Contents

Volume 1

1. Anesthetic Machine 1
- Gas Supply Unit *3*
- Circuit Pressure *25*
- Humidifiers *25*
- Waste Gas Scavenger *26*
- Some Key Points *26*
- Checking of Anesthesia Machine and Circuits *29*

2. Anatomy and Physiology of Respiratory System 31
- Trachea *31*
- Bronchus *32*
- Lungs *37*
- Mechanism of Respiration *40*
- Respiratory Center and Its Regulation *46*
- Metabolic Functions of Lung *50*

3. Pulmonary Physiology Related to Anesthesia 51
- Pulmonary Circulation *51*
- Alveolar Ventilation (V_A) *59*
- Alveolar Oxygen Tension (P_aO_2), Pulmonary End Capillary Oxygen Tension (PCO_2), Arterial Oxygen Tension (PAO_2), Mixed Venous Oxygen Tension *63*
- Dead Space *68*
- Resistance of Breathing *70*
- Work of Breathing *75*
- Lung Volumes and Capacities *76*

4. Oxygen and Carbon Dioxide 82
- History *82*
- Properties of Oxygen *82*
- Preparation of Oxygen *83*
- Storage of Oxygen *83*
- Oxygen Transport in Body *83*
- Lack of Oxygen or Hypoxia *87*
- Causes of Postoperative Hypoxia *98*
- Hypoxia and Altitude *99*
- Oxygen Excess or Toxicity *100*
- Oxygen Delivery System *102*
- Hyperbaric Oxygen *103*
- Oxygen–Hemoglobin Dissociation Curve *105*
- Carbon Dioxide Dissociation Curve *108*
- Carbon Dioxide Stores *109*
- Hypercapnia and Hypocapnia *109*
- Transport of CO_2 *111*
- Summary *113*

5. Cardiovascular System (Anatomy and Physiology) 115

Brief Anatomy of a Heart 115
- Apex of Heart *115*
- Base of Heart *115*
- Right Border of Heart *115*
- Inferior Border of Heart *116*
- Left Border of Heart *116*
- Chambers of Heart *117*
- Conducting System of Heart *121*
- Arteries Supplying Heart *123*
- Cardiac Cellular Anatomy *126*

Cardiac Electrophysiology 131
- Resting Membrane Potential *131*
- Rate of Rise of Upstroke in Action Potential *132*
- Propagation and Velocity of AP *132*
- Cardiac Action Potential *134*
- Nerve Supply of Heart *137*
- Coronary Blood Flow *140*
- Cardiac Cycle *140*
- Myocardial Metabolism *145*
- Cardiac Output *146*
- Vascular Resistance *152*
- Cardiac Reflexes *154*
- Circulation *157*
- Arterial Blood Pressure *160*

6. Electrocardiogram 162
- Electrocardiographic Paper *162*
- Electrographic Leads *162*
- Basic Mechanism of Action of an Electrocardiograph *166*
- Genesis of P-wave *168*
- Premature Atrial Depolarization (Atrial Extrasystole) and P-Wave *172*
- Wandering Atrial Pacemaker *173*

- Paroxysmal Supraventricular (Atrial) Tachycardia *173*
- The Genesis of PR Interval *180*
- Genesis of QRS Complex *184*
- Genesis of ST Segment and T-Wave *199*
- Coronary Insufficiency *199*
- Myocardial Infarction and ECG Changes *202*
- Summary *204*
- Cardiac Axis and Normal ECG *206*
- Electrophysiology of Normal Heart and Production of Normal ECG *212*

7. Neuromuscular Physiology Related to Muscle Relaxants..... 216
- Morphology of Neuromuscular Junction *216*
- Summary of the Mechanism of Muscular Contraction by Neuromuscular Transmission *222*
- Actions of Drugs on Neuromuscular Transmission *227*
- Antagonism of Neuromuscular Block *237*
- Anticholinesterases or Cholinesterase Inhibitors *240*

