Contents

Section 1: Applied Nutrition and Dietetics

1. Introduction to Nutrition 3

- Definition 4
- Nutrition: History and Concepts 4
- History of Nutrition 5
- Role of Nutrition in Maintaining Health 10
- Facts About Basic Nutrition and Health 10
- Importance of Nutrition in Health 11
- Factors Affecting Food and Nutrition 13
- Nutrients 14
- Macro- and Micronutrients 15
- Energy Yielding and Non-energy Yielding 16
- Elements of Nutrients: Macro and Micro 16
- Mineral Elements 20
- Food 22
- Five Food Group Plans 23
- Basic Seven Food Groups 24
- Functions of Food 24
- Nutrition Problems in India 26
- National Nutritional Policy 27
- Role of Food and Medicinal Values 28
- Nurses Role in Food and Nutrition 30

2. Carbohydrates and Energy 32

- Definition and Meaning of Carbohydrate 33
- Classifications of Carbohydrate 33
- Calorie 34
- Recommended Dietary Allowances 35
- Sources of Carbohydrate 37
- Functions of Carbohydrate 38
- Digestion and Absorption of Carbohydrate 38
- Regulation of Blood Sugar 39
- Units of Energy 42
- Components of Energy Requirements 44
- Measurement of Energy 45
- Body Mass Index and Basic Metabolism 45
- Basal Metabolic Rate 46
- Determinants and Factors Affecting 46
- Nurses Role in Carbohydrate 47

3. Proteins 49

- Definitions 49
- Chemical Composition 50
- Structure of Protein 50
- Properties of Protein 50
- Classifications of Protein 51
- Sources of Protein 53
- Examples of Protein in Biology and Diet 55
- Amino Acids 56
- Biological Value of Protein 57
- Functions of Protein 57
- Digestion of Protein 59
- Deficiencies of Proteins 61

4. Fats 64

- Classifications of Fats 65
- Saturated and Unsaturated Fats 66
- Calorie Value 66
- Properties of Fats 66
- Recommended Dietary Allowances 67
- Dietary Sources of Fats 68
- Functions of Fat in the Diet 68
- Digestion and Absorption of Fats 70
- Essential Fatty Acids 73
- Lipids in Blood 73
- Deficiency of Fats 73
- LDL 74
- HDL 74
- VLDL 75
- Over Consumption of Fat 75
- Obesity 75
- Dietary Management of Atherosclerosis 77
- Role of Nurse in Fats 78

5. Vitamins 79

- Classifications of Vitamins 80
- Fat-soluble Vitamins 82
- Water-soluble Vitamins 93
- Vitamin Deficiencies and Hypervitaminosis 103

6. Minerals 106

- Definition and Meaning 107
- Classifications of Minerals 107
- Calcium 108
- Phosphorus 111
- Iron 112
- Zinc 115
- Iodine 115
- Fluoride 117
- Sodium 118
- Potassium 120
- Magnesium 121
- Chlorine 124
- Trace Elements 124

7. Water and Electrolytes 127
- Water Requirement and Regulation 128
- Water Metabolism and Distribution 130
- Electrolytes: Type, Sources and Consumption of Body Fluids 131
- Maintenance of Fluid and Electrolyte Balance 134
- Dehydration, Over Hydration and Water Intoxication 139
- Electrolyte Imbalance 143

8. Balanced Diet 155
- Definition 156
- Meaning of Balanced Diet 156
- Elements of Balanced Diet 156
- RDA—Definition, Limitations, Uses 157
- Components of Healthy Balanced Diet 158
- Factors Influencing Balanced Diet 159
- Importance of Balanced Diet 160
- Calculation of Balanced Diet 161
- Effects of Unbalanced Diets 162
- Specific Nutritional Deficiencies 162
- Conditions with Specific Dietary Requirement 163
- Food Exchange System 164
- Dietary Fiber 166
- Meal Planning 170
- Meal Planning for Different Meals in a Day 174
- Budget for Food 176
- Infant and Young Child Feeding Guidelines—Breastfeeding, Infant Foods 177
- Diet Plan for Different Age Groups—Children, Adolescents and Elderly 180
- Diet in Pregnancy—Nutritional Requirements and Balanced Diet Plan 185
- Anemia in Pregnancy—Diagnosis, Diet for Anemic Pregnant Women, Iron and Folic Acid Supplementation and Counseling 186
- Nutrition in Lactation—Nutritional Requirements, Diet for Lactating Mothers, Complementary Feeding/Weaning 188
- Weaning 189
- Complementary Feeding 190

