Contents

Section I
Basics Including Neonatology

1. Clinical Pediatrics 3

1.1 Case Recording Format 3

History 3
Physical Examination 5
Systemic Examination 12
Summary 14

1.2 Approach to a Sick Child 14
1.3 Bedside Calculations and Nomograms 18
1.4 Assessment of Growth (Anthropometric/Auxologic Measurements and Assessment) 25
1.5 Socioeconomic Status Scale 35

2. Growth, Development and Behavioral Pediatrics 36

2.1 Stages of Growth and its Determinants 36
2.2 Growth Charts and Growth Assessment 39
2.3 Puberty/Adolescence 45
2.4 Disorders of Growth 45

Various Causes of Short Stature 47
Case Study: Short Stature and Delayed Puberty in an Adolescent Boy 48

2.5 Failure to Thrive 51

Case Study: FTT and Congenital Anomalies in a Term Low Birth Weight (LBW) Baby 53

2.6 Development 54

Developmental Milestones 55
Case Study: Developmental Delay and Small Head in a Child 61
Case Study: Developmental Delay in a Preterm Baby 61

2.7 Intelligence 64
2.8 Psychological and Developmental Disorders 65

2.9 Mental Retardation 70
2.10 Dyslexia 72
Case Study: Dyslexia in a School Child 72
2.11 Special Sense Organ Defects 74

3. Immunization 76

3.1 Definitions and Terminologies 76
3.2 Types of Vaccines 76
3.3 Immunization Schedule 84
3.4 Immunization in Special Circumstances 89
3.5 Adverse Effects of Vaccines 91
3.6 Cold Chain 92

4. Nutrition 96

4.1 Infant and Young Child Nutrition 96
4.2 Applied Nutrition 108
4.3 Spectrum and Clinical Features of Malnutrition 114
Kwashiorkor 116
Marasmus 117
4.4 Severe Acute Malnutrition 120
4.5 Case Studies 128
Case 4.5.1: Malnutrition in an Infant 128
Case 4.5.2: Severe Wasting in an Infant 130
Case 4.5.3: Nutritional Edema in a Toddler 133
4.6 Micronutrients 135
Micronutrient Deficiency Disorders 135

5. Fluid, Electrolytes and Calcium Phosphorus Metabolism 151

5.1 Fluid and Electrolytes Compartments 151
Fluid Compartments 151
5.2 Acid-base Balance and Arterial Blood Gas (ABG) Analysis 157
5.3 Fluid and Electrolyte Therapy 160
Surface Area Calculation 160
Insensible Loss Calculation 161
Fluid Requirement 161
Maintenance Therapy 161
Concurrent Losses and Maintenance Therapy during
Fluid Restriction 161
Deficit Therapy 162
Parenteral Nutrition 164
5.4 Approaches to a Child with Shock and Anaphylaxis 165
Management of Shock 167
Approach to Anaphylactic Shock 169

5.5 Channelopathies 172
Genetic 172
5.6 Practical Tips on Fluid Therapy 173

6. Neonatology 177

6.1 Overview and Definitions 177
6.2 Fetal Growth 179
6.3 Low Birth Weight (LBW) Babies 180
6.4 Normal Newborn Care 181
General Examination of Newborn 182
Case Study: An Extremely Preterm Baby with Growth Faltering 185
6.5 Neonatal Jaundice 187
Case Study: Newborn Baby with Indirect Hyperbilirubinemia 189
6.6 Birth Injuries 190
6.7 Intrauterine Infections 190
Case Study: LBW Baby with Poor Feeding and Microcephaly 191
Case Study: Preterm Baby with Diarrhea 192
6.8 Neonatal Sepsis 193
Case Study: Preterm NB with Poor Feeding and Poor Activity 197
Case Study: Newborn with Fever 198
6.9 Respiratory Distress Syndrome (RDS) 198
Case Study: Newborn with Respiratory Distress 199
6.10 Neonatal Convulsion 201
Case Study: Newborn with Convulsions 203
6.11 Neonatal Encephalopathy 204
Case Study: Newborn with Birth Asphyxia and Meconium Aspiration 205
6.12 Hematological Disorders in the Newborn 206
Case Study: Neonate with Bleeding 206
Case Study: Newborn-one Among Twins with Polycythemia 208
6.13 Neonatal Reflexes 208
6.14 Assessment of Gestational Age 209
6.15 Effect of Medications on the Fetus and Neonates 211
6.16 Neonatal Resuscitation 216