8. Acid–Base Balance 243
- Terminology *245*
- Interconversion of H^+ Concentration and PH *247*
- Acid–Base Homeostasis *248*
- Carriage of Carbon Dioxide *257*
- Elimination of H^+ 259
- Measurement of Acid–Base Balance *260*
- Technique for Arterial Blood–Gas Sampling *264*
- Disturbances of Acid–Base Balance *265*
- Respiratory Acidosis *266*
- Respiratory Alkalosis *269*
- Metabolic Acidosis *271*
- Sodium Bicarbonate *273*
- Lactic Acidosis *275*
- Metabolic Alkalosis *277*
- More about Anion Gap *280*
- Effects of Acid–Base Disturbances *281*
- Diagnosis of Acid–Base Disorders and Practical Approach *286*

9. Water Balance..... 289
- Different Nomenclatures and Definitions *292*
- Electrolytes and Colloids *293*
- Method of Exchange of Substances in Between Different fluid Compartments *294*
- Water Metabolism and Its Balance *295*
- Intravenous Fluids *302*

10. Electrolyte Balance 304

Sodium Balance 304
- Hypernatremia *305*
- Hyponatremia *307*

Potassium Balance 310
- Urinary Excretion of Potassium *310*
- Intercompartmental Shifts of Potassium *311*

Calcium Balance 318
- Control of Calcium Metabolism *319*
- Clinical Manifestations of Hypocalcemia *322*
- Treatment of Hypocalcemia *323*
- Anesthetic Considerations of Hypocalcemia *323*

Phosphorus Balance 324
- Hyperphosphatemia *324*
- Hypophosphatemia *324*

11. Autonomic Nervous System and Its Pharmacology 326
- Centers of Autonomic Nervous Systems *327*
- Peripheral Parts of Autonomic Nervous Systems *328*
- Sympathetic (Adrenergic) Nervous System *329*
- Parasympathetic Nervous System *332*
- Conclusion *333*
- Receptors *334*
- Adrenergic Receptors *337*
- Summary *340*
- Cholinergic Receptors *343*
- Transmission of Impulses *347*
- Neurotransmitters *350*
- Classification of Drugs Acting Through Autonomic Nervous System *356*
- Catecholamines *357*
- Adrenergic Agonists *364*
- Uses of Sympathomimetic Agents in Hypotension and Shock *371*
- Adrenergic Receptor Antagonists *372*
- Cholinergic Receptor (Muscarinic and Nicotinic) Agonist and Antagonist *375*

12. Preoperative Evaluation and Preparation..... 383
- Preoperative Assessment *383*
- History Taking *384*
- Anesthetic Plan *385*
- Preanesthetic Preparation *386*

13. Local Anesthetic Agents 390
- History *390*
- Chemistry of Local Anesthetic Agents *391*
- Classification of Local Anesthetic Agents *393*

- Anatomy of Neuron *395*
- Action Potential of Nerve Fiber and Transmission of Impulses *397*
- Mechanism of Action of Local Anesthetic Agents *400*
- Classification of Nerve Fibers *402*
- Potency, Duration of Action, and Sensitivity of Different Nerve Fibers to Local Anesthetic Agents *403*
- Pharmacological Effects of Local Anesthetic Agents *404*
- Pharmacokinetic Effects of Local Anesthetic Agents *405*
- Toxicity of Local Anesthetic Agents *407*
- The Adjuvant Drugs to Augment the Clinical Effects of Local Anesthetics *408*
- General Consideration of Local Anesthetic Agents *410*
- Individual Local Anesthetic Agents *413*
- Local Anesthetics Largely Restricted to Ophthalmological Use *417*

14. Intravenous Anesthetics..... 418
- Introduction and History *418*
- Barbiturates *419*
- Benzodiazepines *429*
- Individual Benzodiazepine *435*
- Phencyclidine–Ketamine *438*
- Propofol *441*
- Droperidol *444*
- Flumazenil *446*
- Opioids *448*
- Pharmacological Actions of Opioids *454*
- Individual μ-Receptor Agonist *467*
- Opioid Antagonists *474*

