CONTENTS

1. Neuroendocrine Control of Reproduction 1

Subash Chandra Biswas

- The Neurohormone Concept and Hypothalamo Hypophyseal Portal System 1
  - The HPO Axis (Hypothalamopituitary-ovarian Axis) 2
- Hypothalamus and Neurohormones 3
  - GnRH and its Role 3
  - Dopamine 5
- Pituitary and Gonadotropins 6
- Ovary and Hormonal Control 6
- Role of Opioids and Pineal Gland 6

2. Puberty and Endocrinology 9

Jayeeta Roy, Indranil Dutta

- Etiology of Puberty 9
- Physiology of Puberty 9
  - The Biological Changes 10
  - Sex Steroid Production 10
- Hormonal Changes of Puberty 10
  - Prepubertal Period 11
  - Gonadotropin-releasing Hormone 11
  - Gonadotropins 12
- GH, IGF-I and Insulin in Puberty 14
  - Pubertal Sequence 15
- Initiation of Gonadarche 16
  - Physical Changes in Girls 16
- Menstruation and Fertility 18
  - Menarche 18
  - Ovulation 19
  - Folliculogenesis and the 'Follicular Phase' 19
  - The LH Surge and Ovulation 20
  - Endometrial Development During the Menstrual Cycle and Early Pregnancy 20
  - Menstruation 21
  - Vagina, Uterus, Ovaries 21
  - Assessing Puberty 21

3. Ovulation, Anovulation and Related Endocrinology 25

M M Koley, Jayeeta Roy, Malabika Misra

- The Ovarian Cycle 25
  - Phases of Ovarian Cycle 25
  - Mechanism 27
- Anovulation 28

4. Luteal Phase Defect 33

Subash C Biswas, Ramprasad Dey, Aditi Sindhe

- Prevalence 33
  - – Normal Luteal Phase 34
  - – Hormonal Events 34
- Pathogenesis 35
- Diagnosis 36
  - – Clinical 36
- Investigations 36
- Histopathology 36
- Treatment 36

5. Thyroid in Reproduction 38

Basav Mukherjee

- Physiology of Thyroid and Reproduction 38
- Thyroid and Menstrual Irregularity 39
- Thyroid Disorder Screening in Pregnancy 39
- Thyroid in Infertility 40
- Autoimmune Thyroid Disease 41

6. Hyperprolactinemia 44

Sebanti Goswami

- Etiology 45
  - – Physiological Causes 45
  - – Hypothalamic Disorder 45
  - – Pituitary Disorder 45
  - – Metabolic Causes 46
  - – Drug Induced 46
- Clinical Features 47
- Investigations 47
  - – Imaging Techniques 47
- Management 48
  - – Expectant Management 49
  - – Medical Management 49
  - – Surgical Treatment 50

7. Precocious Puberty 51

Dilip Kumar Dutta, Jayeeta Roy, Indranil Dutta

- Isolated Pubertal Events 52
- Diagnosis of Precocious Puberty 53
  - – Differential Diagnostic Steps 53
- Treatment 53
- Management 54
  - – Central Precocious Puberty 54
  - – Peripheral Precocious Puberty 54
  - – Isolated Pubertal Events 54
- Follow-up 55

8. Delayed Puberty 56

Dilip Kumar Dutta, Indranil Dutta, Jayeeta Roy

- Causes of Delayed Puberty 56
  - Constitutional Delay 56
  - Hypogonadotropic Gypogonadism 57
  - Primary Gonadal Failure (Hypergonadotropic Hypogonadism) 58
  - Other Causes 58
- Diagnosis 58
- Management 59
  - Constitutional Delay 59
  - Hypogonadotropic Hypogonadism 60
  - Primary Gonadal Failure 60

9. Polycystic Ovarian Syndrome in Adolescent Girl 62

Dilip Kumar Dutta, Indranil Dutta

- Clinical Manifestation 63
- Pathophysiology 63
- Genetic Factors in the Etiology of PCOS 64
- Diagnosis 64
  - History 64
- Clinical Features 65
- Investigation 66
  - Laboratory Studies – Blood Profile 66
  - Endometrial Aspiration and Biopsy 67
  - Radiological Studies 67
- Differential Diagnosis 67
- Sequelae of PCOS 67
- The Natural History of PCO 68
- Complication 68
  - Short-term Sequelae 68
  - Long-term Sequelae 68
  - PCO and Mortality 69
- Management 70
  - Prime Importance of Treatment 70
  - Division of Treatment 70
  - Medical 71
  - Medical Management 71
  - Other Therapy 73
  - Surgical 73

10. Amenorrhea 76

LK Pandey

- Hypergonadotropic Amenorrhea (Primary Hypogonadism; Gonadal Failure) 80
- Genetic Alterations 81
- Genetic Causes 81

– Immunology of POF 82
• Therapies in Premature Ovarian Failure 83
– Immunotherapy 83
– Endocrine Therapy 84
– Chronic Anovulation 84
– Mechanism of Central Ovulatory Dysfunction 84
– Anorexia Nervosa 85
• Treatment 86
• Hyperprolactinemia 87
– Causes of Hyperprolactinemia 87
– Mechanism of Hyperprolactinemia 87
– Clinical Presentation of Hyperprolactinemia 88
• Hypopituitarism 88
• Polycystic Ovary Syndrome 88
– Dual-defect' Hypothesis of PCOS 91
• Insulin Resistance and Obesity 92
– Treatment 93
– Chronic Anovulation Due to Other Endocrine and Metabolic Disorders 95
– Anatomical Defects 96

11. Dysfunctional Uterine Bleeding 99

Sulekha Pandey
• Abnormal Uterine Bleeding 99
• The Blood Supply of the Uterus 99
– Endometrium Shedding and Repair 100
• Mechanisms of Normal Menstruation and the Control of Blood Loss 101
– Appendix 101
– Regulation of Normal Menstrual Cycle 104
• Mechanism of Dysfunctional Uterine Bleeding 106
– Ovulatory DUB 106
– Anovulatory DUB 108
• Diagnostic Approach of Abnormal Uterine Bleeding 109
– Investigations 109
• Management of DUB 110
– Surgical Management 112

12. Obesity and Endocrinology to Obesity and Life Cycle of Risks . 117

Shilpi Pandey, Suruchi Pandey
• Infancy, Childhood and Adolescence 117
• Obesity and Women of Reproductive Age 118
• Polycystic Ovarian Syndrome 118
– Fertility 118
– Miscarriage 119
– Obstetric Risks 119
– Gynecological Problems in the Middle Aged Women 121

– The Perimenopausal Women 121
– Gynecological Cancers and Obesity 122

13. Luteinized Unruptured Follicle Syndrome 127
Arun Paul Choudhury, Pankaj Lochan Sharma, Mangal Prasad Mallick

- Incidence 127
- Pathophysiology 127
  – LUF Syndrome and Associated Infertility 128
  – Relation Between LUFS and Luteal Phase Defect 129
- LUFS and Polycystic Ovarian Syndrome 129
  – Diagnosis of the LUF Syndrome 129
  – Treatment of the LUF Syndrome 131

14. Hirsutism and Endocrinology 134
Vijayalakshmi Seshadri

– Management in Hirsutism Include 138
– Hormonal Suppressants Include 140

Index 143