9. Nutritional Deficiency Disorders 193
- Protein-energy Malnutrition 193
- Severe Acute Malnutrition 196
- Childhood Obesity 199
- Vitamin Deficiency Disorders 202
- Vitamin A Deficiency 202
- Vitamin D Deficiency 203
- Vitamin C Deficiency 206
- Vitamin B1 Deficiencies 208
- Riboflavin 211
- Niacin 212
- Pyridoxine 213
- Pantothenic Acid 214
- Folic Acid 215
- Cyanocobalamin 216
- Mineral Deficiency Diseases 217
- Iron Deficiency 219
- Iodine Deficiencies 222
- Calcium Deficiencies 223

10. Therapeutic Diets 226
- Concept and Meaning of Diet Therapy 227
- Definition 227
- Diet as a Therapeutic Agent 228
- Principles of Diet Therapy 228
- Factors to Consider in Planning Therapeutic Diets 229
- Modification of Nutrients in Therapeutic Diets 229
- Team Approach 229
- Diet in Sickness 230
- Therapeutic Diet 231
- Regular Diet 231
- Types of Diet Used in Hospitals 233
- Special Feeding Methods (Management of Special Diets) 235
- Tube Feeding 236
- Parenteral Feeding 236
- Dietary Modifications 236
- High-Calorie and High-protein Diets 237
- Kilocalorie-controlled and Low-kilocalorie Diets 237
- Very Low-calorie Diet 238
- Carbohydrate Modified Diets 238
- Dumping Syndrome 240
- Lactose Intolerance 240
- Fat-modified Diets 240
- Protein, Electrolyte and Fluid-modified Diets 241
- Nurses Responsibilities in Food Serving 243
- Diet Therapy for Perioperative Conditions 244
- Diet Therapy in Fevers 247
- Diet Therapy for Gastrointestinal Disorders 249
- Diarrhea 249
- Constipation 249
- Peptic Ulcer 250
- Modification of Diet in Bleeding Ulcer 251
- Diet Therapy for Liver Diseases 251
- Infective Hepatitis (Jaundice) 252

- Cirrhosis of Liver 253
- Hepatic Coma 254
- Cholelithiasis 255
- Dietary Restriction for Liver Diseases 256
- Diet for Metabolic Disorders 257
- Gout 257
- Diet Therapy for Urinary Disorders 259
- Nephrosis (Degenerative Bright's Disease) 259
- Acute Renal Failure 259
- Chronic Renal Failure 260
- Urolithiasis or Urinary Calculi 261
- Diet Therapy for Cardiovascular Disorders 262
- Hypertension 262
- Diet Therapy for Respiratory Disorder 263
- Role of Nurse in Therapeutic Diet 263

11. Cookery Rules and Preservation of Nutrients 265

- Objectives of Cooking 266
- Cooking Methods 266
- Combination of Cooking Methods 272
- Preservation of Nutrients 273
- Food Preservation 274
- Food Spoilage 275
- Uses of Temperatures 278
- Canning Procedure 279
- Drying Method of Preservation 280
- Preservation by High Concentration of Sugar and Salt 281
- Food Additives 283
- Food Adulteration 286
- Packaging Materials and Hazards 288
- Food Laws 291
- Consumer Protection 292
- Prevention of Food Adulteration, Act 1954 292
- Sale of Certain Admixtures Prohibited 292
- Procedure for Sampling and Analysis 293
- Penalties 293
- Important Miscellaneous Provisions 293
- Food Standards 293
- Bureau of Indian Standards 293
- Food and Nutrition Board 294
- Nutrition Society of India 294
- Food and Agricultural Organization 294