15. Inhalational Anesthetic Agents 477
- Pharmacokinetics of Inhalational Anesthetic Agents *483*
- Pharmacodynamics of Inhalational Anesthetics *485*
- Nitrous Oxide *487*
- Diethyl Ether $(C_2H_5)_2O$ *497*
- Halothane *503*
- Isoflurane *508*
- Sevoflurane *510*
- Desflurane *512*
- Xenon (Xe) *514*
- Anesthetic Delivery System or Circuits *516*
- Carbon Dioxide Absorption *530*
- Vaporizers *533*

16. Muscle Relaxants and their Antagonists..... 542
- History *542*
- Chemistry of Muscle Relaxant *543*
- Succinylcholine or Suxamethonium (Diacetylcholine) *544*
- Nondepolarizing Muscle Relaxants *551*
- Individual Nondepolarizing Muscle Relaxant *560*
- Antagonism of Neuromuscular Blockade *568*
- Individual Neuromuscular Antagonist *570*

17. Pharmacology of Perioperative Arrhythmia 573
- Classification *573*
- Mechanism of Arrhythmia *574*
- Drugs Used in the Treatment of Cardiac Arrhythmias *578*

18. Hypertension: Pharmacology and Anesthesia 590
- Classification of Hypertension (Based on Etiology) *590*
- Classification of Hypertension (Based on Numerical Value) *591*
- Essential or Primary or Idiopathic Hypertension *591*
- Secondary Hypertension *592*
- Effects of Hypertension *593*
- Some Terminologies Regarding Hypertension *594*
- Mechanism of Hypertensive Encephalopathy *594*
- Diagnosis of Primary and Secondary Hypertension *595*
- Investigations for all Hypertensive Patients *596*
- Investigations for Selected Hypertensive Patients *596*
- Renin–Angiotensin System *596*
- Angiotensin-Converting Enzyme Inhibitors *601*
- Management of Hypertensive Emergency *605*
- Calcium Channel Blockers *610*
- Beta-Blockers *613*
- Hydralazine/Dihydralazine *619*
- Minoxidil *620*
- Diazoxide *621*
- Diuretics *621*
- Anesthesia in Hypertensive Patient *627*

19. Heart Failure and Its Pharmacology 632
- Types of Heart Failure *633*
- Compensatory Mechanisms in Heart Failure *636*
- Determinants of Ventricular Function *637*
- Assessment of Ventricular Function *642*
- Probable Theories of Heart Failure *643*
- Neurohormonal and Biochemical Adjustment of Heart Failure *643*
- Pharmacological Treatment of Heart Failure *645*
- Current Status of Clinical Use of Digitalis *657*
- Adverse Effects or Toxicity of Digitalis and Its Management *657*

20. Management of Airway 658
- History *658*
- Anatomy of the Upper Airway *661*
- Applied Anatomy *674*
- Physiology of Airway Protection *675*
- Upper Airway Obstruction *675*

***Routine Airway Management* 677**
- Evaluation of the Airway (Airway Assessment) *677*

***Equipment for Airway Management* 682**
- Airway Management by Face Mask and Bag Ventilation *682*
- Airway Management other than Face Mask Ventilation *684*
- Flexible Fiber-Optic Laryngoscope (Bronchoscope) *706*
- Other Surgical Airway Technique *708*
- Supraglottic Airway Devices *709*

Volume 2

21. Mechanical Ventilation 713
- Introduction and History *713*
- Artificial Intermittent Positive Pressure Ventilation *715*
- Different Modes of Mechanical Ventilation *725*
- Waveform in Mechanical Ventilation *734*

22. Intraoperative Monitoring 746

***Neuromuscular Monitoring* 747**
- General Principles *748*
- Sites of Nerve Stimulation and Muscle Responsiveness *748*
- Patterns of Electrical Stimulus *749*
- Recording of Evoked Muscular Response *753*
- Stimulating Electrodes *754*