7. Infections and Infestations 222

7.1 Overview and Exanthematous Fevers 222
Introduction 222
Definitions 223
Exanthematous Fevers 223

7.2 Pyrexia of Unknown Origin (PUO)/Fever of Unknown Origin (FUO) 226
Definition 226
Case Study: PUO without a Focus 226
7.3 Case Study: Febrile Illness with Shock 227
Case Study 7.3.1: Toxic Shock Syndrome 227
Case Study 7.3.2: Severe Febrile Illness with Shock 228
7.4 Case Study: Fever with Lymphadenopathy and Organomegaly 229
Case Study 7.4.1: Fever with Bull Neck 229
Case Study 7.4.2: Fever with Hepatosplenomegaly 230
7.5 Case Study: Tetanus 238
Case Study: Chronic Suppurative Otitis Media (CSOM) with Feeding Difficulty and Muscle Spasm 238
7.6 Case Study: Acquired Immunodeficiency Syndrome 238
Case Study: Repeated Infections and Diarrhea in an Infant 238

8. Immunity and Allergy 246

8.1 Overview and Types of Immunodeficiency 246
8.2 Case Study: Recurrent Skin Infections in a Child 248
8.3 Case Study: Rheumatoid and Collagen Vascular Diseases 249
Case: Prolonged Pyrexia, Arthritis and Rash 249
Case: Skin Rash and Muscle Weakness in a Girl 251
8.4 Case Study: Kawasaki Disease 252
Case: Fever, Irritability and Redness of Eyes and Mouth 252
8.5 Case Study: Drug Hypersensitivity 254
Case: Vesiculobullous Lesions Following Drug Intake 254
8.6 Types of Allergic Reactions 256
8.7 Adverse Drug Reactions 257

Appendix 259

1. Intrauterine Growth Charts 259
2. WHO Growth Charts for Children and Adolescents: Percentile and SD Charts 261
3. Growth Velocity Charts 308
4. ELIZ Three-in-One Charts for Weight, Height and BMI Charts 310
5. Growth Charts for Specific Syndromes 313
6. Bone Age Charts: Male and Female 325

Section II
Systems Including Pediatric Surgery

9. Gastrointestinal System 339

9.1 Overview and Examination of Gastrointestinal Tract 339
9.2 Diarrheal Diseases and Oral Rehydration Therapy 343
9.3 Case Study: Persistent and Chronic Diarrheas 345
Case Study 9.3.1: Persistent Diarrhea in an Infant 345
Case Study 9.3.2: Chronic Diarrhea with Skin Changes in an Infant 346
Case Study 9.3.3: Chronic Diarrhea and Malabsorption in a Child 347
9.4 Case Studies: Oro-Facial Diseases and Anomalies 351
Case Study 9.4.1: Recurrent Oral Ulcers in a Child 351
Case Study 9.4.2: Congenital Anomalies Involving the Face 352
9.5 Case Study: Recurrent Vomiting 353
Case Study 9.5.1: Failure to Thrive with Regurgitation and Vomiting 353
9.6 Case Study: Constipation 355
Case Study 9.6.1: Chronic Constipation in Children355
9.7 Case Study: Acute and Recurrent Abdominal Pain 356
Case Study 9.7.1: Acute Abdomen in a Baby 356
Case Study 9.7.2: Recurrent Abdominal Pain (RAP) in a School Girl 357
Case Study 9.7.3: Acute Abdominal Pain (AAP) in a Child 358
9.8 Case Study: Hepatobiliary Diseases 358
Case Study 9.8.1: Recurrent Mild Jaundice in a Child 358
Case Study 9.8.2: Conjugated Hyperbilirubinemia in a Child 360
Case Study 9.8.3: Acute Hepatic Failure 360
Case Study 9.8.4: Chronic Liver Disease 363
Case Study 9.8.5: Massive Hematemesis in a Child 365
9.9 Case Study: Peritonitis 365
Case Study 9.9.1: Abdominal Pain with Loose Stools 365

