Contents

1. Basic Anatomy of the Liver and Biliary Tract 1

Blood Supply 2
Hepatic Veins 3
Hepatic Arteries 5
Hepatic Collateral Circulation 5
Lymph Vessels 6
Nerve Supply 6
The Surgical Anatomy 6
The Biliary System 6
The Histological Anatomy of the Liver 7
The Gallbladder 8

2. Hepatic Blood Flow, Regulation and its Clinical Relevance 11

Hepatic Artery 11
Portal Vein 12
Hepatic Vein 12
The Hepatic Microvasculature 12
Factors Responsible for Altering Hepatic Blood Flow 14
Postprandial Changes 15
Sympathetic Nervous System 15
Surgery 15
Mechanical Ventilation 15
Endogenous Vasoactive Agents 16
Anesthetic Agents 16
Mechanical Factors 17
Diseases of the Liver 17
Beta-adrenergic Blockers 18
Hepatic Microsomal Inducing Agents 18
Hemorrhage 18
Measurement of Liver Blood Flow 18

3. Functions of the Liver 21

Liver as a Blood Reservoir 21
Phagocytic Function 21
Bilirubin Metabolism 21
Bilirubin Formation 22

Transport 22
Conjugation 23
Biliary Excretion 23
Carbohydrate Metabolism 24
Fat Metabolism 25
Protein Metabolism 25
Lactate Metabolism 26
Miscellaneous Functions of the Liver 27
Formation of Coagulation Factors 27
Removes or Excretes Drugs, Hormones, and Other Substances 27
Phosphocreatine Formation 27
Bile Formation 28

4. Biochemical Evaluation of Liver Function 29

Tests to Detect Hepatocellular Necrosis 29
Serum Transaminases (Aminotransferases) 29
AST/ALT Ratio 30
Lactate Dehydrogenase 30
Isocitrate Dehydrogenase 31
Tests to Detect Hepatic Biosynthetic Capacity 31
Tests for Cholestasis Detection 33
Tests for Hepatocellular Uptake, Transport and Secretion 35
Other Relevant Tests of Liver Function 36

5. Drug Biotransformation by the Liver 40

Drug Biotransformation Reactions 41
Enzyme Adaptation 43

6. The Effects of Anesthetic Drugs on Hepatic Blood Flow 48

Human Studies 51

7. Hepatotoxicity of Inhaled Anesthetics 55

Desflurane 55
Sevoflurane 56
Basis of Hepatotoxicity 56
Risk Factors 57
Halothane Hepatotoxicity 57

8. Co-drug Therapy and Anesthetic Drugs in Liver Disease 60

Centrally Acting Drugs 60
Opoids 61
Antihypertensive 61
Beta-blockers 62
H_2 Receptors Antagonists 62

Diuretics 62
Muscle Relaxants 62
Depolarizing Muscle Relaxants 62
Epidemiology 65
Pathophysiology 65
Mortality/Morbidity 66
Risk Factors 66
Clinical Presentation 67
Physical Signs 67
Sevoflurane 67
Regional Anesthesia 68
Catecholamines 68
Non-opioids Analgesics and Liver Disease 68

9. Consideration in Selecting an Inhaled Anesthetic Agent in Liver Disease 73

Case 1 73
Discussion 73
Cardiovascular Effects 73
Respiratory Effects 74
Hepatic, Renal and Other Toxicities 75
Pharmacokinetics and Pharmacodynamics 76
Termination of Effect of Selected Inhaled Anesthetic Agents 77
Case 2 78

10. Coagulopathies in Liver Disease 82

Vascular Phase 82
Platelet Phase 82
Platelet Abnormalities 83
Coagulation Phase 83
Intrinsic Pathways 84
Extrinsic Pathology 84
Clot Retraction Phase 85
Clot Resolution Phase 85
Perioperative Evaluation and Treatment 86
Diagnosis 87
Treatment 88

11. Coagulation System Monitoring in Liver Disease 90

Monitoring Coagulation 90
Bleeding Time (BT) 90
Prothrombin Time 91
Thrombin Time 91
Reptilase Time 92
Activated Partial Thromboplastin Time (aPTT) 92
Activated Clotting Time (ACT) 92

High-dose Thrombin Time 93
Thromboelastography 93
Technique 93
Clinical Uses 95
Advantages and Limitations 95

12. Alcohol and Liver Diseases 100

Alcohol Metabolism 100
Mechanism of Alcohol Induced Liver Damage 101
Rate of Metabolism 101
Duration 102
Drug Metabolism and Ethanol 102
Enzyme Induction 102
Clinical Alcoholic Syndromes 103
Alcoholic Fatty Liver Disease 103
Prognosis 104
Alcoholic Hepatitis 104
Anesthetic Implication 106
Cirrhosis 106
Clinical Presentations 106
Alcohol Withdrawal 108

13. Fulminant Hepatic Failure 111

Etiology 111
Clinical Presentation 112
Neurological Manifestations 113
Cerebral Edema 115
Cardiovascular Complications 117
Coagulopathy 118
Infectious Complications 118
Pulmonary Complications 119
Gastrointestinal Complications 119
Metabolic Complications 119
Renal Complications 120

14. Hepatopulmonary Syndrome 124

Clinical Features 124
Pathophysiology 125
Chemical Mediators of Pulmonary Vasodilatation 126
Diagnosis 126
Management 127