***Monitoring of the Respiratory System* 754**
- Clinical Monitoring of Respiratory System *755*
- Monitoring of the Respiratory Function by Precordial and Esophageal Stethoscope *755*
- Monitoring of Respiratory System by Measuring the Respiratory Rate, Airway Pressure, Tidal Volume, and Disconnection Alarm *756*
- Monitoring of Respiratory System by the Measurement of the Quantity of O_2 in Blood *757*
- Measurement of Inspired O_2 Concentration *763*
- Monitoring of Respiratory System by Measurement of CO_2 in Blood *764*
- Monitoring of Apnea for Nonintubated Patient *769*
- Monitoring of Anesthetic Gases *770*
- Measurement of Central Respiratory Drive for Monitoring of Respiratory Function *772*
- Monitoring of Pulmonary Mechanics *772*

***Monitoring of Central Nervous System* 778**

***Monitoring of Depth of Anesthesia* 779**
- History *779*
- Memory and Awareness *780*
- The MAC Concept for the Measurement of Depth of Anesthesia for Volatile Anesthetic Agents *782*
- Methods of Measuring and/or Monitoring the Depth of Anesthesia *783*

***Monitoring of Cardiovascular System* 789**
- History *789*

23. Peripheral Nerve Block 810
- Introduction and History *810*
- Risks and Contraindications *811*
- Techniques for Nerve Localization *811*
- Continuous Peripheral Nerve Block *812*
- Upper Extremity Block or Brachial Plexus Block *813*
- Distal Upper Extremity Conduction Block of Individual Nerve *826*
- Intravenous Regional Anesthesia of Extremity *832*
- Digital Block *834*
- Wrist Block *834*
- Lower Extremity Blocks *835*
- Lumbar Plexus Block *836*
- Individual Nerve Block of Lower Extremity *838*
- Nerve Block Around Knee *845*
- Nerves Block Around the Ankle *848*
- Iliohypogastric, Ilioinguinal, and Genitofemoral Nerve Block *849*
- Penile Block *850*
- Intercostal Nerve Block *851*

24. Spinal, Epidural, and Caudal Anesthesia or Central Neuraxial Block 854
- History *854*
- Anatomy *857*
- Parts of Vertebra *857*
- Spinal Nerves *867*
- Dermatomes *868*
- Microscopic Structure of the Spinal Cord *870*
- Blood–Cerebrospinal Fluid and Blood–Brain Barrier *874*
- Selection of the Patient for Regional Anesthesia *875*
- Equipment Required for Regional Anesthesia *878*
- Indications and Contraindications of Central Neuraxial Block *879*
- Physiological Effects of Central Neuraxial Block (Spinal and Epidural) *881*
- Preoperative Preparation, Premedication, and Intraoperative Management of Patient for Regional Anesthesia *883*

- Spinal Anesthesia *886*
- Order of Blocking or Sensitivity of Different Nerve Fibers to Local Anesthetic Agents *896*
- Continuous Spinal Anesthesia *897*
- Epidural Anesthesia *899*
- Individual Epidural Block *909*
- Caudal (Sacral) Epidural Anesthesia *912*
- Causes of Failed Epidural Blocks *915*
- Complications of Spinal and Epidural Block *915*
- Differential Blockade *922*
- Combined Spinal-Epidural Anesthesia *923*
- Adjuvants to Regional Anesthesia *925*
- Central Neuraxial Blockade Versus General Anesthesia *930*
- Subarachnoid Block Versus Epidural Block *932*

25. Pediatric Anesthesia 934
- Normal Weight Gain *934*
- Cardiovascular System *935*
- Hemoglobin and Blood Volume *940*
- Respiratory System *941*
- Temperature Regulation and Its Maintenance in Pediatric Patients *946*
- Renal Function and Fluid Balance *947*
- Hepatic Function *949*
- Hypocalcemia *949*
- Gastrointestinal System *949*
- Central Nervous System *950*
- Pharmacological (Pharmacokinetic and Pharmacodynamic) Status of Drugs in Pediatric Patients *950*
- Various Anesthetic Agents Used in Pediatric Anesthesia *953*
- Pediatric Anesthetic Risk Factors *961*
- Some Important Considerations in Pediatric Anesthesia *962*
- Neonatal Anesthesia *977*
- Some Special Pediatric Surgical Cases *979*
- Postoperative Pain Relief in Children *984*

