50*

3. Fetal Cognitive Functions..... 53
Aida Salihagić Kadić, Asim Kurjak, Anja Šurina, Oliver Vasilj

- Fetal Neurodevelopment and Cognitive Functions *53*
- Prenatal Motor Development and Fetal Action *55*
- Prenatal Sensory Development and Fetal Perception of Stimuli *59*
- Learning and Memory in Fetal Life *61*
- Emotional Development of the Fetus *62*
- Fetal Stress and Cognitive Development *64*

4. Evolution of Assessment of Fetal Brain Function..... 71
Panagiotis Antsaklis, Maria Papamichail, Marianna Theodora, George Daskalakis, Asim Kurjak

- Fetal Central Nervous System: Stages of Development *71*
- Fetal Movements Evaluated by Ultrasonography *73*
- From Fetus to Neonate: The Progress of Neurobehavior *75*
- Introduction of Kurjak's Antenatal Neurodevelopmental Test *75*
- Review of Studies: 10 Years Experience of Kurjak's Antenatal Neurodevelopmental Test Application *78*

5. Brain Maturation and Development in Growth-restricted Fetuses: Functional Studies 89
Toshiyuki Hata, Riko Takayoshi, Aya Koyanagi, Yasunari Miyagi, Takahito Miyake

- Two-dimensional Sonographic Studies *89*
- Four-dimensional Ultrasound Studies *90*

6. Is Fetus and Neonate the Same Individual in Terms of Behavior? 95
Milan Stanojević, Asim Kurjak

- Epidemiology and Course of Neurodevelopmental Disability in Perinatal Period *95*
- Role of Neurological Clinical Assessment in Neonatal Period *97*
- Is Neuroimaging Important for Neonatal Neurological Assessment? *99*
- Why General Movements Count? *100*
- General Movements as a Predictor of Neurologic Disability in the Future: Lesson for Prenatal Assessment *101*
- Possibility of Longitudinal Assessment of General Movements from Prenatal to Postnatal Life *103*
- Prenatal use of Postnatal Signs of Neurological Assessment *104*
- Is Gravity Affecting Prenatal and Postnatal Motor Development? *105*
- Significance of Early Intervention and Other Procedures to Improve Neurodevelopmental Outcome in Children with Neurological Risk *106*
- New Published Data on the Continuity of Fetal to Neonatal Behavior *107*

7. Twin Fetal Behavior and Facial Expression: Four-dimensional Ultrasound Study 114
Toshiyuki Hata, Riko Takayoshi, Aya Koyanagi, Takahito Miyake

- Intertwin Contact and Intrapair Stimulation *114*
- Twin Fetal Movements before 20 Weeks *116*
- Twin Fetal Facial Expressions *117*

8. Fetal Awareness 120
Milan Stanojević, Asim Kurjak, Aida Salihagić Kadić, Lara Spalldi Barišić, Miro Jakovljević

- How Human Awareness can be Defined? *121*
- How Consciousness and Awareness are Developing? *121*
- Assessment of Brain Function *122*
- Possibilities of Four-dimensional Ultrasound in Assessment of Fetal Behavior *122*
- Importance of the Investigation of Fetal Self-awareness *127*

9. Neurosonogenetics 133
Ritsuko K Pooh

- Cranial Dysraphism (Neurulation Disorder) *133*
- Holoprosencephaly (Prosencephalic Disorder) *134*
- Agenesis of the Corpus Callosum *135*
- Malformations of Cortical Development *135*
- Proliferation and Apoptosis Disorders *137*
- Ventriculomegaly *139*
- In Utero Brain Injury and Damage *142*
- Future Perspective *145*

10. Assessment of Fetal Neurobehavior in Special Cases 152
Panagiotis Antsaklis, Maria Papamichail, Marianna Theodora, George Daskalakis, Asim Kurjak

- Ethnicity and Fetal Behavior *153*
- Fetal Sex and Fetal Behavior *157*
- Diabetes and Fetal Behavior *160*

- Hypothyroidism and Fetal Behavior *162*
- Psychotropic Drugs and Fetal Behavior *163*
- Fetal Response to Vibroacoustic Stimulation *163*
- Antenatal Corticosteroid Administration and Fetal Behavior *164*

11. Cognitive Functions in Pregnant Women 170
Natalia Lesiewska, Maciej Bieliński

- Brain Changes in Pregnant Women *170*
- Cognitive Functions in Hypertensive Diseases of Pregnancy *171*
- Gestational Diabetes Mellitus and Brain Function *175*
- Cognitive Functions and Obesity *179*
- Depressive Disorders and Cognitive Functions *181*

12. Kurjak's Antenatal Neurodevelopmental Test: Protocol for Evaluating Fetal Neurology In Utero 192
Panagiotis Antsaklis, Asim Kurjak

- From Fetal Movements to Fetal Neurobehavior *193*
- Kurjak's Antenatal Neurodevelopmental Test *194*

Index 213
