Contents

Section 1 ECMO: Basics

1. Introduction to Extracorporeal Membrane Oxygenation 3
2. Indication and Selection Criteria 9
3. Extracorporeal Membrane Oxygenation Components 15
4. Circuit Preparation and Priming 26

Section 2 Initiation and Management

5. Pre-extracorporeal Membrane Oxygenation Planning and Preparation 35
6. Protocol for Cannulation 42
7. Protocol for Anticoagulation 52
8. Protocol for Initiation and Stabilization 63
9. Protocol for Monitoring the Patient While on Extracorporeal Membrane Oxygenation 68
10. Management of Patient on Extracorporeal Membrane Oxygenation 81
11. Ventilation During ECMO and Awake ECMO 91
12. Surgical Intervention During Extracorporeal Membrane Oxygenation 101
13. Protocol for Transport and Retrieval of the Patient on Extracorporeal Membrane Oxygenation 104

Section 3 Complication and Troubleshooting

14. Protocol for Managing the Mechanical Complication 113
15. Protocol for Troubleshooting While on ECMO 121
16. Renal Issues and Protocol for Renal Replacement Therapy 135
17. Management of Venoarterial Extracorporeal Membrane Oxygenation Complications 140
18. Management of Venovenous Extracorporeal Membrane Oxygenation Complications 146

Section 4 Weaning and Decannulation

19. Protocol for Weaning and Trial Off 153
20. Carbon Dioxide Removal Device 161

Section 5 Ancillary Details

21. Protocol for Record Keeping 167

22. Extracorporeal Membrane Oxygenation Cart and Inventory 172

23. Protocol for Out-of-Hospital Extracorporeal Membrane Oxygenation 173