26. Perioperative Arrhythmia and Its Management 987
- Heart Rate *987*
- Classification of Perioperative Different Types of Cardiac Rhythm *989*
- Causes of Perioperative Bradycardia and Its Management *990*
- Atrioventricular Conduction Defects *992*
- Causes of Perioperative Tachycardia and Its Management *994*
- Cardiac Arrest and Cardiopulmonary Resuscitation *1006*
- Pacemaker *1011*
- Description of Permanent Pacemaker *1012*
- ECG Findings in Pacemaker *1013*
- Pacemaker and Surgery *1015*

27. Ischemic Heart Diseases and Anesthesia 1016
- Introduction, Etiology, and Pathophysiology *1016*
- Diagnosis of Myocardial Ischemia *1017*
- Treatment of Ischemic Heart Disease *1021*
- Anesthetic Management of Patients with Known or Suspected IHD Undergoing Noncardiac Surgery *1023*

28. Valvular Heart Diseases and Anesthesia 1028
- Mitral Stenosis *1028*
- Mitral Regurgitation *1033*
- Aortic Stenosis *1036*
- Aortic Regurgitation *1039*
- Mitral Valve Prolapse *1041*

29. Congenital Heart Diseases and Anesthesia 1042
- Preoperative Assessment of Patients with CHD for Noncardiac Surgery *1044*
- Specific Problems Found in Patients with Congenital Heart Disease *1045*
- Atrial Septal Defect *1045*
- Ventricular Septal Defect *1046*
- Patent Ductus Arteriosus *1047*
- Tetralogy of Fallot *1048*
- Eisenmenger's Syndrome *1050*
- Tricuspid Atresia *1051*
- Transposition of the Great Vessels *1051*

30. Cardiomyopathies and Anesthesia..... 1052
- Idiopathic Dilated Cardiomyopathy *1052*
- Hypertrophic Obstructive Cardiomyopathy *1054*
- Restrictive Cardiomyopathy *1056*

31. Pulmonary Diseases and Anesthesia..... 1057
- Effects of Anesthesia and Surgery on Pulmonary Functions *1057*
- Preoperative Evaluation *1058*
- Predicting Perioperative Pulmonary Complications *1065*
- General Principle for Postoperative Care in Pulmonary Disease *1065*
- Individual Pulmonary Disease and Anesthetic Management *1066*
- Chronic Obstructive Lung Disease or Chronic Obstructive Pulmonary Disease *1080*

- Bronchiectasis *1089*
- Restrictive Lung Diseases *1090*
- Lung Cyst *1092*

32. Liver Diseases and Anesthesia 1093
- Macro- and Microanatomy of Liver *1093*
- Blood Supply and Nutrition of Liver *1096*
- Venous Drainage, Drainage, and Nerve Supply of Liver *1097*
- Regulation of Liver Blood Flow *1097*
- Effects of Anesthesia on Liver Blood Flow *1098*
- Functions of Liver *1098*
- Classification of Liver Diseases *1105*
- Liver Function Tests *1106*
- Effects of Anesthesia on Hepatic Function *1112*
- Effects of Liver Dysfunction on Pharmacokinetics and Pharmacodynamics of Anesthetic Drugs *1114*
- Preoperative Evaluation and Anesthetic Risk Assessment of Patient with Liver Dysfunction *1115*
- Individual Liver Diseases and Anesthesia *1116*
- Anesthetic Management of Patient with Liver Disease and Jaundice *1119*
- Preoperative Laboratory Investigation *1123*
- Some Perioperative Considerations *1124*
- Postoperative Jaundice *1124*
- Guideline for Anesthesia on Patients with Decompensated Liver Function *1125*
- Halothane and Hepatotoxicity *1126*