12. Nutrition Assessment and Nutrition Education 298

- Definition 299
- Meaning of Nutrition Assessment 299
- Purpose 299
- Objectives 299
- Goals 299
- Systems of Nutritional Assessment 299
- Methods of Nutritional Assessment 300
- Types of Assessment 300
- Clinical Assessment (Signs and Symptoms) 304
- Dietary History 306
- Nutritional Education 307
- Meaning 307
- Aims 308

13. National Nutritional Programmes and Role of Nurse 311

- National Nutritional Programmes 311
- History of Nutritional Programs 312
- Guiding Principles 313
- Current Nutritional Deficiency Status 313
- Five Year Plans on Nutritional Aspects 313
- Nutrition Interventions 314
- Nutritional Problems in India 314
- National Nutritional Policy 315
- Special Nutritional Programme 316
- Integrated Child Development Services Scheme 317
- Mid-day Meal Programme 318
- National Nutritional Anemia Program 319
- Special Nutrition Programme 319
- National Goitre Control Programme 320
- National Programme for Prophylaxis Against Blindness Due to Vitamin-D Deficiency 320
- Balwadi Nutrition Programme 321
- World Food Programme 321
- Applied Nutrition Programme 322
- Integrated Child Development Services 322
- Minimum Need Programme 323
- 20-Points Programme 323
- Child Survival and Safe Motherhood Programmes 324
- Reproductive and Child Health Programme 324
- National Nutritional Programs and Role of Nurse 324

14. Food Safety 327

- Concept of Food Safety 328
- Four Steps to Food Safety 329
- Major Foodborne Illnesses and Causes 329
- The Evolving World and Food Safety 330
- Food Safety: A Public Health Priority 331
- Food Safety Considerations and Measures 331
- Tips for Maintaining Food Safety 332
- Food Hygiene/Sanitation 332
- Food Poisoning 333
- Hygiene Control 335

- Effects of Unsafe Practices 336
- Role of Food Handlers in Foodborne Diseases 337
- Essential Steps in Safe Cooking Practices 338
- Consumer Control Points for Food Safety 339

Section 2: Applied Biochemistry

15. Introduction to Biochemistry 343

- Definition and Significance in Nursing 343
- Meaning and Concept of Biochemistry 344
- History of Biochemistry 344
- Need of Studying Biochemisty 345
- Review of Structure, Composition and Functions of Cell 345
- Structure and Composition of Cell 346
- Structure of the Unit Membrane 347

16. Carbohydrates 362

- Glycolysis 370
- Glycogenesis 371
- Cori Cycle or Lactic Acid Cycle 372
- Pentose Phosphate Pathway 373
- Citric Acid Cycle 375
- Glycogenolysis 377
- Regulation of Blood Sugar Level 378
- Hereditary Fructose Intolerance 386

17. Lipids 388

- Fatty Acids 389
- Essential Fatty Acids 389
- Properties of Lipids 390
- Lipid Metabolism 391
- Cholesterol 395
- Steroid Hormones 396
- Atherosclerosis 397
- Lipoproteins 397

18. Proteins 400

- Structural Organization of Protein 401
- Importance of Protein 402
- Classifications of Protein 402

19. Clinical Enzymology 415

- Mechanism of Enzyme Activity 417

20. Acid Base Maintenance 424

- Concept and Meaning of Acid Base Maintenance 424
- Definition 425
- Blood Gases 425
- Organ Systems Involved in pH Balance 426
- Respiratory Acidosis 429
- Metabolic Alkalosis 432
- Acid-base Balance: Ketoacidosis 433

21. Heme Catabolism 436

- Function of Heme 437
- Mechanism 437
- Pathophysiology 438
- Iron Absorption and Transport 438
- Heme Degradation 440
- Heme Catabolism 440
- Heme Degradation Pathway 441
- Jaundice 443

22. Organ Function Tests 450

- Kidney Function Test 450
- Liver Function Test 452
- Thyroid Function Test 455

23. Immunochemistry 459

- Historical Perspectives 459
- Macrophages 461
- Major Histocompatibility 461
- Immunity 463
- Antigen 464
- Antibodies 465
- Enzyme-linked Immunosorbent Assay 467
- Human Leukocyte Antigens 469
- Specialized Proteins 469

Biochemistry Glossary 471

Index 491