10. Respiratory System 367

10.1 Examination of the Respiratory System 367
10.2 Acute Respiratory Infection (ARI) Control Program 370
10.3 Case Study: Children with Drooling/Stridor 372
Case Study 10.3.1: Fever with Drooling 372
Case Study 10.3.2: Stridor in an Infant 373

Case study 10.3.3: Fever and Acute Stridor in a Child 373
10.4 Case Study: Children with Chest Infections 374
Case Study 10.4.1: Choking and Episodic Cough in a Child 374
Case Study 10.4.2: Abscess Scalp and Chest Infection in an Infant 375
10.5 Case Study and Management of Asthma 378
Case Study 10.5.1: Chronic Audible Wheeze in a Child 378
10.6 Case Study: Persistent and Chronic Chest Infections 383
Case Study 10.6.1: Unresolved Chest Infection 383
Case Study 10.6.2: Chronic Lung Infection 384

11. Cardiovascular System 389

11.1 Examination of the Cardiovascular System 389
11.2 Case Studies: Acyanotic and Cyanotic Congenital Heart Diseases 392
11.3 Case Study: Rheumatic Carditis and Heart Disease 407
11.4 Case Study: Viral Myocarditis and Cardiomyopathy 410
11.5 Case Study: Cardiac Arrhythmias 411
11.6 Case Study: Cardiac Tamponade 412
11.7 Case Study: Infective Endocarditis Prophylaxis and Treatment 413

12. Genitourinary System 416

12.1 Overview and Definitions 416
12.2 Case Study: Children with Nephritic and Nephrotic Syndromes 419
Case Study 12.2.1: Acute Nephritis in a Child 419
Case Study 12.2.2: A Child with Nephritic Syndrome (NS) 420
12.3 Case Study: Gross Hematuria 422
Case Study 12.3.1: A Child with Gross Hematuria 422
12.4 Case Study: Children with Acute and Chronic Renal Failure 423
Case Study 12.4.1: Acute Renal Failure 423
Case Study 12.4.2: A Child with Chronic Renal Failure 423
12.5 Case Study: Failure to Thrive with Acidosis and Alkalosis 424
Case Study 12.5.1: Failure to Thrive with Acidosis 424
12.6 Case Study: Urinary Tract Infection and Reflux Nephropathy 426
Case Study 12.6.1: Recurrent UTI 426
12.7 Case Study: Ureteric Colic and Urolithiasis 431
Case Study 12.7.1: Ureteric Colic and Hematuria 431

13. Hemato-oncology 434

13.1 Overview and Definitions 434
13.2 Case Studies: Children with Various types of Anemia/Pancytopenia 436

Case Study 13.2.1: An Infant with Severe Anemia 436
Case Study 13.2.2: A Child with Nutritional Anemia 438
Case Study 13.2.3: A Child with Severe Anemia Requiring Frequent Blood Transfusions 441
Case Study 13.2.4: A 3-Year-Old Child with Pancytopenia 445

13.3 Case Studies: Children with Bleeding Tendency 447

Case Study 13.3.1: A Well Child with Ecchymosis 447
Case Study 13.3.2: A 6-Year-Old Child with Repeated Hemarthrosis 449

13.4 Case Studies: Children with Hematological and other Malignancies 450

Case Study 13.4.1: A 4-Year-Old Sick Child with Rapidly Developing Anemia and Bleeding Gum 450
Case Study 13.4.2: A 9-Year-Old Girl with Mediastinal Compression Syndrome 453
Case Study 13.4.3: A 1½-Year-Old Child with Proptosis, Ataxia and Abdominal Mass 455
Case Study 13.4.4: A 10-Month-Old Baby with Hematuria and Right Lumbar Mass 456
Case Study 13.4.5: A Six-Year-Old Child with Intracranial Space Occupying Lesion (ICSOL) 457

14. Nervous System 459

14.1 Examination of Nervous System 459

Central and Peripheral Nervous System 459

14.2 Localization of Pathology 467

Cortex 467

14.3 CNS Infections 476

Meningitis 476

14.4 Seizure Disorder 477

14.5 Case Studies: Children with Small and Large Head 477

Case Study 14.5.1: A 10-Month-Old Baby with an Abnormally Small Head 477
Case Study 14.5.2: A Six-Month-Old Baby with a Large Head 483