33. Thyroid Diseases and Anesthesia 1128
- Physiology *1128*
- Hyperthyroidism *1130*
- Anesthetic Management of Hyperthyroidism *1133*
- Hypothyroidism *1134*

34. Psychiatric Diseases, its Pharmacology and Anesthesia 1139
- Classification of Psychiatric Diseases *1139*
- Multiaxial Classification of Psychiatric Disorders *1141*
- Psychopharmacology and Anesthetic Drugs Interaction *1141*
- Antipsychotic Drugs *1141*
- Antianxiety Drugs *1144*
- Drugs for Affective Disorder *1145*

35. Obstetrics Analgesia and Anesthesia 1153
- Physiological Changes During Pregnancy *1154*
- Placental Exchange Including Respiratory Gases *1158*
- Uteroplacental Circulation *1159*
- Effects of Anesthetic Agents on Uterine Activity *1160*
- Consequences of Pain During Labor *1161*
- Pain Pathways in Labor *1162*
- Analgesia for Vaginal Delivery *1163*
- General Anesthesia for Vaginal Delivery *1171*
- Anesthesia for Cesarean Section *1172*
- Acid Aspiration or Mendelson's Syndrome *1176*
- Preeclampsia, Eclampsia, and Anesthesia *1177*
- Obstetric Hemorrhage and Anesthesia *1180*

36. Anesthesia in Laparoscopic Surgery 1181
- Pathophysiological Changes of Respiratory and CVS During Laparoscopy *1182*
- Problems During Laparoscopy 1185
- Contraindications of Laparoscopic Surgery *1186*
- Complications of Laparoscopic Surgeries *1187*
- Alternatives to CO_2 Pneumoperitoneum *1189*
- Laparoscopy During Pregnancy and Children *1189*
- Anesthetic Procedure *1190*

37. Laser Surgery and Anesthesia 1192
- Introduction and Physics *1192*
- Clinical Application and Biological Effects of Laser *1194*
- Hazards or Risks of Laser Surgery *1195*
- Laser Surgery of Larynx and Fire of Endotracheal Tube *1196*
- Airway Fire Protocol *1200*
- Laser Safety Protocol *1200*

38. Anesthesia for ENT Surgery 1202
- General Principles *1202*
- Preoperative Evaluation and Airway Assessment *1203*
- Preoperative Medication *1204*
- Anesthetic Agents *1205*
- Individual Surgery *1207*
- Adenoidectomy *1208*
- Anesthesia for Minor Surgery Such as Endoscopy and Microsurgery of Larynx *1209*
- Head and Neck Cancer Surgery *1211*
- Anesthesia for Nasal and Sinus Surgeries *1213*
- Anesthesia for Ear Surgeries *1215*
- Maxillofacial Reconstruction and Orthognathic Surgery *1217*

39. Anesthesia for Geriatric Patients 1219
- Anesthetic Management and Perioperative Risk of Geriatric Patients *1228*

40. Obesity and Anesthesia 1231
- Fat Cells and Obesity *1233*
- Physiological Changes Associated with Obesity *1233*

- Influence of Obesity on the Pharmacokinetic of Drugs *1236*
- Anesthetic Management of Obese Patient *1237*

41. Ophthalmic Anesthesia 1241
- Anatomy *1241*
- Skeletal Muscles of Periorbit and Orbit *1248*
- Nerves of the Eye, Orbit, and Periorbit *1251*
- Blood Vessels of Eye and Orbit *1258*
- Regional Versus General Anesthesia *1260*
- Techniques of Regional Anesthesia for Ophthalmic Surgeries *1263*
- Combined Retrobulbar (Intraconal) and Peribulbar (Periconal) Method *1270*
- Recently Developed Regional Anesthetic Techniques for Ophthalmic Surgeries *1272*
- Recent Guidelines for Anesthetist in Ophthalmic Surgery *1274*
- Specific Surgical Procedures and Modification of Regional Anesthesia *1275*
- Complications of Orbital Regional Anesthesia *1276*
- Oculocardiac Reflex *1280*
- Intraocular Pressure and Anesthesia *1281*
- Retinopathy of Prematurity *1284*
- General Anesthesia for Ophthalmic Surgery *1285*