15. Portopulmonary Hypertension 130

Clinical Features 130
Pathogenesis 130

Investigation 131
Management 132

16. Hepatorenal Syndrome 137

Predictive Factors 137
Precipitating Factors 138
Diagnosis of HRS 138
Classification 139
Pathophysiology 139
Prevention 141
Treatment 141
Prognosis of HRS 143

17. Endocrine Dysfunction in Liver Disease 147

Gonadal Function 147
Thyroid Function 148
Diagnosis 148
Treatment 148

18. Metabolic Disturbances in Liver Disease 150

Glucose Metabolism 150
Hyperglycemia 150
Hypoglycemia 151
Protein Metabolism 151

19. Liver Disease in Pregnancy 155

Hyperemesis Gravidarum 155
Risks Factors 156
Diagnosis 156
Preeclampsia and Eclampsia 157
Pathophysiology 157
Cytotoxic Factors 158
HELLP Syndrome 160
Epidemiology 160
Pathophysiology 160
Classification 161
Clinical Presentation 161
Management 163
Blood Product Transfusion in DIC 165
Anesthesia Considerations 165
Complications 165
Acute Fatty Liver of Pregnancy 166
Intrahepatic Cholestasis of Pregnancy 168

20. Estimation and Modification of Operative Risk in Patients with Liver Disease 175

Liver Disease Risk Assessment Tools 175
Child-Turcottes Classification 175
Child-Turcotte-Pughs Score 176
The Model for End-stage Liver Disease (Meld) Score 176
Assessing Operative Risk in Liver Disease 177
Abdominal Surgery 179
Cardiac Surgery 181

21. Portal Hypertension and Perioperative Care 186

Pathophysiology 187
Formation of Varices 190
Mechanism of Variceal Hemorrhage 190
Management of Bleeding Varices 191
Transjugular Intrahepatic Portosystemic Shunt (TIPS) 191
Surgical Interventions 192
Prognosis in Portal Hypertension 192
Classification 193
Management 193
Anesthetic Management 197
Anesthesia Care 201
Postbiliary Injury and Obstructive Jaundice 203
Postoperative Management 204

22. Anesthesia for Liver Trauma and Liver Resection 209

Types of Injury 209
Management of Liver Injury 209
Preoperative Evaluation 210
Hepatic Resection 212

23. Anesthesia for Liver Transplant 216

Indications 216
Contraindications 217
Types of Liver Transplantation 217
Monitoring 222
Intraoperative Laboratory Analysis 224
Immediate Postoperative Care 229
Postoperative Complications 230
Chronic Rejection 232
Antilymphocyte Agents 233

24. Obstructive Jaundice and its Anesthetic Management 238

Clinical Features 238
Pathophysiology 239

Cardiovascular Changes 239
Impaired Immune Function 240
Renal Pathophysiology 240
Hemostatic Problems 241
Investigations 242
Management 243

25. Postoperative Jaundice 247

Bilirubin Overproduction 248
Liver is Unable to Handle the Bilirubin Load 248
Combination of Factors 248
Surgical Causes 249
Benign Postoperative Intrahepatic Cholestasis 249
Effects of Surgery and Anesthesia on Liver Blood Flow 249
Jaundice after Cardiac Surgery 249
Diagnosis 250
Management 252

26. Artificial Hepatic Support Systems 253

Indications 253
Goal of Therapy 254
Terminology 254
Hepatocytes Transplantation 257
Xenotransplantation 257

27. Porphyrias and Anesthesia 261

Heme Biosynthesis 261
Classification 262
Clinical Features: Acute Attack 263
Laboratory Diagnosis 263
Induction 265
Maintenance 265
Neuromuscular Blocking Drugs 266
Analgesics and Reversal Agents 266
Treatment of Complications 266
Monitoring 267
Postoperative Management 267
Treatment: Acute Crisis 267
Medical Care 268
Diet 269
Deterrence 269
Prognosis 269

28. Crigler-Najjar Syndrome 274

Clinical Presentation 274
Management 275

29. Gilbert's Syndrome 278

Neonatal Jaundice and Gilbert's Syndrome 279
Medical Treatment 280
Anesthetic Implication 280

30. Glycogen Storage Diseases 282

Glycogen Storage Disease Type I (GSD I) 282
Glycogen Storage Disease Type II (GSD II) 284
Glycogen Storage Disease Type III (GSD III) 285
Glycogen Storage Disease Type IV (GSD IV) 286
Glycogen Storage Disease Type V (GSD V) 286
Glycogen Storage Disease Type VI (GSD VI) 287
Glycogen Storage Disease Type VII (GSD VII) 287

31. Congenital Cholestatic Syndromes 289

Caroli's Disease: [Idiopathic Intrahepatic Biliary Duct Dilatation, (IIBDD)] 289
Pathogenesis 289
Clinical Presentation 290
Diagnosis 290
Complications 290
Management 290
Anesthesia Management 291

32. Alagille Syndromes 293

Clinical Presentations 293
Management 294
Anesthesia Management 294
Inhalational Anesthetic Agents 295
Intravenous Agents 295
Opioids 295
Muscle Relaxants 296
Analgesics 296

33. Progressive Familial Intrahepatic Cholestasis (PFIC) 298

PFIC 1 (Byler Disease) 299
PFIC 2 (Byler Syndrome) 299
PFIC 3 299
Management 300
Treatment 300
Surgical Treatment 301
Anesthesia Management 301

34. Biliary Atresia 303

Syndromic Biliary Atresia (Incidence is 10–20%) 303
Nonsyndromic Biliary Atresia 303
Clinical Features 304
Diagnosis 305
Management 305
Anesthetic Management 306

Index 309