14.6 Case Study: Febrile Fit 485

Case Study 14.6.1: A One-Year-Old Boy with Fever and Seizure 485

14.7 Case Study: Child with Headache 486

Case Study 14.7.1: A 12-Year-Old Girl with Persistent Headache 486

14.8 Case Study: Children With Umn Lesions 487

Case Study 14.8.1: An Infant with Acute Hemiplegia 487
Case Study 14.8.2: A Child with Birth Asphyxia and Neurological Disability and Seizures 489

14.9 Case Study: Children with LMN Lesions 492

Case Study 14.9.1: A Child with Acute Flaccid Paralysis (AFP) 492

Case Study 14.9.2: A 5-Month-Old Floppy Infant 494
14.10 Case Study: CNS Infection/Demyelination 497
Case Study 14.10.1: A Girl with Fever and Altered Sensorium 497

15. Endocrinology 498

15.1 Case Study: Overview of Endocrine Disorders in Children 498
15.2 Case Study: Various Endocrine Disorders 498
Case Study 15.2.1: A Child with Severe Short Stature Having Normal Intelligence 498
Diagnosis and Discussion: Hypopituitarism 498
Case Study 15.2.2: A Child with Polyuria and Dyspepsia 501
Case Study 15.2.3: A 6-Month-Old Baby with Constipation and Developmental Delay 502
Case Study 15.2.4: A Three-Month-Old Female Baby with FTT and Ambiguous Genitalia 505
Case Study 15.2.5: A Child with Obesity and Hypertension 509
Case Study 15.2.6: A Child with Headache, Sweating and Paroxysmal Hypertension 510
Case Study 15.2.7: A Five-Year-Old Girl with Precocious Puberty 510
15.3 Case Study: Child with Diabetes 513
Case Study 15.3.1: A Child with Diabetic Ketoacidosis 513

16. Chromosomal, Genetic and Metabolic Disorders 519

16.1 Overview of Chromosomal and Genetic Disorders 519
Chromosomal Anomalies 520
16.2 Case Study: Children with Dysmorphism and Various Congenital Anomalies 527
Case Study 16.2.1: A Child with Dysmorphic Facies and Multiple Congenital Anomalies 527
Case Study 16.2.2: A Girl with Short Stature and Primary Amenorrhea 531
Case Study 16.2.3: A Boy with MR and Minor Malformations 532
Case Study 16.2.4: A Child with Obesity, MR and Chromosomal Anomaly 533
16.3 Case Study: Children with Inborn Errors of Metabolism 533
Case Study 16.3.1: A NB with Inborn Error of Metabolism (IEM) 533
Case Study 16.3.2: A Blue-Eyed Blonde Infant with MR 534
Case Study 16.3.3: A Child with Cyclical Vomiting 535
Case Study 16.3.4: A Child With Dysmorphic Features and Hepatosplenomegaly 535
Case Study 16.3.5: A 10-Year-Old Child with Massive Splenohepatomegaly 537

Case Study 16.3.6: A Marfanoid Child with MR, Blue Eyes and Malar Flush 537
Case Study 16.3.7: An Infant with Hepatic Failure, whose Sibling Died of Similar Illness 538
Case Study 16.3.7: A 2-Year-Old with Hepatomegaly and Early Morning Seizures 539
Case Study 16.3.8: A 4-Year-Old Child with Repeated Hypoglycemic Seizures in the Morning 539

17. Drowning and Poisoning 546

17.1 Drowning and Near-Drowning 546
17.2 Poisoning in Children 548
17.3 Snake Bite and other Animal Poisons 559

18. Pediatric Surgery and Related Conditions 566

18.1 Burns 566
18.2 Orthopedic Disorders in Children 569
18.3 Craniovertebral Anomalies 580
18.4 Anomalies of the Genitourinary Tract 581
18.5 Git Conditions 582

Appendix 584

1. Drugs and Dosages 584
2. Recommended Readings 597

Books and Journals 597

Index 599