42. Kidney Diseases And Anesthesia 1287
- Structure of Kidney *1287*
- Renal Circulation or Renal Blood Flow *1298*
- Glomerular Filtration *1303*
- Assessment of Renal Functions *1305*
- Anesthesia, Surgery, and Renal Function *1308*

43. Orthopedic Anesthesia 1316
- Some Specific Problems Related to Orthopedic Surgeries and Anesthesia *1317*
- Individual Orthopedic Surgery *1328*

44. Anesthesia for Surgeries on Genitourinary Tract 1334
- Cystoscopy *1334*
- Transurethral Resection of the Prostate *1336*
- Lithotripsy *1340*
- Anesthesia for Noncancer Surgeries on Kidney and Upper Ureter *1342*
- Anesthesia for Surgeries of Urological Malignancies *1343*

45. Day-case Anesthesia 1347
- Patient Selection *1348*
- Surgical Procedures *1350*
- Preoperative Visit, Assessment and Preparation of Patients for Day-Case Surgery and Anesthesia *1350*
- Organization of A Day-Case Anesthesia Unit *1355*

46. Anesthesia at Remote Location and for Radiodiagnosis and Radiotherapy 1364
- Indications for Anesthesia in Radiology Department *1365*
- Hazards in Radiology Department and General Considerations *1366*
- Adverse Reaction Resulting from the Injection of Contrast Media *1367*
- Preanesthetic Management of Patients Undergoing X-Ray Investigations Under General Anesthesia *1368*
- Individual Anesthetic Management in Radiology Department *1369*
- Anesthesia for Radiotherapy *1378*

47. Neuromuscular and Muscular Diseases and Anesthesia 1379
- Neuromuscular Diseases *1379*
- Muscular Diseases *1385*

48. Malignant Hyperthermia 1391
- Etiology *1392*
- Genetics *1392*
- Clinical Features *1393*
- Diagnosis of Malignant Hyperthermia *1394*
- Triggering Factors and Diagnosis of Susceptibility *1395*
- Treatment for Malignant Hyperthermia *1397*
- Management of Patients Susceptible to Malignant Hyperthermia *1398*

49. Neurosurgery and Anesthesia 1400
- Cerebral Physiology *1400*
- Effects of Anesthetic Agents on Cerebral Physiology *1404*
- Cerebrospinal Fluid *1407*
- Intracranial Pressure *1409*
- Methods of Reduction of ICP or Strategies for the Protection of Brain *1411*
- Effect of Anesthesia on Electrophysiological Monitoring During Neurosurgical Procedures *1416*
- Elective Non-Neurosurgical Procedures After a Stroke *1416*
- Different Positioning of Patient During Neurosurgery *1417*
- Monitoring During Neuroanesthesia *1421*
- Anesthetic Management of Neurosurgeries *1423*

- Some Special Neurosurgical Procedures *1428*
- Anesthesia for Spine Surgery *1432*

50. Blood Transfusion 1434
- History *1434*
- Composition of Blood *1435*
- Preparation of Blood Components for Transfusion *1435*
- Apheresis *1439*
- Plasma Exchange *1439*
- Transfusion Complications *1439*
- Collection of Blood and Anticoagulants *1442*
- Changes in Stored Blood *1443*
- Plasma Substitutes *1444*

51. Diabetes Mellitus and Anesthesia 1447
- Classification of Diabetes Mellitus *1447*
- Impaired Glucose Tolerance, Impaired Fasting Glycemia, and Metabolic Syndrome *1448*
- Metabolic Derangements in Diabetes Mellitus *1449*
- Insulin *1449*
- Mechanism of Action of Insulin *1450*
- Metabolic Actions of Insulin *1450*
- Preparations of Insulin *1451*
- Oral Hypoglycemic Agents *1452*
- Anesthesia *1454*

Index 1459
